

PROCEEDINGS OF SPIE

Three-Dimensional Imaging, Visualization, and Display 2026

**Bahram Javidi
Xin Shen
Adrian Stern**
Editors

**27–28 April 2026
National Harbor, Maryland, United States**

Sponsored and Published by
SPIE

Volume 14033

Proceedings of SPIE 0277-786X, V. 14033

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Three-Dimensional Imaging, Visualization, and Display 2026*, edited by Bahram Javidi, Xin Shen, Adrian Stern, Proc. of SPIE 14033, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

DIGITAL HOLOGRAPHY FOR 3D IMAGING AND MICROSCOPY

- 14033 02 **Lensless coherent imaging using digital holography: expanding the boundaries of optical measurement (Fumio Okano Best Paper Award)** [14033-2]

AUGMENTED, VIRTUAL REALITY, AND HEAD MOUNTED DISPLAYS

- 14033 03 **Beyond the lens: binocular perspectives on optical aberrations in 3D light field displays (Keynote Paper)** [14033-5]
- 14033 04 **Towards truly 3D single-cell insight by computational holotomographic imaging flow cytometry (Fumio Okano Best Paper Award)** [14033-6]

3D IMAGE SENSING AND PROCESSING

- 14033 05 **Stereoscopic and self-evolving computational ghost imaging through atmospheric turbulence (Invited Paper)** [14033-10]
- 14033 06 **AI-assisted label-free live cell imaging: an overview of the HoloFluoNet framework (Invited Paper)** [14033-11]

3D IMAGE SENSING AND VISUALIZATION SYSTEMS I

- 14033 07 **Two-dimensional quantum imaging from a single photon detector over kilometre-scale fibre (Fumio Okano Best Paper Award)** [14033-15]

3D IMAGE SENSING AND VISUALIZATION SYSTEMS II

- 14033 08 **Snapshot spectral compressive imaging via spectral reflectance decomposition (Fumio Okano Best Paper Award)** [14033-18]

3D ACTIVE IMAGING AND BIOMEDICAL APPLICATIONS

- 14033 09 **3D visualization in Mueller matrix microscopy (Invited Paper)** [14033-20]

- 14033 0A **Combining optics and algorithms for QPI microscopy (Invited Paper)** [14033-21]
- 14033 0B **Monocular passive event-based range-finding of airborne objects using the Scheimpflug principle** [14033-41]

POSTER SESSION

- 14033 0C **Bootstrap metric for quantifying the depth resolution of 3D sensors** [14033-22]
- 14033 0D **Optical zero-knowledge proof: an overview for scalable anonymous authentication** [14033-23]
- 14033 0E **Cycle-consistent diffusion modeling for bidirectional cryptanalysis of double random phase encoding in federated settings** [14033-24]
- 14033 0F **Using energy landscape analysis to explore functional connectivity in Parkinson's disease patients with severe hyposmia** [14033-26]
- 14033 0G **Can we increase the imaged field of view by multiplexing several lensless systems using a microlens array?** [14033-29]
- 14033 0H **Pixel size robustness of lensless single random phase encoding systems** [14033-32]
- 14033 0I **Physics-informed image restoration with simultaneous parameter estimation using 3D integral imaging under low illumination** [14033-33]
- 14033 0J **Longitudinal resolution analysis of three-dimensional integral imaging under noise** [14033-34]
- 14033 0K **Analysis of three-dimensional integral imaging information loss under degraded imaging conditions** [14033-36]
- 14033 0L **Synthetic elemental image generation for optimized integral imaging-based 3D displays** [14033-37]
- 14033 0M **In-situ high-precision 360° 3D inspection of directed energy deposition printing processes** [14033-38]
- 14033 0N **Finite refractive index selective propagation (FRISP): an efficient method for the optical simulation of refractive optical structures** [14033-50]
