

PROCEEDINGS OF SPIE

Second International Conference on Artificial Intelligence, Deep Learning, and Neural Networks (AIDLNN 2025)

Shiling Zhang
Editor

**17–19 October 2025
Chongqing, China**

Supported by
University of Brescia (Italy)
Belarusian State University (Belarus)
Chongqing University of Technology (China)
State Grid Chongqing Electric Power Company (China)

SPIE

Volume 14182

Proceedings of SPIE 0277-786X, V. 14182

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Second International Conference on Artificial Intelligence, Deep Learning, and Neural Networks (AIDLNN 2025)*, edited by Shiling Zhang, Proc. of SPIE 14182, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix *Conference Committee*

OPTICAL NEURAL NETWORK

- 14182 02 **An intelligent high-speed data link transmission technology based on nonlinear filtering and deep learning image enhancement** [14182-7]
- 14182 03 **The application of Transformer model in text mining and prognosis prediction of electronic medical records** [14182-11]
- 14182 04 **Explosion resistance simulation study of water retaining dams using ABAQUS** [14182-16]
- 14182 05 **A deep hybrid neural network framework for nonlinear pattern recognition in large-scale high-frequency time series data** [14182-48]
- 14182 06 **Privacy-preserving federated learning approach for medical image analysis** [14182-63]
- 14182 07 **Network congestion prediction and intelligent traffic scheduling based on neural networks** [14182-64]
- 14182 08 **Research on full-stack observability and security of trusted computing environment based on eBPF and image processing** [14182-77]
- 14182 09 **A decentralized finance real-time risk assessment method based on graph neural networks** [14182-78]
- 14182 0A **Application of a label-semantic-guided symmetrical attention mechanism in short-text multilabel classification** [14182-83]
- 14182 0B **Second language immersive interactive learning system for virtual reality environment and multimodal perception optimization method** [14182-84]
- 14182 0C **Innovative application of intelligent sensing technology in power grid condition monitoring in power grid infrastructure systems** [14182-95]
- 14182 0D **The formation mechanism and countermeasures of blockage in the continuous operation of the spot market in Liaoning under the high penetration of new energy** [14182-25]
- 14182 0E **A quantity-price coupling decision-making model driven by inter-provincial power trading boundaries** [14182-30]
- 14182 0F **Multimodal graph neural networks for early risk prediction of Alzheimer's disease** [14182-41]
- 14182 0G **Implementation of guided filter-based image processing on FPGA** [14182-61]

- 14182 OH **Research on the monitoring and optimization methods of the O₃-BAC process operation status in smart water plants** [14182-67]
- 14182 OI **Design of agricultural product quality inspection and E-commerce grading system based on image recognition** [14182-69]
- 14182 OJ **Construction of a non-coding RNA function prediction model based on graph neural networks (GNN)** [14182-74]
- 14182 OK **Application of a 3D-CNN+ neural network regression model driven by educational data governance in the evaluation of moral education course engagement** [14182-85]

DEEP LEARNING AND NEURAL NETWORK

- 14182 OL **Digital preservation of ancient architectural landscapes based on deep learning** [14182-1]
- 14182 OM **A multimodal deep learning model for extracting behavioral features of teachers' digital competence** [14182-6]
- 14182 ON **Computer intelligent recognition method for abnormal water gushing in coal mines based on deep learning** [14182-13]
- 14182 OO **Characteristic analysis and short-term prediction of influencing factors of PM2.5 concentration based on multi neural network model** [14182-15]
- 14182 OP **Deep learning in multiparameter heart disease prediction model** [14182-18]
- 14182 OQ **Benchmarking traditional machine learning models for sentiment analysis on a film** [14182-21]
- 14182 OR **A deep-learning-based facial expression recognition method with real-time application potential** [14182-24]
- 14182 OS **Simulation study on the fire extinguishing efficiency of a gun-fired fire extinguishing projectile in high-rise buildings** [14182-35]
- 14182 OT **Virtual reality as a preservation medium: digitally inheriting heritage through immersive experiences** [14182-53]
- 14182 OU **Deep-learning-based automatic analysis method for sand and gravel particle gradation** [14182-65]
- 14182 OV **Design and implementation of table tennis hitting action recognition system integrating pose estimation and deep learning** [14182-76]
- 14182 OW **Deep-learning-based multivariate time series forecasting model for Chinese export destinations** [14182-79]

