

PROCEEDINGS OF SPIE

Quantum Information Science, Sensing, and Computation XVIII

**Michael Hayduk
Michael L. Fanto
Carlos M. Torres Jr.**
Editors

**27–29 April 2026
National Harbor, Maryland, United States**

Sponsored and Published by
SPIE

Volume 14021

Proceedings of SPIE 0277-786X, V. 14021

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Quantum Information Science, Sensing, and Computation XVIII*, edited by Michael Hayduk, Michael L. Fanto, Carlos M. Torres Jr., Proc. of SPIE 14021, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

QUANTUM MATERIALS AND SENSORS II

14021 02 **Polarization noise characterization of linearly polarized VCSELs** [14021-6]

QUANTUM MATERIALS AND SENSORS III

14021 03 **A novel approach of macroscopic N-fold super-resolution using phase-controlled divided signals** [14021-11]

QUANTUM COMPUTING I

14021 04 **Doing more with less on a minimal QAOA benchmark: error-mitigation behavior on IBM quantum open plan** [14021-15]

QUANTUM NETWORKS AND QUANTUM COMMUNICATIONS II

14021 05 **A generalized measurement key intercept attack at $\approx 6\%$ QBER against 4-PSK BB84** [14021-18]

14021 06 **RF-photonic links for cryogenic-compatible microwave control in quantum networks and applications to magnetometry** [14021-19]

14021 07 **Characterization of SuperSPAD using a source of correlated photon pairs** [14021-20]

QUANTUM COMPUTING II

14021 08 **Enhanced trapped-ion quantum control in foundry-fabricated integrated devices (Invited Paper)** [14021-35]

QUANTUM NETWORKS AND QUANTUM COMMUNICATIONS III

14021 09 **A novel quantum augmented framework to improve microgrid cybersecurity** [14021-27]

14021 0A **Generation, evaluation, and applications of systems combining quantum entanglement and wavefront design** [14021-29]

14021 0B **Hybrid quantum-classical GANs for the generation of adversarial network flows** [14021-28]

POSTER SESSION

14021 0C **Theoretical foundations of software-defined quantum computing** [14021-30]

14021 0D **A home-built quantum random number generator using americium-241 decay** [14021-31]
