

TABLE OF CONTENTS

VOLUME 1

Efficient Gradient-Free Linear Reconstruction Scheme for Edge-Based Solvers	1
<i>Hiroaki Nishikawa, Boris Diskin, Yi Liu</i>	
Hex-Dominant Boundary Layer Mesh Adaptation for Accurate Prediction of Surface Heat Flux in Hypersonic Problems.....	21
<i>Zachary Gordon, Cameron Brown, Saurabh Tendulkar, Mikiel Gica, Patrick Keistler, Giovanni Salazar, Rocco Nastasia, Mark Beall, Onkar Sahni</i>	
Preconditioned Parallel-In-Time Direct Inverse Method for Nonlinear Conservation Law Equations	35
<i>Nail K. Yamaleev, Subhash Paudel</i>	
Kinetic Linear Stability Theory Revisited. Part I: The Continuum Limit	44
<i>Yuval Rovinsky, Mor Aharoni, Irmak Taylan Karpuzcu, Anton Burtsev, Vasillios Theofilis, Deborah Levin</i>	
Kinetic Linear Stability Theory Revisited. Part II: The BGK Approximation of the Boltzmann Equation	57
<i>Mor Aharoni, Yuval Rovinsky, Irmak Taylan Karpuzcu, Anton Burtsev, Vasillios Theofilis, Deborah Levin</i>	
Optimized Control of Thermoacoustic Instability Through Active Phase Space Confinement.....	69
<i>Tathagat Sarangi, Yue Weng, Ren R. Ruby, Vishnu R. Unni</i>	
Transient Growth Analysis of 1D Shocks Using Kinetic and Continuum Linear Stability Theory.....	80
<i>Irmak Taylan Karpuzcu, Deborah Levin, Vasillios Theofilis</i>	
Experimental Investigation of Heat Flux on a Three-Dimensional Scramjet Inlet Using Fast-Response TSP.....	88
<i>Kosuke Yoshikawa, Hiroshi Ozawa, Arafat Ahmed, Andreas Gross</i>	
Examination of Nonequilibrium Effects at High Mach Number and Stagnation Enthalpy for Double Cone Model - Part IV	102
<i>Christopher T. Eden, Doyle D. Knight</i>	
Optical Measurements on BOLT and Flat-BOLT in Mach-6 Quiet Flow.....	119
<i>Cassandra J. Butler, Joseph S. Jewell</i>	
Multi-Temperature Non-Equilibrium Modeling in Hypersonic Flows: Assessment of Governing Models and Wall Thermal Boundary Conditions	132
<i>Rahul Kumar, Reetesh Ranjan</i>	
Effect of Thermochemical Nonequilibrium on Species Diffusion for RF Blackout Prediction	151
<i>Alexandra Richet, Vivien Loridan, Thierry Magin, Luc Mieussens</i>	
Simulation of Plasma Effects on the Radar Signature in Hypersonic Flow	176
<i>Domenic D'Ambrosio, Alessio Improta, Andrea Scarabosio, Giuseppe Vecchi</i>	
Theoretical Analysis of Near-Wall Vortex – Jet Dynamics and Instabilities	187
<i>Sergey V. Shkarayev</i>	