- 14182 0X **Research on privacy-preserving federated learning models for food safety prediction**
[14182-82]
- 14182 0Y **Student learning pattern recognition and personalized resource recommendation based on deep neural networks** [14182-89]
- 14182 0Z **Large-scale model continuous learning techniques for dynamic insurance markets**
[14182-90]
- 14182 10 **A data-driven smart classroom teaching ecosystem architecture: integration of multimodal analysis and adaptive learning under human-machine collaboration** [14182-91]
- 14182 11 **Design of an interactive teaching system for Solfeggio and ear training combining speech recognition and visualization technology** [14182-5]
- 14182 12 **A conditional at-risk value calculation model integrating volatility prediction and deep learning** [14182-26]
- 14182 13 **A quality evaluation system for Lanzhou beef noodles based on multimodal data fusion**
[14182-33]
- 14182 14 **Research on service quality and customer satisfaction of Beijing public hospitals based on Donabedian model and machine learning** [14182-34]
- 14182 15 **Development of an integrated computational platform for protein structure prediction and molecular docking driven by AlphaFold** [14182-42]
- 14182 16 **Deep reinforcement learning-based decision optimization for enterprise supply chain management** [14182-49]
- 14182 17 **CrossFP: a multimodal deep learning framework for protein function prediction via sequence-structure integration** [14182-59]
- 14182 18 **Prediction of online public sentiment based on neural network models** [14182-62]
- 14182 19 **A study on cryptocurrency price prediction based on multivariate LSTM and Google Trends sentiment indicators** [14182-93]
- 14182 1A **Heart sound classification based on an optimized convolutional neural network transfer learning and bidirectional long short-term memory network hybrid model** [14182-94]
- 14182 1B **Design of insensitive incentive mechanism and resource allocation strategy based on game theory** [14182-97]

ARTIFICIAL INTELLIGENCE ALGORITHM

- 14182 1C **Research on the path of AI-enabled curriculum reform for Chinese design education**
[14182-2]

- 14182 1D **Research on the online monitoring fusion platform for ultra-high and extra-high voltage transmission lines based on big data** [14182-3]
- 14182 1E **Research on intelligent sensing model of multisource sensor data with AI algorithm** [14182-4]
- 14182 1F **Analysis of the construction path and empirical model of AI-driven human resource precise matching mechanism** [14182-8]
- 14182 1G **Research on the feature extraction and aesthetics of Confucian music and dance movements based on AI dance analysis** [14182-9]
- 14182 1H **Design of ceramic modeling feature recognition and computer-aided generation system integrating transfer learning** [14182-10]
- 14182 1I **Design of collaborative scheduling mechanism for power material distribution tasks oriented to multisource data** [14182-12]
- 14182 1J **Research on simulation algorithm of supply chain operation and teaching collaboration mechanism for integration of industry and education** [14182-14]
- 14182 1K **Supply chain optimization and inventory management based on mathematical modeling** [14182-17]
- 14182 1L **Research on the relationship between the maximum space charge region width and doping concentration of MOSFETs on different semiconductor substrates** [14182-19]
- 14182 1M **Improvement methods of LSTM model in cross-border logistics time series prediction** [14182-20]
- 14182 1N **Adaptive protection modeling and circuit breaker restoration control for sensitive loads in voltage sag scenario** [14182-22]
- 14182 1O **Analysis and research on the impact of multipath channels on the performance of minimum shift keying systems** [14182-23]
- 14182 1P **Analysis of spatio-temporal changes in NDVI in Zhengzhou based on GEE** [14182-28]
- 14182 1Q **Adaptive recommendation of music teaching resources and knowledge graph construction supported by AI** [14182-36]
- 14182 1R **Design of AI-assisted intelligent music performance training system and adaptive feedback model** [14182-37]
- 14182 1S **Research on the practical application of AI-driven multilevel data analysis and deep learning models based on Python language in fraud prevention** [14182-38]
- 14182 1T **Multiobjective storage location assignment with congestion balancing and co-occurrence** [14182-39]
- 14182 1U **Predicting consumer behavior based on multimodal data** [14182-45]

