SPIE

Volume 14026

Proceedings of SPIE 0277-786X, V. 14026

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Algorithms for Synthetic Aperture Radar Imagery XXXIII*, edited by Edmund Zelnio, Frederick D. Garber, Proc. of SPIE 14026, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

ADVANCED RADAR PROCESSING I

- 14026 02 **A mixture-based CFAR automatic target detection process for high-resolution SAR imagery** [14026-2]
- 14026 03 **Analysis of calibration and decomposition techniques for a fully polarimetric radar system** [14026-3]
- 14026 04 **Super resolution SAR ground moving target imaging and tracking** [14026-5]
- 14026 05 **Hybrid learning based compression for high fidelity synthetic aperture radar data** [14026-4]

ADVANCED RADAR PROCESSING II

- 14026 06 **Physically- and domain-aware Gaussian process (GP) algorithms for 3D Helmholtz scattering problems** [14026-6]
- 14026 07 **Analysis of detecting airborne targets using synthetic aperture radar imagery** [14026-8]
- 14026 08 **Online CS-based SAR edge-mapping** [14026-9]
- 14026 09 **Sparse 3D spherical SAR and interferometry** [14026-10]
- 14026 0A **Moving target detection with colorized subaperture imagery** [14026-11]
- 14026 0B **Determining the feasibility of monostatic/bistatic/multistatic ISAR image integration using ISAR fundamental angles** [14026-33]

AUTOMATIC TARGET RECOGNITION

- 14026 0C **Fusion of radar signatures and predictive algorithms** [14026-12]
- 14026 0D **Out-of-distribution detection using SAR object detectors** [14026-13]
- 14026 0E **DINOSAR: generalizing SAR automatic target recognition at scale (Best Student Paper Award)** [14026-14]

- 14026 OF **Optimal template formation for multinomial pattern matching** [14026-15]
- 14026 OG **Robust black-box hard decision fusion for SAR ATR** [14026-16]
- 14026 OI **Learning to simulate for SAR ATR** [14026-18]
- 14026 OJ **Comparing open set recognition approaches using synthetic vs. measured auxiliary data** [14026-19]
- 14026 OK **Centroid-based open set recognition for automatic target recognition of SAR imagery** [14026-20]
- 14026 OL **Improving SAR ATR performance with adaptive robust beamforming and angular margin loss** [14026-21]

AUTOMATIC TARGET RECOGNITION PERFORMANCE

- 14026 OM **Evaluating variational autoencoder latent representations for synthetic aperture radar target classification** [14026-23]
- 14026 ON **Evaluating a range of out of distribution methods for challenging SAR ATR discrimination** [14026-24]
- 14026 OO **Analyzing the difficulty of SAR ATR classification** [14026-25]
- 14026 OP **High-fidelity generative modeling for SAR via novel isometry loss leading to improved ATR performance** [14026-32]
- 14026 OQ **Exploring conformal prediction ensembles for robust multimodal target recognition** [14026-34]
