**Volume 14238**

Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 14238

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Photon Computing, Algorithm, and Artificial Intelligence (PCCAI 2025)*, edited by Gabriel Gomes de Oliveira, Proc. of SPIE 14238, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

## Part One

| INTERNATIONAL CONFERENCE ON PHOTON COMPUTING, ALGORITHM, AND ARTIFICIAL INTELLIGENCE (PCCAI 2025) |                                                                                                                                                           |
|---------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| 14238 02                                                                                          | Quantitative evaluation of power grid construction effectiveness and investment planning algorithm under carbon emission constraints [14238-1]            |
| 14238 03                                                                                          | An algorithmic framework for music emotion feature extraction and retrieval oriented towards big data [14238-2]                                           |
| 14238 04                                                                                          | Research on optimization of energy storage resource spot market trading mechanism based on multi-agent algorithm [14238-3]                                |
| 14238 05                                                                                          | Blockchain-based consensus algorithm for cloud computing resource access control and security verification [14238-4]                                      |
| 14238 06                                                                                          | Design of intelligent risk identification and early warning system based on intelligent algorithms [14238-5]                                              |
| 14238 07                                                                                          | Structural optimization design and simulation analysis of fruit picker based on ANSYS [14238-6]                                                           |
| 14238 08                                                                                          | Big data-driven enterprise resource allocation optimization model and algorithm design [14238-7]                                                          |
| 14238 09                                                                                          | Real-time detection and trajectory prediction algorithm for table tennis balls based on YOLOv8 [14238-8]                                                  |
| 14238 0A                                                                                          | Research on the construction and efficiency evaluation of a full-chain visualization management system for logistics in the context of big data [14238-9] |
| 14238 0B                                                                                          | Design of dynamic evaluation algorithm for the formation of comprehensive disciplinary abilities supported by artificial intelligence [14238-10]          |
| 14238 0C                                                                                          | Intelligent closed-loop management technology of distribution network inspection by fusing YOLOv5 and federated learning algorithm [14238-11]             |
| 14238 0D                                                                                          | Research on digital literacy diagnosis model for higher vocational teachers based on clustering algorithm [14238-12]                                      |
| 14238 0E                                                                                          | Design of unified control platform architecture for smart campus based on Internet of Things and edge computing [14238-13]                                |

- 14238 0F **A study on multi-objective co-design of aerodynamics and structure based on collaborative optimization algorithm for folded fixed-wing roving bombs** [14238-14]
- 14238 0G **Trend analysis and feature extraction of psychological states of higher vocational students based on data mining** [14238-15]
- 14238 0H **Optimization of computer algorithm for solving power balance constraints with high proportion of new energy** [14238-16]
- 14238 0I **Implementation of real-time rhythm synchronization detection and optimization algorithm for percussion orchestras** [14238-17]
- 14238 0J **A student learning outcome prediction model based on ensemble learning methods** [14238-18]
- 14238 0K **Depth modeling and congestion prediction algorithm of large-scale spatio-temporal data of urban traffic flow** [14238-19]
- 14238 0L **Algorithm improvement and empirical verification of time series data mining in financial index fluctuation prediction** [14238-20]
- 14238 0M **Research on an improved transformer-based algorithm for predicting elderly people's home product purchasing behavior** [14238-21]
- 14238 0N **Cloud-based real-time enterprise decision support platform for big data** [14238-22]
- 14238 0O **Research on resource scheduling and optimization methods of green supply chain supported by digital platform** [14238-23]
- 14238 0P **Cloud-native environment data full lifecycle storage encryption and access audit security protection technology** [14238-24]
- 14238 0Q **Real-time response and communication optimization method for vehicle-grid interaction based on edge computing** [14238-25]
- 14238 0R **Design of intelligent pest identification system combined with edge computing and energy consumption optimization analysis** [14238-26]
- 14238 0S **Depth prediction and pollution source tracking algorithm of high-density sensing data in Hong Kong regional air monitoring network** [14238-27]
- 14238 0T **Dynamic data processing and optimization based on cloud computing in intelligent teaching systems** [14238-28]
- 14238 0U **A scalable pipeline for real-time big data analytics using LLM-based methods** [14238-29]
- 14238 0V **Design of adaptive decoupling control and real-time compensation algorithm for two-inertia servo system** [14238-30]

