

PROCEEDINGS OF SPIE

Third International Conference on Intelligent Transportation and Smart Cities (ICITSC 2026)

**Marc A. Rosen
Lorna Uden**
Editors

**10–12 April 2026
Luoyang, China**

Organized by
International Association of Applied Science and Technology

Published by
SPIE

Volume 14259

Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 14259

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Third International Conference on Intelligent Transportation and Smart Cities (ICITSC 2026)*, edited by Marc A. Rosen, Lorna Uden, Proc. of SPIE 14259, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xi *Conference Committee*

Part One

OPTICAL SENSING AND COMPUTER VISION FOR INTELLIGENT TRANSPORTATION

- 14259 02 **Research on road traffic accident risk profiling and risk prevention countermeasures based on data-driven and hybrid intelligent models** [14259-5]
- 14259 03 **Autonomous driving object detection system based on YOLOv8** [14259-7]
- 14259 04 **AI-enabled vehicle-to-infrastructure communication for smart traffic control: a comprehensive review** [14259-9]
- 14259 05 **Traffic accident prevention via YOLOv8 detection and LSTM prediction** [14259-10]
- 14259 06 **A CNN-based method for elderly fall detection and localization** [14259-11]
- 14259 07 **A ConvLSTM-based method for short-term tourist flow prediction in smart scenic areas** [14259-16]
- 14259 08 **A review of multimodal data fusion techniques in autonomous driving** [14259-27]
- 14259 09 **CBAM-CycleGAN-based automatic driving scenario conversion between sunny and rainy conditions** [14259-35]
- 14259 0A **Lightweighting transformer and attention mechanism improvement for autonomous driving point cloud data** [14259-36]
- 14259 0B **Real-time passenger flow prediction of smart scenic spots based on the fusion of spatio-temporal graph neural network and multisource data** [14259-40]
- 14259 0C **Design of computer vision-based optical sensors in basketball visualization simulation system** [14259-41]
- 14259 0D **DSGNet: a multiscale continuity-aware network for fine crack detection in UAV imagery** [14259-43]
- 14259 0E **Fuzzy C-means-based pattern classification framework for traffic flow big data** [14259-46]
- 14259 0F **Anomaly-enhanced spatio-temporal traffic flow prediction with graph transformer and multiscale temporal convolution** [14259-49]

- 14259 OG **Traffic flow prediction based on optical sensing data using a CEEMDAN-TCN-attention model** [14259-52]
- 14259 OH **Research on driver fatigue recognition model based on improved capsule neural network using electroencephalogram signals** [14259-69]
- 14259 OI **Intelligent traffic signal adaptive control algorithm research based on deep reinforcement learning** [14259-97]
- 14259 OJ **Urban traffic signal configuration optimization via K-means clustering and flow ratio model** [14259-102]
- 14259 OK **Design and implementation of an intelligent urban traffic system based on 5G and IoT technologies** [14259-103]
- 14259 OL **Autonomous driving behaviour decision-making based on multidimensional data fusion and GNNs** [14259-113]
- 14259 OM **Real-time prediction of hard-braking behavior when following: a hybrid SVM-based method** [14259-119]

LIDAR, OPTICAL REMOTE SENSING, AND 3D SPATIAL IMAGING

- 14259 ON **PointNet-based BIM+GIS technology for highway design index safety analysis using 3D point clouds** [14259-21]
- 14259 OO **SAE-YOLO11 for automatic detection of road subsurface distress based on GPR** [14259-34]
- 14259 OP **Research on topology modeling and intelligent monitoring of expressway optical cables based on graph neural networks** [14259-58]
- 14259 OQ **Optical remote sensing driven smart city water environment monitoring with improved genetic algorithm** [14259-60]
- 14259 OR **Research on building complex contour extraction method for smart cities based on improved FPN and BIM-fused optical remote sensing images** [14259-64]
- 14259 OS **Multispectral remote sensing image fusion method based on multimorphology attention mechanism for smart cities** [14259-76]
- 14259 OT **Development of a temperature and humidity profiling Lidar system with case study analysis** [14259-83]
- 14259 OU **Design and implementation of an intelligent urban environmental monitoring system based on optoelectronic information** [14259-96]
- 14259 OV **Construction of a digital display platform for cultural heritage based on optical imaging** [14259-104]