Numerical Study of Tollmien-Schlichting Waves and Surface Gaps Interaction	215
<i>Fernando B. Mendes, Marcello Augusto Faraco De Medeiros</i>	
Nonlinear Disturbance Evolution in Boundary Layers Using a Recursive One-Way Navier-Stokes Approach	227
<i>Michael K. Sleeman, Sam Glenn, Matthew T. Lakebrink, Tim Colonius</i>	
Numerical Investigation of Supersonic Turbine Trailing-Edge Flows	246
<i>Hugo Lui, William Wolf</i>	
Influence of Thermochemistry Models in Flowfield Simulations Around Symmetric Mach Reflections at High Enthalpy Flow Conditions	255
<i>Mritunjay Nidharia, Sriram Iyer, Boris S. Leonov, Narendra Singh</i>	
Startup and Shutdown Nozzle Side Loads for Powered Descent of Reusable Launch Vehicles	269
<i>Charles E. Tinney, John Valdez</i>	
Nonlinear Analysis of Reattaching Hypersonic Boundary Layer Transition to Turbulence	284
<i>Anubhav Dwivedi, G S. Sidharth</i>	
Receptivity Analysis of a Planar Wedge Geometry with Shock-Perturbation Interactions	294
<i>Vishal Anantharaman, Omar Kamal, Tim Colonius</i>	
Resolvent Analysis of High-Speed Flow Over Cone-Cylinder-Flare: Effect of Flare Angle	316
<i>Chandan Kumar, Unnikrishnan Sasidharan, Datta V. Gaitonde</i>	
Receptivity and Growth of Unsteady Disturbances in Hypersonic Blunt Forebody Flow	335
<i>G S. Sidharth, Anubhav Dwivedi</i>	
Hypersonic Transition Prediction Using Bi-Orthogonally Decomposed Receptivity Data: Amplitude Method and Data-Driven Models	347
<i>Zihao Zou, Simon He, Xiaolin Zhong</i>	
Forward-Facing Cavity Effects on Supersonic Blunt-Body Wakes	389
<i>Chittrarth Prasad, Tyler Zeringue, Andrew Strawn, Colin Moran, Laura Paquin</i>	
Pressure Gradient Effects in Spatially Developing Supersonic Turbulent Boundary Layers Over Concave and Convex Surfaces	405
<i>Lucas F. Souza, Hugo Lui, William Wolf</i>	
Linear Analysis of High-Speed Turbulent Boundary Layers Over Curved Walls	419
<i>Mitesh M. Thakor, Dhiman Roy, Lian Duan, Datta V. Gaitonde</i>	
Energetic Analysis of Tollmein-Schlichting Wave Suppression Using Phononic Subsurfaces	437
<i>Connor W. Klauss, Mahmoud I. Hussein, Christoph Brehm</i>	
Influence of Pressure Gradient and Wall Catalyticity on the Stability of Reacting Flow	452
<i>Bryan Barraza, Andreas Gross, Qiong Liu</i>	
Linear and Numerical Analysis of Interfacial Instabilities in Vibrated Cylindrical Containers	470
<i>Tianyi Chu, Benjamin A. Wilfong, Timothy Koehler, Ryan M. McMullen, Spencer H. Bryngelson</i>	
Adaptive Gaussian Process Control of Turbulent Transition Via Dynamic Wavelength Plasma Roughness (DWPR) at Mach 6	485
<i>Alec C. Jobbins, Nicholas Hawley, Eric H. Matlis, Thomas C. Corke</i>	

