# TABLE OF CONTENTS

|                                                                                                                         |    |
|-------------------------------------------------------------------------------------------------------------------------|----|
| Validation of a New Bench to Measure Impedance for NFC and NFC Wireless Charging Applications .....                     | 1  |
| <i>Lilian Rolle, Thibaut Deleruyelle, Alain Loussert, Jérémy Quignon, Zhen Lin</i>                                      |    |
| High Quality Factor Microwave Sensor Using Interdigital Capacitor for Permittivity Measurement .....                    | 3  |
| <i>Isau de Sousa Silva, Ruann V. A. Lira, Isaac B. T. Da Silva, Antonio Luiz P. S. Campos</i>                           |    |
| Relative Humidity Measurement in 14 cm Thick Concrete Blocks .....                                                      | 5  |
| <i>Juan Rafael Filgueira Guerra, Humberto Dionísio de Andrade, Antonio Luiz P. S. Campos</i>                            |    |
| A Parasitically Coupled Antenna Array Design for GNSS Applications in CubeSats .....                                    | 7  |
| <i>Ezequiel Marranghelli, Ramón López La Valle, Francisco Núñez</i>                                                     |    |
| Design and Characterization of a GCPW-Based Applicator for Bacterial Electroporation .....                              | 9  |
| <i>S. Huertas, G. Talero, J. Sierra, N. Rodríguez, E. Quintero, S. Ávila, N. Mora</i>                                   |    |
| On the Mapping of the Compact Boom Length for the Log-Periodic Dipole Array Antenna in the Digital TV Band .....        | 11 |
| <i>Carlos Alberto Ramirez Behaine</i>                                                                                   |    |
| Synthesis of Dual-Band Convolutional FSS Using Radial Basis Function Neural Networks .....                              | 13 |
| <i>Francisco Carlos G. da Silva Segundo, Alfredo Gomes Neto, Antonio Luiz P. S. Campos</i>                              |    |
| Polyaniline/Li-Cu Substituted Cobalt Ferrite Composites as Electromagnetic Absorbers in L- and S-Microwave Bands .....  | 15 |
| <i>Carlos A. Herme, Walter Gustavo Fano, Juan C. Apesteguy, Paula G. Bercoff, Silvia E. Jacobo</i>                      |    |
| Modeling Neuronal Responses to E-Fields .....                                                                           | 17 |
| <i>Vanine Sabino, Luis Gomez</i>                                                                                        |    |
| Empirical Evaluation of PySR, DEAP, and gplearn Algorithms for Symbolic Regression-Based Propagation Modeling .....     | 19 |
| <i>Gustavo F. Rodrigues, Rayner A. S. e Silva, Glaucio L. Ramos, Luiz A. R. da Silva Mello Rafael F. S. Caldeirinha</i> |    |
| Method of Moments for the Accurate Simulation of Fully Metallic Curved Polarizers for Space Applications .....          | 21 |
| <i>Agnese Mazzinghi, José Rico-Fernández, Francisco Mesa, Oscar Quevedo-Teruel, Angelo Freni</i>                        |    |
| Experimental Methodology for Evaluating Electroporation Effectiveness in Bacterial Control .....                        | 23 |
| <i>N. Rodríguez, G. Talero, J. Sierra, S. Huertas, E. Quintero, S. Avila, N. Mora</i>                                   |    |
| Low-Pass Three Layer Frequency Selective Surface .....                                                                  | 25 |
| <i>Francisco Carlos G. da Silva Segundo, Alfredo Gomes Neto, Antonio Luiz P. S. Campos</i>                              |    |
| Recycled Ceramic Waste Dielectric Resonator Antenna for Broadband Applications .....                                    | 27 |
| <i>Rafael Alex Vieira Vale, Isaac B. T. da Silva, Antônio Luiz P. de S. Campos</i>                                      |    |
| Ultra-Wideband High Gain Aperture Coupled Metasurface Antenna for 5G Communications .....                               | 29 |
| <i>Alexis Castro Alvarez, Dibin Mary George</i>                                                                         |    |
| Fss Based SHM System for Measurement of Relative Humidity on Hollow Concrete Blocks .....                               | 31 |
| <i>Lincoln Alexandre Paz Silva, Isaac B. T. da Silva, Antônio Luiz P. de S. Campos</i>                                  |    |