- 14259 0W **A real-time control system for intelligent manufacturing equipment based on edge computing** [14259-107]
- 14259 0X **Implementation of an optical behavior perception and management system based on computer vision** [14259-108]
- 14259 0Y **A decomposition-based linear transformer with optical sensing and graph attention for regional economic activity forecasting** [14259-111]
- 14259 0Z **Optical-APSO-SVM fusion model for intelligent sensing and compressive performance prediction of coal gangue UHPC bridge materials under traffic loads** [14259-115]

OPTICAL NETWORKS AND SECURE COMMUNICATIONS FOR SMART CITIES

- 14259 10 **Information-driven dynamic evacuation modeling for urban road networks** [14259-3]
- 14259 11 **Research on blockchain-based smart ticket encryption and verification** [14259-4]
- 14259 12 **Construction of data security sharing and privacy protection system for smart city edge nodes based on improved federated learning over optical network** [14259-6]
- 14259 13 **Research on the architecture and process design of intelligent civil engineering 3D design system** [14259-8]
- 14259 14 **Design of an attribute-based proxy re-encryption scheme for privacy protection in vehicle-to-everything networks** [14259-25]
- 14259 15 **Applications of IoT in power system video surveillance: an integrated framework based on edge-cloud collaboration and hybrid communication** [14259-30]
- 14259 16 **Delay-Doppler-based V2I channel modeling for high-mobility scenarios** [14259-59]
- 14259 17 **Design and applied research of a secondary development system for substation water supply and drainage on a domestic BIM platform** [14259-61]
- 14259 18 **Research on collaborative dispatching mechanism of intelligent connected vehicles for urban-rural cold chain logistics based on optical sensing and visible light communication** [14259-62]
- 14259 19 **Data-augmented GAN-GRU framework for delay-domain channel power prediction in non-stationary V2I communications** [14259-63]
- 14259 1A **Decision tree methods for network information content simplification and key perception of cyberspace security situation** [14259-72]
- 14259 1B **Edge-enabled PPE compliance monitoring for construction safety via lightweight visual recognition and hybrid multiobject tracking** [14259-74]

- 14259 1C **Multiscale coupling modeling of spatial form-energy consumption relationship to support smart city planning** [14259-80]
- 14259 1D **Channel modeling and multipath robust communication mechanism for 920-925MHz wireless in high-density urban distribution networks** [14259-89]
- 14259 1E **Research on knowledge graph-based digital management systems for farmers' cooperatives** [14259-93]
- 14259 1F **An integrated graph neural network-based enterprise credit risk assessment model for smart cities** [14259-95]
- 14259 1G **Post-quantum cryptography enhanced IP address management framework for secure smart transportation networks** [14259-98]
- 14259 1H **Digital design-driven intelligent additive manufacturing system** [14259-99]
- 14259 1I **Construction of intelligent monitoring and management system for power grid dispatch cloud platform based on heterogeneous cloud computing platform** [14259-116]
- 14259 1J **ABN-DL deep learning model with distributed fiber optic sensing for performance prediction and traffic resilience evaluation of graphite tailings-based HPC sponge roads** [14259-117]
- 14259 1K **System design of a multisource heterogeneous data fusion platform for smart cities** [14259-118]
- 14259 1L **Research on cross-regional traffic violation data sharing and privacy protection based on improved federated learning** [14259-120]
- 14259 1M **A smart-contract-based digital RMB framework for fund control and smart-city supply chains in group enterprises** [14259-121]