Computational Modeling of Acoustic Disturbances and Boundary Layer Transition in the NASA Langley Mach 6 Tunnel.....	506
<i>Joseph M. Signorelli, Blaine Vollmer, Daniel Bodony</i>	
A Numerical Investigation of Droplet Aerobreakup at High Mach Numbers with and Without Interface Sharpening.....	526
<i>Fouad Ayoub, Amr Ragheb, Manuel Viqueira-Moreira, Suryansh Prakhar, William Van Noordt, Jett D. Langhorn, Nicholas Parziale, Christoph Brehm</i>	
Exploration of Supersonic Turbulent Boundary Layers Over Periodic Curvature	545
<i>Scott J. Peltier, Christopher Clifford, Autumn Garner, David N. Ramsey</i>	
Numerical Modeling of High Speed Liquid Droplet Impingement.....	560
<i>Amr F. Ragheb, Fouad Ayoub, Manuel Viqueira-Moreira, Christoph Brehm</i>	
Characterization of a Mach 3 Turbulent Boundary Layer Over a Compliant Panel Using DIC and PIV	577
<i>Scott J. Peltier, Christopher Clifford, Jordan Thayer, Ricardo A. Perez, Garrett Jones</i>	
Dynamics of Drop Deformation and Breakup Under High-Speed Shock-Wave Interaction.....	596
<i>Ashwani K. Pal, Mark Sussman, Kourosh Shoele</i>	
Effects of Interface Regularization Models on Shock-Droplet Interactions.....	607
<i>William J. White, Eric Johnsen</i>	
Interference-Induced Shock Formation Between Two Cylinders at Various Spacings in a Subsonic Viscous Free-Stream.....	627
<i>Ahmet F. Kula, Ryan Nguyen, Denis Aslangil</i>	
Reynolds-Averaged Navier-Stokes Simulations of a Hypersonic Turbulent Flow Over a Wavy Surface.....	642
<i>Jaideep Ray, Matthew Barone, Cory Stack, Hannah Stroud</i>	
An Experimental Investigation of an Adverse Pressure Gradient Turbulent Boundary Layer Over D-Type Roughness	663
<i>Catello Meglio, Ziqi Chen, Bihai Sun, Callum Atkinson, Carlo S. Greco, Julio Soria</i>	
Investigation of Spatial Superresolution Methods for Turbulent Fields Using Uniform Isotropic Turbulence Data and Dictionary Learning	671
<i>Aoi Ban, Takayuki Nagata, Taku Nonomura</i>	
Deep-Learning-Driven Optimization of Airfoil Morphing: Toward Three-Dimensional Flow Validation	679
<i>Omid Nazempour, Saber Alizadeh, Yildirim B. Suzen</i>	

VOLUME 2

A Sample-Efficient and Failure-Aware Surrogate-Assisted Workflow for Thick-Airfoil Slat Optimization.....	699
<i>Irtiza M. Khan, Sean Hebert, Finley Corbett, Andrew Gerber, Juan A. Carretero, Tiger Jeans</i>	
A Hybrid Physics–Machine-Learning Framework for Enhancing Coarse-Grid Spectral Element Simulations for Large-Scale Computing	722
<i>Junoh Jung, Emil Constantinescu, Riccardo Balin, Bethany Lusch</i>	

Airfoil Shape Optimization for Extremely Gusty Environments Using Deep Learning	733
<i>Barbara Lopez-Doriga, Kunihiko Taira</i>	
Development of a Digital Inline Holography Technique to Characterize 3D Shapes of Rising Air Bubbles.....	747
<i>Jincheng Wang, Md Shbbir Ahamed Shohan, Hui Hu</i>	
Film-To-Rivulet Transition on a NACA0012 Under High Aerodynamic Shear: Area-Resolved LED-Induced Fluorescence Analysis	754
<i>Hani Mina, Virginel Bodoc, Baptiste Déjean, Jeanette Hussong</i>	
Influence of Adverse Pressure Gradients on Coherent Structures Driving Extreme Backflows in Turbulent Boundary Layers.....	771
<i>Leandro J. Silva, William Wolf</i>	
Characterization of Turbulent Boundary Layers Under State-To-State Accelerating and Decelerating Flows.....	780
<i>Aaron H. Maschhoff, Tomek Jaroslowski, Beverley J. McKeon</i>	
Fractal Inspired Passive Control Strategies for Transonic and Supersonic Flows Over Cavities.....	798
<i>Mitchell Pegoda, Adrian Sescu, Edward Luke, Ryan Schmit, Rachelle L. Speth</i>	
A Grid-Adaptation Methodology for Wall-Modeled LES of Non-Equilibrium Pressure-Gradient Driven Flows	817
<i>Rahul Agrawal, Christopher Ivey, David Philips, Sanjeeb T. Bose</i>	
Using Streamwise and Spanwise Shear Stress Components in Wall-Sensing Drag Reduction Control of Turbulent Channel Flow.....	830
<i>Aryan Prathamesh Kalelkar, Anushka Subedi, Yulia T. Peet</i>	
GPU-Accelerated Simulation of Flow Over Wing Section with Active Flow Control.....	842
<i>Oscar E. Mendoza Ruiz, Luis Javier Trujillo Corona, David A. Espinoza Gutierrez, Fangjun Shu, Andreas Gross, Qiong Liu</i>	
Compressibility Effects on Near-Stall Flow Separation Over NACA 0012 Airfoil.....	877
<i>Nitin Singh, Unnikrishnan Sasidharan</i>	
Local Solver-Compatible Closure Learning for a Laminar Viscous–Inviscid Integral Boundary-Layer Solver	890
<i>Saumya Mehta, Kiran Ramesh</i>	
Numerical Investigation of the Shock Buffet Phenomenon for the ONERA OAT15A Airfoil Using Wall-Modeled Large Eddy Simulations	905
<i>Yannik Feldner, Moritz Adam, Andrea Beck</i>	
Benchmarking of Finite Element and Finite Volume Solvers for Nonequilibrium Turbulent Flow at Mach 11	928
<i>Connor W. Morency, Nicholas S. Campbell, Iain D. Boyd, Kenneth E. Jansen</i>	
High-Fidelity Simulation of Turbulent Transition on a Hypersonic Fin Cone	952
<i>Austin C. Thombs, Bryan J. Morreale, Kyle Grosse, Rodney Bowersox</i>	
Validation of the Flow Solver CODA for Viscous and Inviscid Supersonic Flows.....	969
<i>Martin Konopka, Chiara Amato</i>	

