SPIE

Volume 14020

Proceedings of SPIE 0277-786X, V. 14020

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Next-Generation Spectroscopic Technologies XVIII*, edited by Luisa T. M. Profeta, Steven M. Barnett, Proc. of SPIE 14020, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

JOINT SESSION WITH CONFERENCES DS101 AND DS306

- 14020 02 **High-speed standoff detection of chemical plumes with swept-ECQCL spectroscopy**
[14020-1]
- 14020 03 **Recent advances in optically super-resolved infrared imaging micro-spectroscopy (OSIRIS)**
[14020-2]
- 14020 04 **Handheld Raman for proximal standoff chemical identification** [14020-3]

NEXT-GENERATION PLASMA ANALYSIS

- 14020 06 **Phase-sensitive dual-comb spectrometer for plasma density measurements (Invited Paper)**
[14020-5]
- 14020 07 **Post-industrial ground remediation: LIBS as a tool for detection of asbestos and heavy metal contamination of soil (Invited Paper)** [14020-6]

NEW AND NOVEL CHEMICAL SENSING

- 14020 08 **Laser induced breakdown spectroscopy and machine learning for tritium storage materials**
[14020-19]
- 14020 09 **WASP: the ultimate UV to LWIR spectroscopic calibration and measuring platform (Invited Paper)** [14020-9]
- 14020 0A **Real-time detection of isotopologues and isotope exchange in tritium-producing burnable absorber rods** [14020-18]
- 14020 0B **Non-linear and enhanced spectroscopies for proximal detection of hazardous chemicals. (Invited Paper)** [14020-7]

NEXT-GENERATION AI ADVANCES FOR SPECTROSCOPY

- 14020 0D **Micro-to-macro scaling of DFT-calculated IR spectra (Invited Paper)** [14020-11]

NEXT-GENERATION SPECTROSCOPIC TECHNOLOGIES

- 14020 OF **Resonant cavity interband cascade light emitting devices operating beyond 4 μ m with high spectral intensity (Invited Paper)** [14020-13]
- 14020 OG **A low-power FPGA-based time-domain NMR relaxometry system for field deployment (Invited Paper)** [14020-14]
- 14020 OH **Future developments in portable optical spectroscopy (Invited Paper)** [14020-16]
