Volume 14027

Proceedings of SPIE 0277-786X, V. 14027

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Multimodal Image Exploitation and Learning 2026*, edited by Sos S. Agaian, Stephen P. DelMarco, Proc. of SPIE 14027, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

DATA INTEGRITY AND SECURITY

- 14027 02 **Towards universal dataset validation: a multimodal data decoding framework (ByteGlass)**
[14027-1]
- 14027 03 **TC-CVD: a spatio-temporal collision video dataset for fixed-camera roadway surveillance**
[14027-2]
- 14027 04 **Addressing the unsupervised problem within supervised learning through L₁-PCA for intelligent subset creation (Best Paper Award)** [14027-3]
- 14027 05 **Offensive cybersecurity: automated attacker-workflow framework for evidence-driven web application penetration testing** [14027-4]

INNOVATIVE IMAGING TECHNIQUES

- 14027 06 **Quantum image representation and processing: advances and novel approaches (Invited Paper)** [14027-5]
- 14027 07 **Accelerating two-dimensional quantum Fourier transforms in quantum neural networks**
[14027-6]
- 14027 08 **Deep-learned adaptive 3-D block-rooting for image enhancement** [14027-7]
- 14027 09 **Quantum slant transform design for quantum neural network processing** [14027-8]

MULTIMODAL MACHINE LEARNING

- 14027 0C **Beyond training: engineering vision-language models for immediate disaster assessment (Best Paper Award)** [14027-11]
- 14027 0D **Explainable AI for multimodal cancer screening: bridging automation and clinical expertise** [14027-12]
- 14027 0E **A semantics-first approach to multimodal video captioning with frozen encoders and stabilized reinforcement learning** [14027-13]
- 14027 0F **Segmentation-guided RGB-D mapping for cloud-based indoor assessment in disaster response** [14027-14]

MULTIMODAL CLASSIFICATION AND DETECTION

- 14027 OG **Classification of microscopy bacterial images using Chebyshev polynomial neural networks (Best Paper Award)** [14027-15]
- 14027 OH **Latent representation fusion for lesion-level melanoma detection using multimodal machine learning models** [14027-17]
- 14027 OI **Automated method for hair removal in dermoscopic images using adaptive retinex** [14027-18]
- 14027 OJ **Fundamental vision-language models for crop-weed detection** [14027-19]
- 14027 OK **Characterizing the robustness of multimodal AIS and imagery models for vessel image classification** [14027-16]

POSTER SESSION

- 14027 OL **Color image processing by the gold ratio function** [14027-21]
- 14027 OM **Quality-aware multispectral fusion (Q-MSF): assessing and integrating heterogeneous multimodal data** [14027-22]
- 14027 OO **A review of YOLO-based object detection for e-waste sorting and recycling** [14027-24]
- 14027 OP **Adversarial modeling: a stealth-adaptive penetration testing framework for evaluating web application evasion resilience** [14027-25]
- 14027 OQ **Confidence-weighted hybrid multiscale shape-dependent gradient for biomedical image segmentation** [14027-26]
- 14027 OR **Adaptive fusion of deep and structured spatio-temporal features for industrial human-robot collaboration** [14027-27]
- 14027 OS **Optimal dispersion-based thresholding for robust PCA under Gaussian noise and sparse outliers** [14027-29]