- 14238 0W **New flower color simulation and breeding target-oriented algorithm based on generative adversarial networks** [14238-31]
- 14238 0X **Intelligent sparse feature extraction and parallel computing acceleration scheme for high-dimensional tax datasets** [14238-32]
- 14238 0Y **The application of deep learning in basic sketching teaching: taking the dynamic correction of human proportion as an example** [14238-33]
- 14238 0Z **An immersive news interaction model integrating light field display and AI narrative** [14238-34]
- 14238 10 **A collaborative framework for cultural heritage conservation based on multi-source data fusion and digital modeling** [14238-35]
- 14238 11 **Algorithm for allocating computing resources of AI education platform in universities based on multi-objective optimization** [14238-36]
- 14238 12 **Market capacity forecasting model and algorithm optimization based on big data analysis** [14238-37]
- 14238 13 **Causal discovery and Bayesian inference algorithms for early warning of new energy equipment** [14238-38]
- 14238 14 **Research on road paving defect detection method based on multi-source sensor fusion and YOLO real-time recognition** [14238-39]
- 14238 15 **A study on green policy text analysis based on BERT** [14238-41]
- 14238 16 **Analysis of the spatio-temporal distribution of global urban building data in OpenStreetMap** [14238-42]
- 14238 17 **Optimization of three-layer glass thickness based on particle swarm optimization** [14238-43]
- 14238 18 **Enhanced flipped classroom: a data-driven history education model utilizing generative AI and closed-loop feedback** [14238-44]
- 14238 19 **Quantitative evaluation research on the performance improvement of new energy monitoring algorithm model by data governance** [14238-45]
- 14238 1A **The application of graph neural network in the vulnerability assessment and dispatching of extreme weather in power systems** [14238-46]
- 14238 1B **Research on user demand product analysis algorithm based on data mining** [14238-47]
- 14238 1C **Research on control strategy of road-sensing analog motor in steer-by-wire system and fault diagnosis and fault tolerance design of rack force sensor** [14238-48]
- 14238 1D **Research on financial system optimization based on K-means algorithm and RPA technology** [14238-49]

- 14238 1E **Real-time calibration of hydrological models based on adaptive Kalman filters** [14238-50]
- 14238 1F **Coverage deployment strategy based on a hybrid GA and PSO** [14238-51]
- 14238 1G **Marine vessel detection algorithm based on multimodal fusion and dynamic anti-interference** [14238-52]
- 14238 1H **Differential privacy mechanisms in financial big data sharing** [14238-53]
- 14238 1I **Edge computing architecture for real-time process control in smart factories** [14238-54]
- 14238 1J **Research on safety supervision risk assessment for refining and petrochemical construction projects based on the PageRank algorithm** [14238-55]
- 14238 1K **Application of large language models in automated grammar correction for vocational college students' English** [14238-56]
- 14238 1L **Intelligent multi-target tracking methods for drones based on an improved YOLO8 algorithm** [14238-57]
- 14238 1M **Enhanced quantum-behaved sine cosine algorithm for legged-wheeled robot path planning** [14238-58]
- 14238 1N **ESG perspective on the coordination of international trade rules and legal regulation for cross-border data flow in manufacturing** [14238-59]
- 14238 1O **An operational data prediction model integrating artificial intelligence and big data for enterprise applications** [14238-60]
- 14238 1P **Dual-machine passive localization method based on multi-source fusion and GAT** [14238-61]
- 14238 1Q **Activity prediction of single-atom catalysts for DMC transesterification reactions based on the random forest algorithm** [14238-62]
- 14238 1R **The application and implementation of intelligent feature extraction algorithms in the analysis of teaching behavior data** [14238-63]

## Part Two

- 14238 1S **Application of big data analytics in predicting audience behavior at major sporting events** [14238-65]
- 14238 1T **AI-driven predictive analytics for seasonal demand forecasting in retail** [14238-66]
- 14238 1U **Big data-driven smart interior design system: spatial layout optimization based on user residential behavior data** [14238-67]

- 14238 1V **Application of micro-motion detection in the survey of hidden hazards at a coal mine in Inner Mongolia** [14238-68]
- 14238 1W **An AI-based intelligent acceptance system for civil engineering construction quality** [14238-69]
- 14238 1X **Deep-learning-based automatic evaluation of vocational college English speaking skills** [14238-70]
- 14238 1Y **An intelligent recommendation algorithm for personalized cultural tourism routes based on graph neural networks** [14238-71]
- 14238 1Z **End-to-end electricity trading bidding strategies based on an improved genetic algorithm** [14238-72]
- 14238 20 **Application of AI-based computational fluid dynamics in wind load analysis of high-rise buildings** [14238-73]
- 14238 21 **Multidimensional semantic feature extraction and computation methods for foreign language learning processes supported by large-scale language models** [14238-74]
- 14238 22 **Real-time data fusion algorithm for integrated assessment of soil and groundwater quality** [14238-75]
- 14238 23 **Research on generating personalized English learning pathways based on multimodal learning analytics** [14238-76]
- 14238 24 **Real-time monitoring and visualization of indoor environments based on edge computing and deep learning** [14238-77]
- 14238 25 **Algorithm optimization for cross-border e-commerce platforms** [14238-78]
- 14238 26 **Secure multi-party computation methods for collaborative graduate employment analysis** [14238-80]
- 14238 27 **Virtual heritage tourism: a method for cultural heritage preservation and promotion based on digital twins** [14238-81]
- 14238 28 **Carbon efficiency analysis and multi-objective optimization based on hybrid neural dynamics algorithms** [14238-82]
- 14238 29 **Optimization of multi-stage deployment strategies for aerosol-based decoys from a single platform and research on coordinated coverage effectiveness** [14238-83]
- 14238 2A **Capacity-constrained transportation route optimization based on a two-level genetic algorithm** [14238-84]
- 14238 2B **A BERT sentiment analysis model integrating dynamic layer attention and parallel networks** [14238-85]