Compressibility Effects on Dynamic Stall for Pitching NACA0012 Airfoil at Low Reynolds Number.....	989
<i>Kevin Y. Lopez Lopez, Sérgio Túlio S. Haramura Bastos, Md Abrar Hoque, Andreas Gross</i>	
Wall-Resolved LES and Wind Tunnel Experiment of Flow Over NACA 4-Digit Airfoils at Re=10,000	1008
<i>Yuri Sato, Takayuki Nagata, Tentaro Uchida, Taku Nonomura</i>	
Effects of Pitching Parameters on the Unsteady Aerodynamics of a NACA 0012 at Low Reynolds Number.....	1019
<i>Gabriel Yiting Lim, Haruka Kurahashi, Masaki Okawa, Tsubasa Ikami, Hiroki Nagai</i>	
Avian Gust Response Studies for Future Flight Concepts.....	1040
<i>Charles A. Proe, Lydia France, Aron Finnemore, Morgan Lobb, Jan Modrzynski, Emily Shepard, Alper Celik</i>	
Experimental Study of Dynamic Stall of Porous Avian-Inspired Airfoils	1051
<i>Francisco A. Jackson, John Hrynuik, Christina Harvey</i>	
Numerical Model Validation of Turbulent Airspace in Urban Environments for UAM Operation.....	1068
<i>Shreya Sen, Linda K. Kliment, Nidhi Sathyanarayana</i>	
Reynolds-Averaged Navier-Stokes Modeling of Compressible Turbulent Flow on Corrugated Surfaces	1087
<i>Bhavith S. Boda, Sidharth Gs</i>	
Assessment of Shear Stress Transport Turbulence Model Variants in Hypersonic Separated Flows	1103
<i>Sarah M. Kinney, Iain D. Boyd, John A. Evans</i>	
The Development of a Two-Scale RANS Turbulence Model and Its Assessment on Airfoils Under High Free-Stream Turbulence	1118
<i>Stefan Coroama, Jaime Vaquero, Nicolas Renard, François Chedevergne</i>	
Investigating the Use of a Gliding Arc for the Control of the Shock-Wave/Boundary Layer Interaction.....	1133
<i>Jacob M. Caldwell, Thomas C. Corke</i>	
Active Flow Control of Blade Section in Dynamic Stall.....	1148
<i>Sérvio Túlio S. Haramura Bastos, Andreas Gross</i>	
Effects of Tip Wear on Drag Reduction Performance of Sharp Single Bevel Riblet.....	1166
<i>Kento Kaneko, Mitsuru Kurita, Hiroyuki Abe, Monami Sasamori, Seigo Koga, Fumitake Kuroda</i>	
Three-Dimensional Visualization of Supersonic Jet Shear Layers Excitation Using Localized Arc Filament Plasma Actuators	1178
<i>Shunji Matsuo, Masahito Akamine, Susumu Teramoto, Goshi Ichikawa, Koji Okamoto, Mason G. Mitchell, Noah Hiler, Karli Katterle, Mo Samimy</i>	
Development and Control of Görtler Vortices in the SD-2 Serpentine Diffuser.....	1190
<i>Akhil Nekkanti, Rahul Agrawal, Sanjeeb T. Bose, Parviz Moin</i>	
Effect of Reaction Surface Geometry on Control Authority of Asymmetric Plasma Actuation Over Subsonic Axisymmetric Jet Aerodynamics	1204
<i>Zain A. Hamid, Alex Barnhouse, Jinit Patel, Nathan J. Webb</i>	