- 14182 1V **Application of explainable artificial intelligence in quality control of port engineering construction** [14182-47]
- 14182 1W **The development of a motion capture and virtual simulation training system for gymnasts** [14182-52]
- 14182 1X **Research on digital twin-driven intelligent operation and maintenance of subway turnstiles** [14182-54]
- 14182 1Y **Research on intelligent identification methods for risk factors at mechanized construction sites** [14182-55]
- 14182 1Z **A tourism host-guest interaction sentiment analysis method incorporating the BERT model** [14182-66]
- 14182 20 **Explainable artificial intelligence decision support for plant species selection in saline-alkali land remediation** [14182-75]
- 14182 21 **Intelligent recommendation and data analysis methods for the dissemination mechanism of agricultural products under new media platforms** [14182-88]
- 14182 22 **Design of a lightweight ship real-time detection algorithm based on improved YOLOv8n** [14182-96]
- 14182 23 **Research on intelligent violent behavior detection methods and evaluation based on YOLO-V8** [14182-27]
- 14182 24 **Engineering implementation of an AI-assisted film and animation script generation and shot logic verification system** [14182-29]
- 14182 25 **Remote intelligent detection technology for wire rope defects driven by embedded edge computing** [14182-31]
- 14182 26 **Architecture design and implementation of an AI-assisted lesson preparation platform for university teachers integrating large language models** [14182-32]
- 14182 27 **An intelligent piano motion capture and self-learning performance system driven by multisensor input** [14182-40]
- 14182 28 **Style clustering and feature visualization of music works integrating multimodal data** [14182-43]
- 14182 29 **Microbial genomic sequence analysis and functional prediction algorithm based on deep learning** [14182-44]
- 14182 2A **Robust adversarial training methods for autonomous system security AI** [14182-50]
- 14182 2B **Case study on optimizing credit scoring models for financial risk assessment using explainable artificial intelligence** [14182-51]

- 14182 2C **Optimization of joint parameters of prefabricated building components based on genetic algorithm [14182-56]**
- 14182 2D **Research on multiple fault pattern recognition and preventive maintenance scheduling model of shearer driven by ant colony algorithm [14182-57]**
- 14182 2E **Design and implementation of library book information management system based on MySQL and Python [14182-58]**
- 14182 2F **Railway geological hazard simulation based on digital twin technology and AI models [14182-60]**
- 14182 2G **A security federated learning framework for financial fraud detection based on blockchain networks [14182-68]**
- 14182 2H **Research on a dynamic evaluation method for outdoor sports destination accessibility based on an interpretive structure model [14182-70]**
- 14182 2I **Construction of a higher education compound talent system integrating AI capability cultivation [14182-71]**
- 14182 2J **Development of intelligent speech recognition and automatic evaluation system in Korean language learning [14182-72]**
- 14182 2K **Optimization and implementation of network intrusion detection algorithm based on convolutional neural network [14182-73]**
- 14182 2L **A deep-learning-based symbolic regression framework for mathematical modeling [14182-80]**
- 14182 2M **Research on industrial motor fault prediction based on LSTM-XGBoost [14182-81]**
- 14182 2N **The impact of AI prompt word design behavior of university teachers on the quality of generative teaching resources: AI-driven automated teaching resource generation and intelligent context design [14182-86]**
- 14182 2O **Construction of generative AI task-driven content recommendation model for university teaching [14182-87]**
- 14182 2P **Design and implementation of an intelligent planning system for trainee physical training tasks based on artificial intelligence reinforcement learning [14182-92]**
- 14182 2Q **A new energy power station operation monitoring and virtual simulation system based on digital twins [14182-99]**
