# TABLE OF CONTENTS

|                                                                                                                                                                      |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Quantitative Evaluation Method for Well integrity Risk in Heavy Oil Steam Stimulation Wells .....                                                                    | 1   |
| <i>Xueqiang Wang, Haiqing Long, Hongliang Yi, Jian Ding, Jinlong Wang, Chuanlei Wang</i>                                                                             |     |
| IG-StoryDeep: A Multimodal Collaborative Storytelling System Powered by DeepSeek for Enhancing<br>Intergenerational Bonds in Chinese Colocated Care Facilities ..... | 10  |
| <i>Lihong Li</i>                                                                                                                                                     |     |
| Evaluation of Large Language Model's Cross-Cultural Non-Verbal Behavior Understanding .....                                                                          | 15  |
| <i>Zimeng Li, Yuntao Zou, Caichun Cen, Tong Xiao, Pingting Tang, Zihan Wang</i>                                                                                      |     |
| Research on Multimodal Interaction of Embodied Perception Agent for Industrial Design Based on<br>LoRA Lightweight Training .....                                    | 24  |
| <i>Wei Sun, Ling Yang, Jiajie Huang</i>                                                                                                                              |     |
| Design and Practice of a Multimodal Emotional Perception Teaching Intelligent Agent in Higher<br>Vocational Colleges .....                                           | 32  |
| <i>Ling Yang, Wei Sun</i>                                                                                                                                            |     |
| Research on the Application of Multimodal Perception and Fusion Interaction Technology in Smart<br>Parks .....                                                       | 40  |
| <i>Junhao Zeng</i>                                                                                                                                                   |     |
| Integrating Neural Dynamics and Kinematic Features: A Multimodal Time-Series Framework for<br>Shooting Performance Prediction .....                                  | 48  |
| <i>Zijin Li, Mingbao Yang, Meiliang Liu, Xiaoxiao Yang, Zhengye Si, Yunfang Xu, Ming Cheng, Zhiwen Zhao</i>                                                          |     |
| Teacher Emotion Perception and Adaptive Regulation Based on ARTEMIS Artwork Annotations .....                                                                        | 53  |
| <i>Wu Wang, Qiang Wan</i>                                                                                                                                            |     |
| Pharmaceutical Supply Chain Risk Assessment Based on Optimized BP Neural Network .....                                                                               | 57  |
| <i>Xijie Gao</i>                                                                                                                                                     |     |
| Federated Transfer Learning for Personalized Household Financial Services .....                                                                                      | 61  |
| <i>Bowen Yu, Zhuoqing Zhong, Yishen Liu, Yue Zhao</i>                                                                                                                |     |
| Research on Dynamic Execution Optimization of Smart Contracts Based on GRPO Algorithm .....                                                                          | 67  |
| <i>Ruixue Xu, Sijia Lian, Suhua Liu, Yuanjie Zhu</i>                                                                                                                 |     |
| A Blockchain-Based Fair Electronic Contract Signing Scheme with Dispute Arbitration .....                                                                            | 78  |
| <i>Yue Zhou, Xiaoyu Li</i>                                                                                                                                           |     |
| Construction of a Task-Driven Model for BIM Course Cost Training Based on OBE Concept .....                                                                          | 85  |
| <i>Zhenzhen Geng, Xiaojiang Du</i>                                                                                                                                   |     |
| A Consortium Blockchain Scheme for Secure Collaboration in BIM .....                                                                                                 | 89  |
| <i>Sihan Li, Min Wang, Guoxin Huang, Yuna Chen</i>                                                                                                                   |     |
| Smart Contract Bytecode Vulnerability Detection with Neighborhood Constrained Cross Attention .....                                                                  | 94  |
| <i>Guoxin Huang, Min Wang, Sihan Li, Yuna Chen</i>                                                                                                                   |     |
| An Adaptive Gmapping Algorithm Integrating IMU Observations and Lightweight Loopback .....                                                                           | 100 |
| <i>Xinyu Ye, Zhenyu Liu</i>                                                                                                                                          |     |

|                                                                                                                  |     |
|------------------------------------------------------------------------------------------------------------------|-----|
| Full-Range Head Pose Estimation Algorithm Based on an Improved 6D RepNet .....                                   | 106 |
| <i>Wenbo Hou</i>                                                                                                 |     |
| An Uncertainty-Aware Deformable Collaborative Network Approach for Face Super-Resolution .....                   | 112 |
| <i>Yi Sun, Yanlong Liu</i>                                                                                       |     |
| Multi-Strategy Improved Crested Porcupine Optimizer and Its Application .....                                    | 118 |
| <i>Songye Yang, Shengli Xie, Wei Liu</i>                                                                         |     |
| Dynamic Credible ESG Valuation and Accounting Synchronization via Permissioned Blockchains and<br>Oracles .....  | 123 |
| <i>Jingyi Du</i>                                                                                                 |     |
| A Multi-Strategy Enhanced Zebra Optimization Algorithm and Its Application .....                                 | 127 |
| <i>Jiatong Shang, Shengli Xie, Wei Liu</i>                                                                       |     |
| Improved Design and Engineering Applications of the Nutcracker Optimization Algorithm .....                      | 132 |
| <i>Yi Wang, Shengli Xie, Wei Liu</i>                                                                             |     |
| A Multi-Strategy Enhanced Black-Winged Kite Algorithm for Wireless Sensor Network Coverage<br>Optimization ..... | 137 |
| <i>Diya Yang, Shengli Xie, Wei Liu, Chunlei Cai</i>                                                              |     |
| An Enhanced Artificial Bee Colony with Dual Search Strategies and Local Search .....                             | 141 |
| <i>Yang Cao, Yunpeng Jia</i>                                                                                     |     |
| An Improved Hybrid Evolutionary Algorithm with Sine-Based Parameter Adaptation .....                             | 146 |
| <i>Ya'nan Sun, Yang Cao</i>                                                                                      |     |
