SPIE

Volume 14034

Proceedings of SPIE 0277-786X, V. 14034

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advanced Optics for Imaging Applications: UV through LWIR XI*, edited by Peter L. Marasco, Jay N. Vizgaitis, Daniel J. Gibson, Proc. of SPIE 14034, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

MATERIALS, FABRICATION, AND TEST I

- 14034 02 **Enabling the next generation of defense and homeland security innovations through replicated mirrors** [14034-1]
- 14034 04 **High-refractive-index nanocomposite materials for scalable microlens array fabrication in advanced display and sensing applications** [14034-3]
- 14034 06 **ORMOCHALC polymers for attritable IR sensors and IR adhesives** [14034-5]
- 14034 07 **Space-qualified enhanced gold optical coating for 1550nm: environmental stability and performance** [14034-6]

MATERIALS, FABRICATION, AND TEST II

- 14034 08 **Computational exploration of plasmonic scatterer arrays for electromagnetic metasurfaces** [14034-7]
- 14034 09 **Emerging techniques for dual-band MWIR–LWIR lens metrology and temperature characterization** [14034-8]
- 14034 0A **A dual-use apparatus for infrared thermal defocus and refractive index determination** [14034-9]
- 14034 0B **Complex refractive index measurement of chalcogenide-based copolymers for infrared optics** [14034-10]
- 14034 0C **Designing optics for smaller pixel pitch MWIR and LWIR detectors** [14034-27]

ADVANCED DESIGN CONCEPTS

- 14034 0D **High-fidelity emulation of near field optical metasurface response with transformers** [14034-11]
- 14034 0E **High-refractive chalcogenide glass for cost-effective athermalized infrared optics** [14034-12]

- 14034 OF **Embedding AI agents into computational design workflows with physics simulation tools** [14034-13]
- 14034 OG **Optomechanical techniques for optical compensation of high-performance imaging lenses** [14034-14]

OPTICS FOR ADVANCED SYSTEMS

- 14034 OH **Smart, horizon intrusion enforcement with laser detection (SHIELD): balanced coherent imaging for clutter-tolerant detection and characterization of small unmanned aerial systems** [14034-17]
- 14034 OI **Polarimetric imaging across visible, SWIR, and LWIR: sensor performance tradeoffs and operational advantages** [14034-18]
- 14034 OK **Compact single-shot ranging and near-far imaging using metasurfaces** [14034-22]
- 14034 OL **Panoramic camera array for UAV detection and navigation** [14034-28]

POSTER SESSION

- 14034 OM **Development of a camera for cubesats utilizing additive manufacturing** [14034-23]
- 14034 ON **Diffraction optical variable image elements for security** [14034-24]
