Volume 14022

Proceedings of SPIE 0277-786X, V. 14022

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Directed Energy Technologies*, edited by Matthew McQuage, Amy Clark, Christopher R. Wilson, Proc. of SPIE 14022, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9798902320005

ISBN: 9798902320012 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

DIRECTED ENERGY WORKFORCE DEVELOPMENT

14022 02 **Directed energy workforce development at the University of Arizona** [14022-4]

BRIDGING THE GAP

14022 04 **Bridging research and deployment: HiLASE developments in high-energy laser systems**
[14022-7]

14022 05 **Raytheon high energy laser technology** [14022-8]

LASER SOURCES

14022 06 **Narrow-linewidth Ho:YAG lasers using VBG output couplers** [14022-11]

14022 07 **Development of high-power, high-repetition-rate Ho:YAG laser oscillator** [14022-12]

14022 08 **Ultrashort-pulse laser system at 8.5 μ wavelength based on optical parametric chirped-pulse amplification** [14022-13]

14022 09 **Recent progress in the development of a high-power, pulsed, optical enhancement cavity laser platform** [14022-14]

FIBER AND OPTICAL MATERIALS I

14022 0A **Continuous-wave diamond Raman laser at 1.2 μ m with 85W output power in a single pump pass configuration** [14022-17]

14022 0B **Power and energy scaling of coherent laser illuminators for interferometric applications**
[14022-19]

FIBER AND OPTICAL MATERIALS II

14022 0C **SBS and ASE mitigation in high power illuminators with digitally tapered fibers** [14022-20]

14022 OD **Methods to reduce radiation-induced gain degradation in erbium doped fiber** [14022-22]

14022 OE **Efficient modeling and fiber bending strategies for TMI mitigation** [14022-23]

FIBER AND OPTICAL

14022 OF **Novel method for random anti-reflective structured surface (rARSS) fabrication on fiber optic endfaces for directed energy applications** [14022-27]

LASER DAMAGE

14022 OG **Performance of large aperture transmissive optics and windows with ARSS for very high energy laser applications** [14022-32]

14022 OH **Testing methods for foreign object debris on high power laser optics** [14022-33]

14022 OI **Airborne foreign object debris behavior in high-power laser beams and impact on optical components** [14022-34]

OPTICS AND COATINGS I

14022 OJ **ZERODUR for meter-class and larger spaceborne mirrors** [14022-42]

14022 OL **Development of very high transmission ARSS focusing optics for laser applications** [14022-37]

MATERIAL INTERACTION AND PROPAGATION

14022 OM **Measuring the reflections from a high-energy laser focused on melting steel targets for laser safety assessments** [14022-43]

14022 ON **Curved air waveguides** [14022-45]

14022 OO **Laser power beaming to small aerial vehicles executing defensive missions** [14022-90]

ADVANCED IMAGING TECHNIQUES

14022 OP **Inverse synthetic aperture Fourier ptychography with asymmetric apertures** [14022-47]

14022 OQ **Unwrapping the phase of dynamic scenes in 3D digital holography using implicit neural representations** [14022-48]

14022 0R **Experimental demonstration of digital holography with an engineered reference beam**
[14022-49]

14022 0S **Multi-dimensional offset heterodyne for improved digital holography SNR** [14022-50]

IMAGE CORRECTION AND ACTIVE IMAGING

14022 0T **Correcting pixel position error with software** [14022-51]

14022 0U **Active tracking coherent effects: speckle-induced noise-equivalent angle validation**
[14022-52]

14022 0V **Optimization and lab testing of an electronic FMCW active imager** [14022-53]

14022 0W **Speed limits in passive MWIR imaging for drone detection** [14022-54]

ATMOSPHERIC EFFECTS AND MODELING I

14022 0X **Integrated sensing suite for atmospheric turbulence characterization via ML-based in-situ sensing data processing** [14022-56]

ATMOSPHERIC EFFECTS AND MODELING II

14022 0Y **Reengineering rotary sensing for field-ready directed energy systems** [14022-62]

HIGH-POWER MICROWAVE (HPM) SOURCES AND COMPONENTS

14022 0Z **Experiments on compact X-band split-cavity oscillators with no guiding magnetic field**
[14022-64]

14022 10 **Design of a Ku-band radial beam oscillator with multi-gigahertz tunability** [14022-65]

14022 12 **Advanced processing routes for tunable low-loss magnetic substrates in high-power microwave systems** [14022-94]

METAMATERIALS, LENSES, AND ANTENNAS FOR HPM

14022 13 **All-metal frequency-scalable conformal antenna arrays for high-power applications**
[14022-68]

- 14022 14 **All-metal time-varying spherical metasurface lenses for HPM-class adaptive focusing**
[14022-69]
- 14022 15 **Pulsed high voltage breakdown of epoxy-based insulators that are dielectrically altered**
[14022-71]

POSTER SESSION

- 14022 16 **Numerical-analytical approach for robust estimation of thermal fields for directed-energy deposition** [14022-73]
- 14022 17 **High power electromagnetic dispersion control structures: manufacturing and characterisation from X to Ka band frequencies** [14022-74]
- 14022 18 **Development of high-power experimental testing apparatus for CSSR microwave sources**
[14022-75]
- 14022 19 **High-power high-frequency gyrotron amplifiers and investigation of CNT cathode emitters**
[14022-76]
- 14022 1A **Random anti-reflective structured surface (rARSS) characterization on the complete angle scatter instrument** [14022-39]
- 14022 1B **Pulse compression of a high-power GHz electro-optic frequency comb laser** [14022-92]
- 14022 1C **Parametric study of laser-induced functional damage in sensors** [14022-93]