|                                                                                                                                                                                           |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| An All-Band Multi-Constellation GNSS Antenna with Metal Housing .....                                                                                                                     | 33 |
| <i>Ramón López La Valle, Ezequiel Marranghelli</i>                                                                                                                                        |    |
| A GPU-DGTD Algorithm with Drude Dispersive Modeling for Photonic Applications .....                                                                                                       | 35 |
| <i>Marlon J. Lizarazo, Diego Parada Roza, Diego Tami López, Dinael Guevara Ibarra</i><br><i>Cássio Gonçalves do Rego, Elson José da Silva</i>                                             |    |
| Experimental Path Loss Characterization of a 5G mmWave Link at 26 GHz in Bogotá D.C .....                                                                                                 | 37 |
| <i>Javier Enrique Arévalo Peña, Javier Leonardo Araque Quijano</i>                                                                                                                        |    |
| A Wireless Power Transfer System with Split-Ring Loops Resonator for Implantable Medical Devices Applications .....                                                                       | 39 |
| <i>Julien Gallais, Bruno Matias de Sousa, Jose Garibaldi Duarte Júnior, Valdemir Praxedes da Silva</i>                                                                                    |    |
| Dual Circular-Polarized Axial-Mode Helix Array .....                                                                                                                                      | 41 |
| <i>Christopher G. Hynes, Rodney G. Vaughan</i>                                                                                                                                            |    |
| A New MTK-LA Configuration with Increased Bandwidth .....                                                                                                                                 | 43 |
| <i>Marcus Vinicius Rocha Cohen, Gabriel Oliveira do Nascimento, Etony Monteiro de Araujo</i><br><i>Priscilla Kadja Pontes de M. Carneiro, Jefferson Costa e Silva, Alfredo Gomes Neto</i> |    |
| Firat Outer Model Fractal Evaluation on Microstrip Patch Antennas .....                                                                                                                   | 45 |
| <i>Mirelli S. da Silva, Leonardo O. de Sousa, Francisco de A. Brito Filho, Samanta M. de Holanda</i><br><i>Isaac B. T. da Silva</i>                                                       |    |
| Interferometry Between Rotated Antenna Arrays .....                                                                                                                                       | 47 |
| <i>Paola Di Ninni, Tobia D. Carozzi, Stefan J. Wijnholds</i>                                                                                                                              |    |
| Machine Learning Classification for Contaminants in Urban Water Using a Planar Microwave Sensor .....                                                                                     | 49 |
| <i>Bruno Matias de Sousa, Valdemir Praxedes da Silva Neto</i>                                                                                                                             |    |
| Chirality and Handedness of the SKALA4.1 Antenna and Intra-Station Mitigation .....                                                                                                       | 51 |
| <i>Tobia D. Carozzi, Paola Di Ninni, Mirko Bercigli</i>                                                                                                                                   |    |
| Optically Transparent Metasurfaces for Beamsplitting and OAM Mode Generation .....                                                                                                        | 53 |
| <i>Muhammad Saleem, Aakash Bansal, William Whittow, William O. F. Carvalho</i>                                                                                                            |    |
| Zero-Crossing Path Difference of Arrival Method for Enhanced AoA Retrieval .....                                                                                                          | 55 |
| <i>Franz M. E. Camilo, Andreia R. Lopes, Mauricio Rodriguez, Nuno Leonor, Telmo Fernandes</i><br><i>Glaucio L. Ramos, Rafael F. S. Caldeirinha</i>                                        |    |
| A Wideband Dielectric Slab Antenna Based on Microstrip-Franklin Excitation for Millimeter Waves .....                                                                                     | 57 |
| <i>Evandro C. Vilas Boas, Felipe A. P. Figueiredo</i>                                                                                                                                     |    |
| Design and Comparison of New Bio-Inspired Antenna-Sensors for Dielectric Characterization .....                                                                                           | 59 |
| <i>Elvis Ferreira Soares, José Garibaldi Duarte Júnior, Valdemir Praxedes da Silva Neto</i>                                                                                               |    |
| PIN-Diode-Based Reconfigurable Metasurface for Dynamic Microwave Beam Control .....                                                                                                       | 61 |
| <i>Igor Nogueira Olivio, Muhammad Saleem, Rafael A. Penchel, William O. F. Carvalho</i>                                                                                                   |    |
| A Prototype of a Patch Antenna Array for Ground-to-Ground Wireless Power Transfer .....                                                                                                   | 63 |
| <i>Luís Guilherme da Silva Costa, Cláudia de Magalhães Santos Fonseca</i><br><i>Chryslène Marilande Merveilles Adetonah, Benigno Rodríguez Díaz, Moisés Vidal Ribeiro</i>                 |    |

|                                                                                                                                                                               |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| The Impact of Substrate Parameter Accuracy on the Patch Antenna Performance .....                                                                                             | 65 |
| <i>Cláudia de M. S. Fonseca, Luís Guilherme S. Costa, Chryslène M. M. Adetonah, Benigno R. Díaz</i><br><i>Moisés V. Ribeiro, Marco Aurélio O. Schroeder, Glaucio L. Ramos</i> |    |
| Effect of a Liquid Rectangular Prism Dielectric Resonator on the Patch Antenna Performance .....                                                                              | 67 |