Experimental Investigation of Fin-Junction Flow Unsteadiness in Mach 5 Laminar and Turbulent Configurations	1216
<i>Andy T. Hoang, Leonardo Saenz, Marco A. Gomez Fierro, Colin Ross, Andreas Gross, Fangjun Shu</i>	
Global Stability Analysis of ROTEX-T Cone-Flare Laminar Separation Bubble at Mach 6	1253
<i>Juan C. Assis, Rômulo B. Freitas, Leonardo S. Alves</i>	
Parametric Study of 3-D Turbulent Shock-Wave/Boundary Layer Interactions on an Axisymmetric Cone	1266
<i>Zihao Zou, Sebastian Quiroz, Simon He, Hardeo M. Chin, Michael C. Adler</i>	
Effect of Angle of Attack on the Shockwave-Boundary Layer Interaction Over an Axisymmetric Body	1283
<i>Anirudh Lakshmi Narasimha Prasad, Unnikrishnan Sasidharan</i>	
Effects of Rectangular Duct Aspect Ratio on Shock Train Behavior	1306
<i>Jack R. Sullivan, Datta V. Gaitonde</i>	
Resolvent Analysis of Shock-Boundary Layer Interactions Over Supersonic Turbines.....	1329
<i>Gabriel Y. Hamada, William Wolf, Carlos Junqueira-Junior, Jean-Christophe Robinet</i>	
Simulation of Flapped CoFlow Jet Airfoil with Integrated Micro-Compressor Actuator at VTOL Hover Enabled by Deflected Slipstream.....	1341
<i>Feihao Ding, Yan Ren, Gecheng Zha</i>	
Investigation of Switched Vortex Valves for Continuous Modulation of Hydrogen Fuel Flows in Jet Engines	1366
<i>Maximilian P. Cloud, Brian Tang, Chris Nicholls, Marko Bacic</i>	

VOLUME 3

Effect of Inflow Confinement on a Finite Wing with Partial-Span Coandă Actuation.....	1381
<i>Xiaoheng S. Yan, Matthew McCrink, Jeffrey Bons</i>	
Flow Mechanisms Governing Oscillation in a Sonic Fluidic Oscillator	1410
<i>Chris Nicholls, Michael R. Fenelon, Yang Zhang, Louis N. Cattafesta</i>	
Large Eddy Simulation of Flapped Coflow Jet Airfoil at Low Reynolds Numbers	1442
<i>Jaehyoung Jeon, Gecheng Zha</i>	
Investigation of the Effect of Probe Length on Turbulent Boundary Layer Measurements Using Scale Resolving Simulations	1464
<i>James R. Debonis, Khairul Q. Zaman, Nicholas J. Georgiadis</i>	
LES of a Commercial Aircraft Wing in Transonic Flow	1480
<i>Thomas Lürkens, Matthias H. Meinke, Dominik J. Krug, Wolfgang Schroeder</i>	
Comparison of Turbulent Mach 2.3 Shockwave Boundary Layer Interactions with 20 and 30 Degrees Sweep	1492
<i>Nicklaus J. Boydston, Andreas Gross</i>	
Experimental Analysis of Boundary Layer State and Shock Strength in Transitional Shockwave-Boundary Layer Interactions on a Hollow-Cylinder-Flare Model at $M_\infty = 7$	1511
<i>Sophia Edwards, Nicholas Webber, Cary D. Smith, Mark Gragston</i>	

