

PROCEEDINGS OF SPIE

Eighth International Conference on Intelligent Medicine and Image Processing (IMIP 2026)

Mohd Shafry Mohd Rahim
Editor

24–27 April 2026
Okinawa, Japan

Organized by
University of the Ryukyus (Japan)

Sponsored by
University of the Ryukyus (Japan)
Ritsumeikan University (Japan)
Tiangong University (China)

Published by
SPIE

Volume 14267

Proceedings of SPIE 0277-786X, V. 14267

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Eighth International Conference on Intelligent Medicine and Image Processing (IMIP 2026)*, edited by Mohd Shafry Mohd Rahim, Proc. of SPIE 14267, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

MEDICAL IMAGE COMPUTING: RECONSTRUCTION, SEGMENTATION, AND FEATURE MINING

- 14267 02 **CT image segmentation utilizing image reconstruction on hexagonal lattices and statistical region merging with connectivity twelve** [14267-1]
- 14267 03 **Developing SODIC-YOLO to detect bacteria in Gram stained smears images** [14267-7]
- 14267 04 **Generation of conformational energy landscape from lactoferrin cryo-EM images with mitigated preferred orientations by cryoTWIN** [14267-11]
- 14267 05 **Robust medical image analysis via topological invariance: a quantitative evaluation of filtrations and descriptors** [14267-5]
- 14267 06 **On the effect of colors in classifying Gram stained smears images** [14267-8]

DEEP LEARNING FOR BRAIN DISEASE DETECTION AND SEGMENTATION

- 14267 07 **Deep neural networks for brain tumor classification and segmentation in medical imaging** [14267-2]
- 14267 08 **An effective interactive brain cytoarchitectonic parcellation framework using pretrained foundation model** [14267-20]
- 14267 09 **Curating heterogeneous clinical data and transfer learning for intracranial hemorrhage detection in non-contrast CT scans** [14267-4]
- 14267 0A **Robust brain glioma segmentation method based on xLSTM for clinical missing modalities** [14267-13]

INTELLIGENT DIAGNOSIS OF CARDIOVASCULAR AND NEUROLOGICAL DISEASES

- 14267 0B **Machine learning with explainable AI for carotid plaque detection using risk factors and protein biomarkers** [14267-16]
- 14267 0C **CT-MRI based modeling for hierarchical cardiac ultrasound navigation** [14267-3]
- 14267 0D **Early stroke diagnosis through detection of facial palsy and impaired hand motion using MediaPipe software** [14267-14]

- 14267 OE **CABGenie: hyperparameter-optimized 3D deep learning framework for coronary artery segmentation to support coronary artery bypass grafting surgical intervention plan** [14267-18]
- 14267 OF **Modern diagnostic environment: integration of RIS, PACS, VNA, AI, and teleradiology within a secure SaaS-based ecosystem** [14267-9]
- 14267 OG **Explainable digital twin framework for predictive analytics in fetal well-being and global maternal mortality forecasting** [14267-19]
- 14267 OH **Predicting findings suggestive of aspiration pneumonia in Gram stained smears images of sputum** [14267-6]
- 14267 OI **Smart health information system with Hyperledger Besu blockchain technology** [14267-12]
- 14267 OJ **Transformer-based psyche analysis using Big Five personality traits: comparative study of BERT, ALBERT, and RoBERTa across social media and biomedical clinical text** [14267-17]