Part Two

SMART INFRASTRUCTURE MONITORING AND DIGITAL TWINS

- 14259 1N **Research on a multidimensional evaluation model for the impact of intangible cultural heritage tourism based on improved Bayesian structural equation modeling** [14259-1]
- 14259 1O **A leakage event identification and localization method for buried pipelines based on the spatiotemporal evolution of low-temperature bands** [14259-12]
- 14259 1P **Sensitivity analysis of electric towing vehicle coupling and uncoupling parameters on airport operational efficiency based on cellular automata** [14259-17]
- 14259 1Q **Physics-informed neural networks for solving the highway pavement heat conduction model** [14259-32]
- 14259 1R **Building energy consumption distribution detection and energy-saving optimization system based on thermal infrared imaging** [14259-33]

- 14259 1S **Design and implementation of a smart construction site visual inspection system based on convolutional neural networks** [14259-38]
- 14259 1T **A multiagent reinforcement learning-based approach for construction resource scheduling and cost control in intelligent construction sites** [14259-39]
- 14259 1U **Visualization system for predicting basement leakage risks based on digital twin technology** [14259-47]
- 14259 1V **An intelligent damage identification method for building structures based on multidomain feature fusion and PCA-SVM** [14259-53]
- 14259 1W **Construction of an integrated online monitoring system for geotechnical engineering in geological disaster early warning** [14259-54]
- 14259 1X **Research on temperature and humidity anomaly recognition model for infrared optical images of utility tunnels based on lightweight vision transformer** [14259-66]
- 14259 1Y **Method for classroom behaviour recognition and learning state modelling based on computer vision** [14259-67]
- 14259 1Z **Development of a mobile texture analysis and display system for fiber art in smart city digital culture applications** [14259-70]
- 14259 20 **Detection and treatment methods for special populations based on multimodal medical image fusion technology** [14259-71]
- 14259 21 **LSTM-based intelligent monitoring and early warning for teaching quality in smart classrooms** [14259-75]
- 14259 22 **Intelligent ship speed prediction using layer normalization, CNN, and informer for long-range dependency modeling** [14259-79]
- 14259 23 **Mobile environmental monitoring for smart cities: system design and implementation based on dual-core architecture with optical reflection technology** [14259-81]
- 14259 24 **A study on intelligent optimization methods for urban green space landscape structures based on deep learning** [14259-85]
- 14259 25 **Construction of an intelligent control application system for the maritime loading and unloading operations of new energy vehicles** [14259-86]
- 14259 26 **System dynamics analysis of collaborative governance for shared parking resources in smart cities** [14259-87]
- 14259 27 **Collaborative modeling of educational data in learning cities based on federated learning** [14259-88]
- 14259 28 **Building an automated financial invoice review platform for smart cities based on OCR and rule engine** [14259-90]

- 14259 29 **The impact of the farthest insertion heuristic operator on path planning for multiobjective robots** [14259-91]
- 14259 2A **Hierarchical coordinated control for vehicle lateral stability based on RBF-neural-network sliding mode and model predictive control** [14259-92]
- 14259 2B **Real-time prediction method and system of hospital electricity consumption based on operating condition domain division** [14259-105]
- 14259 2C **Interpretable short-term metro passenger flow prediction based on station similarity graphs and LightGBM** [14259-106]
- 14259 2D **Application research of intelligent robot based on steel cable pulley positioning system in the detection of exterior wall surface defects of existing buildings** [14259-112]
- 14259 2E **A machine vision and near-infrared imaging-based dewaterability assessment method for intelligent monitoring of urban sludge treatment infrastructure** [14259-114]