- 14238 2C **Multi-factor coupling optimization model and algorithm design for sustainable management in tourism cities** [14238-86]
- 14238 2D **Motion planning and energy optimization for humanoid robot Unitree G1 in performance scenarios: a multi-objective approach based on D-H kinematics and NSGA-II algorithm** [14238-87]
- 14238 2E **Optimization of sensor networks and data processing algorithms in ecological environment monitoring** [14238-88]
- 14238 2F **Path planning of UAV based on kinematics model and adaptive differential evolution algorithm** [14238-89]
- 14238 2G **Workflow optimization and performance verification of cross-border judicial digital humans based on the Coze platform** [14238-90]
- 14238 2H **Bi-verified tree-of-thoughts for multimodal reasoning** [14238-91]
- 14238 2I **Research on optimization methods for traffic efficiency at intersections based on vehicle-road-cloud collaboration** [14238-92]
- 14238 2J **Genetic algorithm-based path optimization for emergency rescue operations** [14238-93]
- 14238 2K **An improved PPO reinforcement learning algorithm for robotic arm trajectory planning** [14238-94]
- 14238 2L **Predicting new energy vehicle sales from technical attributes: MLR, MLP, and random forest** [14238-95]
- 14238 2M **A multivariate outcome prediction method based on random forest regression** [14238-96]
- 14238 2N **Research and application of line-of-sight blocking scheduling strategy based on particle swarm optimization** [14238-97]
- 14238 2O **Intelligent robot autonomous perception and navigation system based on improved YOLOv11 and visual SLAM fusion** [14238-98]
- 14238 2P **Evaluation of anti-interference performance of distributed industrial equipment clusters based on CNN-LSTM fusion model** [14238-99]
- 14238 2Q **Research on AI-driven interaction adaptation and operation behavior prediction for users with disabilities** [14238-100]
- 14238 2R **Simulation study on the long-term impact of AI recommendation algorithms on regional cultural image formation in the ASEAN context: exploring invisible bias and the digital divide** [14238-101]

- 14238 2S **Research on big data analysis and intelligent prediction model of physical fitness and health for maritime crew** [14238-102]
- 14238 2T **Research on high-speed rail express delivery route optimization based on genetic algorithm** [14238-103]
- 14238 2U **Multimodal collaborative data-based ideological and political education analysis system** [14238-104]
- 14238 2V **NLP-driven multimodal narrative digital design industry-academia framework** [14238-106]
- 14238 2W **Design and performance analysis of optimization algorithms based on RLC circuit models** [14238-107]
- 14238 2X **Optimization algorithm design for smart contracts in automated international trade protocols** [14238-108]
- 14238 2Y **Performance comparison of pretrained transformer models fused with a TF-IDF-based classical ensemble for AI-generated text detection** [14238-109]
- 14238 2Z **Optimization of risk control algorithms integrating deep learning with DICT** [14238-110]
- 14238 30 **A predictive model for drug sensitivity in TP53-mutated gastric cancer via fusion of random forest and LSTM** [14238-111]
- 14238 31 **Intelligent review system for large-scale enterprise scientific and technical documents based on NLP** [14238-112]
- 14238 32 **A multimodal big data-based model for fake news propagation mechanism and detection** [14238-113]
- 14238 33 **Optimization strategies for digital music propagation based on deep reinforcement learning** [14238-114]
- 14238 34 **Joint optimization of pedestrian detection and re-identification based on multi-task learning** [14238-115]
- 14238 35 **A monitoring and analysis method for micro-meteorological environment in transmission corridors based on multiscale data fusion** [14238-116]
- 14238 36 **Terminal misconnection detection technology for ice monitoring based on the YOLO model** [14238-117]
- 14238 37 **Research on cross-platform recommendation algorithms under privacy protection conditions** [14238-118]
- 14238 38 **Optimization of real-time object detection with YOLOv10 in cloud-edge collaboration** [14238-119]

- 14238 39 **Privacy-preserving multi-party supply chain risk assessment based on federated learning**  
[14238-120]
- 14238 3A **Study on optimization method for fan layout based on adaptive genetic algorithm**  
[14238-121]