Assessing the Impact of Impinging Shock Sweep on the Aeroelastic Behavior of Thermally Buckled Panels	1533
<i>Kirk R. Brouwer, Zachary B. Riley, Ricardo A. Perez, Timothy J. Beberniss, S M. Spottswood</i>	
Comparison of Modal Discontinuous Galerkin and Nodal DGSEM Schemes for Shock-Vortex Interaction Problems.....	1556
<i>Jean-Baptiste Chapelier, Thomas Marchal</i>	
A Third-Derivative-Free Fourth-Order Accurate Navier-Stokes Scheme for Arbitrary Tetrahedral Grids.....	1570
<i>Hiroaki Nishikawa</i>	
A New Diffusion Scheme in High-Order Flux Reconstruction Framework: Single- And Symmetric-Reconstruction (SSR) Diffusion Scheme	1591
<i>Issei Homma, Hiroyuki Asada, Soshi Kawai</i>	
DSMC Study of Hypersonic Boundary-Layer Unsteadiness Using Data-Driven Analysis.....	1599
<i>Mert Senkardesler, Irmak Taylan Karpuzcu, Deborah Levin, Vasillios Theofilis</i>	
On the Scaling of Particulate-Seeded Second-Mode Disturbances in Hypersonic Boundary Layers	1610
<i>Mert Senkardesler, Sean D. Dungan, Irmak Taylan Karpuzcu, Deborah Levin, Christoph Brehm</i>	
Numerical Investigation of the Hypersonic Boundary Layer Transition Over a Blunt Cone Using High-Order Discontinuous Galerkin Methods and Stability Theories.....	1625
<i>Antoine Ghyyoot, Vincenzo Romano, Alberto Testa, Gianmario Perrucci, Pierre Schrooyen, David Henneaux, Koen Hillewaert, Olivier Chazot, Thierry Magin</i>	
Solver and Modeling Sensitivity Analysis of a Four-Engine Rocket Launch Flame Deflector.....	1640
<i>Ugur C. Erol, Ata O. Ünsal</i>	
BDF Dual Time-Stepping Positivity-Preserving Entropy Stable Spectral Collocation Schemes for 3-D Navier-Stokes Equations	1659
<i>Nail K. Yamaleev, Mohammed Sayyari</i>	
Surface Interpolation Methods for Loosely Coupled Aero-Thermal Problems	1667
<i>Jared Crean, Tyler Voskuilen</i>	
GPU-Accelerated Simulations of Moving Boundary Problems and Fluid-Structure Interaction at Extreme Scales	1688
<i>Sushrut Kumar, Joshua Romero, Jung-Hee Seo, Massimiliano Fatica, Rajat Mittal</i>	
High-Fidelity Simulations of Ground Effect Aerodynamics and Water Wave Interactions.....	1698
<i>Avery J. Schemmel, Cody Shelton, Jeffrey B. Allen, Nathan Prewitt, Justin Foster</i>	
Data Driven Turbulence Model Correction in Industrial Flows Based on Detached Eddy Simulations.....	1721
<i>Guillaume Laruelle, Thibault Perret, Flavien Billard, Frederic Chalot, Michel Mallet, François Chedeveigne</i>	
Semi-A Priori Evaluation of Backscatter-Admitting Machine Learning Sub-Grid Scale Models in WRF Hurricane Simulations	1738
<i>Md Badrul Hasan, Meilin Yu, Tim Oates</i>	
The Engineering Turbulence Problem and a Data-Driven Solution	1756
<i>Jiaqi Li, Robert F. Kunz, George Huang, Xiang I. Yang</i>	

