

PROCEEDINGS OF SPIE

International Conference on Computer Vision and Neural Networks (CVNN 2026)

Hengrong Ju

Yue Liu

Editors

17 - 19 April 2026

Chengdu, China

Organized by

Nanchang University (China)

Sponsored by

Jiangxi Provincial Key Laboratory of Intelligent Systems and Human-Computer Interaction (China)

State Grid Jiangxi Electric Power Co., Ltd. Information and Communication Branch (China)

University of Electronic Science and Technology of China (China)

AEIC—Academic Exchange Information Centre (China)

Published by

SPIE

Volume 14255

Proceedings of SPIE 0277-786X, V. 14255

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Computer Vision and Neural Networks (CVNN 2026)*, edited by Hengrong Ju, Yue Liu, Proc. of SPIE 14255, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

VISUAL DETECTION AND SEGMENTATION

- 14255 02 **Robust blink detection based on temporal large model and dynamic baseline self-learning update** [14255-18]
- 14255 03 **Lightweight insulator defect detection and multidimensional fuzzy risk assessment for imbalanced power-inspection data** [14255-9]
- 14255 04 **A multimodule cooperative improved YOLOv8n algorithm for apple detection in complex orchard environments** [14255-3]
- 14255 05 **Research on rail surface defect detection method based on multimodal fusion** [14255-35]
- 14255 06 **Strawberry pest and disease detection based on the YOLOv11-DL** [14255-27]
- 14255 07 **Video anomaly detection method combining variance attention and few-shot enhancement** [14255-21]
- 14255 08 **Efficient fiber segmentation in composites assisted by deep learning** [14255-19]
- 14255 09 **RMT-YOLO: lightweight building detection in remote sensing images** [14255-26]
- 14255 0A **Application of small-sample augmentation techniques to automatic recognition of welding crack defects in boiler small-diameter tubes** [14255-25]
- 14255 0B **Eld-Net: an edge-aware lightweight network for PCB defect detection** [14255-22]
- 14255 0C **Based on MMD-YOLO algorithm for steel surface defect detection research** [14255-20]
- 14255 0D **Improved DeepLabv3+ for road crack segmentation** [14255-4]
- 14255 0E **Research on ByteTrack multiobject tracking method based on pose feature fusion** [14255-12]

PATTERN RECOGNITION AND 3D VISUAL ANALYSIS

- 14255 0F **A network distribution model of Ca^{2+} blink in cardiac myocytes** [14255-2]

- 14255 OG **A graph overlapping clustering method integrating structure-preserving network embedding and fuzzy C-means** [14255-28]
- 14255 OH **Research on three-dimensional reconstruction technology for fruits based on point clouds** [14255-15]
- 14255 OI **Research on distributed fiber optic intrusion signal recognition method based on CNN and SK attention mechanism** [14255-30]
- 14255 OJ **K-XSimGCL: knowledge-enhanced contrastive learning for robust recommendation** [14255-14]
- 14255 OK **Diffusion rectification for texture-faithful ultrasound to histology virtual biopsy** [14255-1]
- 14255 OL **Anchor-based granular balls with density fusion for spectral clustering** [14255-10]
- 14255 OM **Real-time multimodal gaze interaction on the web: a CNN-based approach with dynamic fusion** [14255-6]
- 14255 ON **Efficient BEV-based 3D detection with vehicle kinematic modeling** [14255-11]
- 14255 OO **DPC-TRSF: a hyperspectral image noise labeling algorithm integrating density-peak clustering and trilateral smoothing filter** [14255-31]
- 14255 OP **Low-rank constrained cross-modal mutual learning for robust RGB-IR fusion in adverse UAV environments** [14255-17]
- 14255 OQ **Mixed reality and surgical robot navigation technology based on 3D facial surface registration** [14255-5]
- 14255 OR **Generation of 2D–3D correspondences for visual localization based on feature matching** [14255-29]
- 14255 OS **Social bot detection with dynamic heterogeneous graph networks** [14255-36]
