Sponsored and Published by
SPIE

Volume 14029

Proceedings of SPIE 0277-786X, V. 14029

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Synthetic Data for Artificial Intelligence and Machine Learning: Tools, Techniques, and Applications IV*, edited by Kimberly E. Manser, Christopher L. Howell, Raghuveer M. Rao, Proc. of SPIE 14029, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SYNTHETIC DATA GENERATION TOOLS I

- 14029 02 **Quantitative measures for passive sonar texture analysis** [14029-1]
- 14029 04 **Multimodal dataset generation through physics-based virtual environment simulation**
[14029-4]

SYNTHETIC DATA GENERATION TOOLS II

- 14029 05 **Typed, parallel agentic systems for text-to-scene generation in Unreal Engine with reflection and error feedback** [14029-5]
- 14029 06 **In-transit space object recognition via physics-based remote sensing** [14029-6]
- 14029 07 **Improving deep learning-based automatic detection and identification of small UAVs using MuSES-generated synthetic imagery** [14029-7]

DATA ENGINEERING AND CURATION

- 14029 08 **Zero-shot classification of articulating 4D aerial objects through a Markovian synthetic template matching approach** [14029-8]
- 14029 09 **Bridging the synthetic-to-real domain gap with network dissection analysis** [14029-9]

SESSION OF INTEREST ON ARTIFICIAL INTELLIGENCE: JOINT SESSION WITH CONFERENCES 14029 AND 14031

- 14029 0C **Synthetic infrared (IR) data training evaluation framework for AI/ML object detectors**
[14029-12]
- 14029 0D **Synthetic data for multispectral and hyperspectral imaging using ShipIR/NTCS** [14029-13]

GENERATIVE AI

- 14029 OE **Synthetic coherent data augmentation for adverse weather conditions in surveillance systems** [14029-15]
- 14029 OF **Class-specific diffusion models improve military object detection in a low-data domain (Best Paper Award)** [14029-16]
- 14029 OH **Combating synthetic imagery in battlefield conditions with machine learning techniques** [14029-27]

INTEGRATED MACHINE LEARNING AND SYNTHESIS PIPELINES

- 14029 OI **Toward an uncertainty-guided closed-loop synthetic data generation pipeline for UAS classification** [14029-19]
- 14029 OK **TurPy: a physics-based and differentiable optical turbulence simulator for algorithmic development and system optimization** [14029-21]
- 14029 OL **Inverse black-box diffusion modeling: multimodal parameter estimation from synthetically-rendered imagery** [14029-22]