Uncertainty and Error Quantification in General-Purpose Data-Driven Wall Model for Low-Speed Flows	1767
<i>Imran Hayat, Yuenong Ling, Konrad Goc, Adrian Lozano-Duran</i>	
Subgrid Stress Modeling for Complex Geometry Using a Graph Attention Neural Network.....	1782
<i>Andy Wu, Sanjiva K. Lele</i>	
Phase-Locked Hot-Wire Measurements of Marine Propeller Wake Evolution in a Compressed-Air Wind Tunnel	1808
<i>Yean Han, Mark A. Miller</i>	
Field Inversion–Enhanced Simulation of Tornado-Like Vortices	1818
<i>Hannah Blumhoefer, Anupam Sharma</i>	
Wall-Modeled Large-Eddy Simulations of High-Speed Flow Over the CUBRC Cone-Flare.....	1829
<i>Rahul Agrawal, David Philips, Christopher Ivey, Sanjeeb T. Bose</i>	
Machine-Learning-Based Wall-Modeled Large-Eddy Simulation of Entry, Descent, and Landing Vehicles with Surface Roughness.....	1842
<i>Rong Ma, Adrian Lozano-Duran, Clark Pederson</i>	
Data-Driven Wave Speed Estimation for Flux Difference Splitting Methods	1856
<i>Abhishek Barman, Anupam Sharma</i>	
Local-State Super-Resolution for Vorticity Fields in Remeshed Vortex Methods	1878
<i>Shengyinghao Chen, Kiran Ramesh</i>	
Comparing Point Cloud Networks for Aerodynamic Prediction of a Rotorcraft Fuselage.....	1897
<i>Jonghyun Shin, Yu-Eop Kang, Sanga Lee, Kangkuk You, Shinkyu Jeong, Seawook Lee, Jeonggyu Bak</i>	
Evaluation of Deep Learning Models for Hypersonic Heating Predictions	1912
<i>Joseph Douglas, Shanti Bhushan, Alexander S. Way</i>	
Numerical Simulation of NO _x Emissions in a Lean Premixed Hydrogen Combustor Using Different Levels of Fidelity	1926
<i>Lorenzo Folcarelli, Sebastiano G. Marci, Vincenzo Madonia, Andrea Ferrero, Filippo Masseni, Dario Pastrone</i>	
A Synthetic Sensitivity and Parameter Analysis for Transient Multi Hole Probe Measurements	1961
<i>Samuel Eilers, Dragan Kozulovic, Martin Bitter</i>	
Programmable Synthesis of Unsteady Turbulent and Shear Flows Using a Modular Fan-Array Wind Wall.....	1975
<i>Carson Brashear, Manish Timsina, Agastya Balantrapu</i>	
Validation of Film-Based Pressure-Sensitive Paint–Derived Forces Against Force Balance Measurements on an Elliptic Cone.....	1989
<i>Bhanu Pratap Akherya, Alexandre Berger</i>	
Evaluation of Unsteady Loads on an Elliptical Cone Through Integration of Global Pressure Data	2006
<i>Luke Aagaard, Alexandre R. Berger, Autumn Garner, Scott J. Peltier</i>	
Use of Machine Learning and Sparse Data Estimation Technique to Reconstruct Flow Around a NACA0012 Airfoil	2029
<i>Onitiana Razafimino, Vilas J. Shinde</i>	

Autoencoder-Based Feedback Linearising Control of Vortex Shedding	2042
<i>Jack Proudfoot, Marko Bacic, Chris Nicholls</i>	

Autoencoder-Based Oscillator Extraction from Multifrequency Flows	2058
<i>Youngjae Kim, Koichiro Yawata, Hiroya Nakao, Kunihiro Taira</i>
