Volume 14032

Proceedings of SPIE 0277-786X, V. 14032

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Pattern Recognition and Prediction XXXVII*, edited by Mohammad S. Alam, Vijayan K. Asari, Proc. of SPIE 14032, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

ISSN: 1996-756X (electronic)

ISBN: 9798902320203

ISBN: 9798902320210 (electronic)

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

DEEP LEARNING

- 14032 02 **Adversarial robustness of deep learning-based anomaly detection in satellite communication systems (Invited Paper)** [14032-1]
- 14032 03 **Evaluating the capability of multimodal large language models for mining site identification using Sentinel-2 imagery** [14032-2]
- 14032 04 **Flood area segmentation using deep learning and UAVSAR** [14032-4]
- 14032 05 **Vision transformer-based multiframe object detection** [14032-5]

AUTONOMOUS SYSTEMS

- 14032 06 **Autonomous vision-based UAV system for oil spill sampling and precision recovery (Invited Paper)** [14032-6]
- 14032 07 **A modularized architecture for localized UAV detection and tracking using convolutional neural networks and state-space models** [14032-7]
- 14032 08 **Evaluating super-resolution techniques for satellite-based mine tailings classification** [14032-8]
- 14032 09 **Natural disaster image classification using CSL-SM: CNN and SURF feature integration with LDA-Softmax** [14032-9]

PATTERN RECOGNITION

- 14032 0B **Target recognition using granular backscatter** [14032-12]
- 14032 0C **Impact of image compression on skin lesion classification: experiments with PAD-UFES-20** [14032-13]

SCENE UNDERSTANDING

- 14032 0D **Fire detection in images using DFF-En: DenseNet with Fourier descriptor fusion and ensemble learning** [14032-14]

- 14032 OE **Maritime cloud detection and segmentation in hyperspectral imagery** [14032-15]
- 14032 OF **Evaluating prompt design choices for object detection, counting, and classification in overhead imagery** [14032-16]
- 14032 OG **A scalable workflow for tailored training dataset generation from geospatial big data repositories** [14032-30]
- 14032 OH **Deep learning framework for lithium-sulfur battery cathode coating assessment using convolutional neural networks and Grad-CAM** [14032-31]

POSTER SESSION

- 14032 OI **Adaptive pairwise reversible data hiding based on CVITnet predictor and dynamic programming** [14032-18]
- 14032 OJ **A predictive model for problematic internet use based on children's physical activity data** [14032-19]
- 14032 OK **Unified fidelity metric for synthetic imagery** [14032-20]
- 14032 OL **Real-time error detection in dental panoramic imaging using custom AI-driven deep learning with clinical user interface** [14032-21]
- 14032 OM **Analysis of anomalous signature features present in RF pulse data** [14032-22]
- 14032 OO **Land-use scene classification using EGC-GB: EfficientNetB0 and GLCM texture features with gradient boosting** [14032-24]
- 14032 OP **Localized estimation of NIIRS can enhance image analysis** [14032-28]
- 14032 OQ **Shape fidelity: measuring a digital model's trueness to form** [14032-32]
- 14032 OR **Quantifying learned feature representations in vision models using Zernike moments** [14032-33]

DIGITAL POSTERS

- 14032 OT **Early detection of powdery mildew in tomato leaves using weakly and semisupervised hyperspectral analysis** [14032-11]
- 14032 OU **HMAC-driven chaotic image encryption for robust multimedia security** [14032-17]
- 14032 OV **DCT-ResNetFA: a hybrid spectral-spatial ResNet with frequency adaptive attention for efficient hyperspectral image classification** [14032-3]
