# TABLE OF CONTENTS

|                                                                                                                                           |    |
|-------------------------------------------------------------------------------------------------------------------------------------------|----|
| A Modern Measurement System for Characterizing Troposcatter Communications Channels .....                                                 | 1  |
| <i>Sunil Ramlall, Jia-Chi Samuel Chieh</i>                                                                                                |    |
| A Study of Sampling Sizes Greater than $0.5\lambda$ on Planar Near Field Ranges for Electrically Large Antennas .....                     | 5  |
| <i>Alexander Chen, Yonghui Shu</i>                                                                                                        |    |
| Crosstalk Tolerant LRRM Auto-Load Inductance Calibration .....                                                                            | 9  |
| <i>Leonard Hayden, Tony St. Denis</i>                                                                                                     |    |
| First Calibration and Measurement Results of a Novel Wafer-Level Single-Sweep 100 kHz-250 GHz System .....                                | 13 |
| <i>Andrej Rumiantsev, Hung Che Fu, Suren Singh, Ziad Hatab</i>                                                                            |    |
| Next-Generation Broadband Single Sweep DC-250GHz Probing System .....                                                                     | 17 |
| <i>Pratik Ghate, Gavin Fisher, James Hibbert</i>                                                                                          |    |
| Transfer of mTRL Accuracy in industrial BiCMOS Technology to commercial Lumped-Element Calibrations up to 110 GHz .....                   | 23 |
| <i>Gia Ngoc Phung, Uwe Arz, Samuel Nguyen Dinh An, Joao Azevedo Goncalves</i>                                                             |    |
| On-wafer S-parameter Characterization of a D-band SIW Power Divider using Two-Port VNA .....                                              | 27 |
| <i>Weifeng Wu, Yunjiang Ding, Juncheng Xiong, James C. M. Hwang, Patrick Fay</i>                                                          |    |
| Characterization of High-k Dielectrics for Active mm-Wave Devices .....                                                                   | 31 |
| <i>Fan Cheng, Kubilay Sertel</i>                                                                                                          |    |
| Millimeter-Wave Permittivity of a 93-mm-Diameter Single-Crystal AlN Wafer .....                                                           | 35 |
| <i>Chunyi Li, Xinghao Tong, Tianze Li, Lei Li, James C. M. Hwang, Kasey Hogan, James Grandusky Shana Yanagimoto, Yoshiyuki Yanagimoto</i> |    |
| Accurate Microwave Testing of Dielectric Samples from 15 GHz to 130 GHz using Fabry-Perot Open Resonator .....                            | 39 |
| <i>Bartłomiej Salski, Marcin Wojciechowski, Gia Ngoc Phung, Xiaobang Shang, Martin Hudlicka</i>                                           |    |
| VNA Tools: Material Parameters Extraction from On-Wafer CPW S-Parameter Measurements .....                                                | 43 |
| <i>Bruno Eckmann, Michael Wollensack, Liam Ausden, Johannes Hoffmann, Markus Zeier</i>                                                    |    |
| Scanning Microwave Microscopy of Polarization Domain Boundaries in 2D SnSe .....                                                          | 47 |
| <i>Yawei Zhang, Xiaopeng Wang, Marco Farina, James C. M. Hwang, Yunyue Zhu, Nannan Mao, Peng Wu Jing Kong</i>                             |    |
| Quantifying Variance Components for Repeated Scattering-Parameter Measurements up to 110 GHz .....                                        | 51 |
| <i>Jeffrey A. Jargon, Dazhen Gu, Jerome Cheron, Rob D. Jones, Amanda A. Koepke</i>                                                        |    |
| Creating a 0.5 mm Coaxial Interface and Calibration Kit for a Broadband 250 GHz Vector Network Analyzer .....                             | 55 |
| <i>Rusty Myers, Keith Howell, Derik Lee, Nathaniel Horn, Prabh Mann, Bart Schrijver</i>                                                   |    |
| Symmetric Reciprocal Match Hybrid Calibration: Improving the Accuracy of Offset Short Vector Network Analyzer Calibrations .....          | 59 |
| <i>Lukas Ebner, Stefan Wögerbauer, Michael E. Gadringer</i>                                                                               |    |

|                                                                                                                                                                                                   |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Assessment of VNA Frequency Extender Linearity by Attenuation Build-Up Method .....                                                                                                               | 63  |
| <i>James Skinner, Daniel Stokes, Lewis Manning, Murat Celep</i>                                                                                                                                   |     |
| Impact of Calibration Errors on the Determination of Quality Factor of an Acoustic Resonator .....                                                                                                | 68  |
| <i>David Molinero</i>                                                                                                                                                                             |     |
| Qubit Control Using Cryogenic Frequency Multiplication .....                                                                                                                                      | 73  |
| <i>Grant Giesbrecht, Manuel A. Castellanos-Beltran, Adam Sirois, Nathan E. Flowers-Jacobs, David Olaya<br/>Michael Vissers, Taylor Barton, Paul Dresselhaus</i>                                   |     |
| Preliminary Study on Microwave On-Wafer S-Parameter Measurements of Passive CPW Devices at<br>Cryogenic Temperatures .....                                                                        | 77  |
| <i>Lewis Manning, Daniel Stokes, Thomas Sweetnam, Tobias Lindström, Nick Ridler, Xiaobang Shang</i>                                                                                               |     |
| VNA Absolute LO Phase Evaluation for Sub-THz Vector Acquisitions of Wideband Test Signals .....                                                                                                   | 81  |
| <i>Jean-Pierre Teyssier, Troels Nielsen, Vincent Gillet</i>                                                                                                                                       |     |
| A Comparison of On-Wafer Microstrip and Grounded Coplanar Waveguide Multiline-TRL Calibration<br>for Millimeter-Wave GaN HEMT Characterization .....                                              | 84  |
| <i>Thomas Bonnen, Dashiell Matlock, Rob Jones, Jerome Cheron, Matthew Hodek, Edward Gebara<br/>Nicholas C. Miller</i>                                                                             |     |
| An Over-the-Air (OTA) E-Band Radar Target Simulator for Automotive Radar Performance<br>Evaluations .....                                                                                         | 88  |
| <i>Yonghui Shu, Chinh Doan</i>                                                                                                                                                                    |     |
| Comparative Analysis of Adhesive Mounting Solution's Effect on Planar Antenna Performance .....                                                                                                   | 92  |
| <i>Jinay Mahesh Patel, Jacdon Green, Marco Iskander</i>                                                                                                                                           |     |
| Comparison of Microstrip, Coplanar, and SIW Interconnects on the Same 50- $\mu\text{m}$ -thick GaAs Chip .....                                                                                    | 96  |
| <i>Tianze Li, Lei Li, James C. M. Hwang</i>                                                                                                                                                       |     |
| Wideband active load-pull using hybrid source for RF to Sub THz applications .....                                                                                                                | 100 |
| <i>Vincent Gillet, Johan Ericsson, Troels Nielsen, Osamu Kusano, Jean-Pierre Teyssier</i>                                                                                                         |     |
| Impact of Input Nonlinearities on Continuous-Current-Mode Class-F Operation Through Third-Order<br>Harmonic Generation .....                                                                      | 103 |
| <i>Daniel Alonso-Tejera, J. Apolinar Reynoso-Hernández, J. R. Loo-Yau, M. A. Pulido-Gaytán<br/>M. C. Maya-Sánchez, Jaime Sánchez-García, Salvador Villarreal-Reyes, E. A. Hernández-Domínguez</i> |     |
