# TABLE OF CONTENTS

## VOLUME 1

### FULL PAPERS

|                                                                                                                                                                                             |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| A Multi-Stage Framework with Taxonomy-Guided Reasoning for Occupation Classification Using Large Language Models .....                                                                      | 2   |
| <i>Palakorn Achananuparp, Ee-Peng Lim</i>                                                                                                                                                   |     |
| MedHalu: Hallucinations in Responses to Healthcare Queries by Large Language Models.....                                                                                                    | 31  |
| <i>Vibhor Agarwal, Yiqiao Jin, Mohit Chandra, Munmun De Choudhury, Srijan Kumar, Nishanth Sastry</i>                                                                                        |     |
| AdFL: In-Browser Federated Learning for Online Advertisement.....                                                                                                                           | 45  |
| <i>Ahmad Alemari, Pritam Sen, Cristian Borcea</i>                                                                                                                                           |     |
| The Gray Area: Characterizing Moderator Disagreement on Reddit .....                                                                                                                        | 58  |
| <i>Shayan Alipour, Shruti Phadke, Seyed Shahabeddin Mousavi, Amirhossein Afsharrad, Morteza Zihayat, Mattia Samory</i>                                                                      |     |
| Incongruent Positivity: When Miscalibrated Positivity Undermines Online Supportive Conversations .....                                                                                      | 76  |
| <i>Leen Almajed, Abeer Aldayel</i>                                                                                                                                                          |     |
| Gender Disparities in StackOverflow’s Community-Based Question Answering: A Matter of Quantity Versus Quality.....                                                                          | 93  |
| <i>Maddalena Amendola, Cosimo Rulli, Carlos Castillo, Andrea Passarella, Raffaele Perego</i>                                                                                                |     |
| Characterizing Online Activities Contributing to Suicide Mortality Among Youth .....                                                                                                        | 107 |
| <i>Aparna Ananthasubramaniam, Elyse J. Thulin, Viktoryia Kalesnikava, Silas Falde, Jonathan Kertawidjaja, Lily Johns, Alejandro Rodríguez-Putnam, Emma Spring, Kara Zivin, Briana Mezuk</i> |     |
| WildLLM: Uncovering Hidden Wildlife Trafficking on Social Media with Augmented and Fine-Tuned LLMs .....                                                                                    | 128 |
| <i>Pavan Antala, Guanyi Mou, Kyumin Lee</i>                                                                                                                                                 |     |
| Seeing Like an AI: How LLMs Apply (and Misapply) Wikipedia Neutrality Norms .....                                                                                                           | 146 |
| <i>Joshua Ashkinaze, Ruijia Guan, Laura Kurek, Eytan Adar, Ceren Budak, Eric Gilbert</i>                                                                                                    |     |
| Effects of Mainstream Visibility on Conspiracy Communities: Reddit After Epstein’s ‘Suicide’ .....                                                                                          | 174 |
| <i>Asja Attanasio, Francesco Corso, Gianmarco De Francisci Morales, Francesco Pierri</i>                                                                                                    |     |
| A Multidimensional Computational Analysis of Dehumanization in Incel Discourse .....                                                                                                        | 186 |
| <i>Naomi Baes, Luc Raszewski, Ekaterina Vylomova, Nick Haslam, Christine De Kock</i>                                                                                                        |     |
| Retentive Relevance: Capturing Long-Term User Value in Recommendation Systems .....                                                                                                         | 205 |
| <i>Saeideh Bakhshi, Phuong Mai Nguyen, Robert Schiller, Tiantian Xu, Pawan Kodandapani, Andrew Levine, Cayman Simpson, Qifan Wang</i>                                                       |     |
| The Effect of Education in Prompt Engineering: Evidence from Journalists .....                                                                                                              | 218 |
| <i>Amirsiavosh Bashardoust, Yuanjun Feng, Dominique Geissler, Stefan Feuerriegel, Yash Raj Shrestha</i>                                                                                     |     |

|                                                                                                                                                                                     |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Why Conspiracy Theory Communities Endure: The Interplay of Feedback, Habits, and Community Context .....                                                                            | 235 |
| <i>Veronika Batzdorfer, Mattia Samory, Sven Banisch</i>                                                                                                                             |     |
| POLAR: A Per-User Association Test in Embedding Space .....                                                                                                                         | 250 |
| <i>Pedro Bento, Arthur Buzelin, Arthur Chagas, Yan Aquino, Victoria Estanislau, Samira Malaquias, Pedro Robles Dutenhefner, Gisele L. Pappa, Virgilio Almeida, Wagner Meira Jr.</i> |     |
| Tied in on TikTok: Tie Strength and Emotional Dynamics in Algorithmic Communities .....                                                                                             | 262 |
| <i>Charles Bickham, Minh Duc Chu, Arianna Yuan, Valerie Lookingbill, Ehsan Mohammadi, Stuart Murray, Kristina Lerman, Emilio Ferrara</i>                                            |     |
| SpectrumNet: Detecting LGBTQ+ Cyberbullying with Dynamic Context-Aware Attention.....                                                                                               | 276 |
| <i>Arslan Bisharat, Manuel Sandoval, Muftaba Nazari, Deborah L. Hall, Mohammed Abuhamad, Yasin N. Silva</i>                                                                         |     |
| From Attention to Dialogue: Does Audience Engagement Reinforce Constructive Cross-Party Communication? .....                                                                        | 291 |
| <i>Ahana Biswas, Yu-Ru Lin</i>                                                                                                                                                      |     |
| Self-Moderation in the Decentralized Era: Decoding Blocking Behavior on Bluesky.....                                                                                                | 315 |
| <i>Carlo Bono, Chang Liu, Giuseppe Russo, Francesco Pierri</i>                                                                                                                      |     |
| Triangulating Temporal Dynamics in Multilingual Swiss Online News .....                                                                                                             | 330 |
| <i>Victor Bros, Evan Dufraisse, Adrian Popescu, Daniel Gatica-Perez</i>                                                                                                             |     |
| Politics of Questions in News: A Mixed-Methods Study of Interrogative Stances as Markers of Voice and Power .....                                                                   | 350 |
| <i>Victor Bros, Matilde Barbini, Patrick Gerard, Daniel Gatica-Perez</i>                                                                                                            |     |
| Posts of Peril: Detecting Information About Hazards in Text .....                                                                                                                   | 370 |
| <i>Keith Burghardt, Daniel M. T. Fessler, Chyna Tang, Anne Pisor, Kristina Lerman</i>                                                                                               |     |
| Examining Algorithmic Curation on Social Media: An Empirical Audit of Reddit's R/Popular Feed .....                                                                                 | 391 |
| <i>Jackie Chan, Fred Choi, Koustuv Saha, Eshwar Chandrasekharan</i>                                                                                                                 |     |
| Examining the Role of YouTube Production and Consumption Dynamics on the Formation of Extreme Ideologies .....                                                                      | 407 |
| <i>Sarmad Chandio, Rishab Nithyanand</i>                                                                                                                                            |     |
| Flattening Fantasies: Analyzing Stereotypes in Pornographic Discourse.....                                                                                                          | 421 |
| <i>Sarmad Chandio, Osama Khalid, Sharaf Zia, Ethan Kutlu</i>                                                                                                                        |     |
| The Meme is the Message: Generative Memes and AI Visuals in the 2024 USA Presidential Elections .....                                                                               | 435 |