URBAN DATA INTELLIGENCE AND SMART LOGISTICS

- 14259 2F **Multisource data-driven intelligent evaluation method for flexible regulation of power load in smart cities** [14259-13]
- 14259 2G **Research on multiobjective logistics resource scheduling model based on improved reinforcement learning algorithm** [14259-14]
- 14259 2H **Development and application of suspension system and guidance system test bench for high-speed maglev vehicle** [14259-15]
- 14259 2I **A deep reinforcement learning-based cooperative scheduling approach for traffic and emergency resources in smart city marathon scenarios** [14259-18]
- 14259 2J **Machine learning-augmented MILP for multiechelon logistics network location and allocation optimization** [14259-19]
- 14259 2K **AI-enabled valuation path optimization for enterprise data assets in urban digital transformation: implications for smart cities** [14259-20]
- 14259 2L **Multialgorithm optimization for urban waste sorting and transport routing** [14259-22]
- 14259 2M **Optimization method for logistics order delivery routes integrating XGBoost algorithm** [14259-23]
- 14259 2N **Optimal design of administrative graphic layout through dynamic programming with ant colony optimization** [14259-24]
- 14259 2O **Intelligent disease phenotype recognition based on multimodal biological experimental data for smart healthcare and healthy cities** [14259-26]

- 14259 2P **Anomaly detection algorithm for college students' daily behaviors in smart campus scenarios based on improved DBSCAN** [14259-28]
- 14259 2Q **Exploration of a new architectural design paradigm through the integration of generative AI and Rhino technologies: a case study of residential design** [14259-29]
- 14259 2R **Research on a digital management method for energy consumption based on multiobjective optimization** [14259-31]
- 14259 2S **Adaptive resource reallocation framework for spatial constraint satisfaction with metaheuristic optimization** [14259-37]
- 14259 2T **Intelligent optimization of urban classified waste transportation routes: a multiscenario framework with hybrid differential artificial bee colony and genetic algorithms** [14259-42]
- 14259 2U **Upgrade of smart logistics path planning system: a probabilistic heuristic algorithm for local refinement** [14259-44]
- 14259 2V **Transformer-based nitrate prediction for smart city environmental monitoring** [14259-45]
- 14259 2W **Research on shared bike supply-demand forecasting and regional dispatching strategy based on improved long short-term memory network** [14259-48]
- 14259 2X **Constraint inference and structured modeling methods for energy planning driven by ultra-high-dimensional urban data** [14259-50]
- 14259 2Y **Multiobjective optimization model for nighttime customized bus services under low-carbon and optical-signal constraints with multicity validation** [14259-51]
- 14259 2Z **Hybrid encoding and constraint-handling in genetic algorithms for logistics-oriented bin packing problems** [14259-55]
- 14259 30 **Research on online public appeal recognition model for smart city emergency management** [14259-56]
- 14259 31 **Dynamic evolution and early warning of emerging crime risk spectrum based on an improved variational graph autoencoder integrating multimodal optical data** [14259-57]
- 14259 32 **Research on vehicle-drone collaborative path planning for emergency power supplies based on hybrid genetic algorithm** [14259-65]
- 14259 33 **Research on building a distributed intelligent warehouse and logistics network supported by cloud computing** [14259-68]
- 14259 34 **Big data-driven deep reinforcement learning method for collaborative optimization of public transportation cost and service efficiency** [14259-73]
- 14259 35 **Research on grid installation optimization technology based on simulation** [14259-77]
- 14259 36 **Quantitative analysis of inventory fluctuations and intelligent replenishment model for cross-border e-commerce in smart cities** [14259-78]

- 14259 37 **Analysis of residents' travel behavior based on mobile signaling data** [14259-82]
- 14259 38 **Multidimensional accurate prediction model of urban carbon emissions based on improved LSTM algorithm** [14259-84]
- 14259 39 **Deep learning-based evaluation model for urban street and community spatial quality** [14259-100]
- 14259 3A **A multistage ensemble learning framework for logistics risk identification and prediction** [14259-101]
- 14259 3B **Predicting urban traffic violations based on multisource data fusion** [14259-110]
