Sponsored and Published by
SPIE

Volume 14036

Proceedings of SPIE 0277-786X, V. 14036

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Infrared Imaging Systems: Design, Analysis, Modeling, and Testing XXXVII*, edited by David P. Haefner, Gerald C. Holst, Proc. of SPIE 14036, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

TESTING I

- 14036 02 **Tabletop degraded visual environment chambers for passive imaging** [14036-1]
- 14036 03 **Temporal and spatial calibration of a moving scene for evaluating EO/IR camera systems of systems** [14036-2]
- 14036 04 **Novel SWIR, MWIR, and LWIR cameras for custom applications** [14036-4]

TESTING II

- 14036 05 **Testing digital FPAs with a purpose-built test station and software** [14036-5]
- 14036 07 **Towards robust and scalable imaging through degraded visual environments using synthetic waves** [14036-6]

SYSTEMS I

- 14036 0A **Comparison of jet aircraft detection in the extended shortwave and midwave infrared** [14036-10]
- 14036 0B **Hemisphere scanning imaging systems** [14036-11]
- 14036 0C **High F-number uncooled microbolometer performance for UAV-mounted targeting** [14036-12]

SYSTEMS II

- 14036 0D **Energy transformation loss optimization** [14036-13]

MODELING I

- 14036 OH **From photon transfer to maximum likelihood: a statistician's perspective on sensor characterization** [14036-17]
- 14036 OI **Integration time limits for strap-down pilotage sensors** [14036-18]
- 14036 OJ **Importance of incorporating the eye's inherent characteristics into laboratory vision system characterization** [14036-22]

MODELING II

- 14036 OL **Performance-equivalent synthetic imagery: preserving EO/IR image-chain metrics in game engine cameras for autonomy** [14036-21]
- 14036 OM **Thermal time constant (TTC) measurements** [14036-19]

MODELING III

- 14036 ON **A comparison of low-cost drone detection sensors in the VIS and LWIR** [14036-23]
- 14036 OO **F λ /d metric modifications for degraded imaging conditions** [14036-24]
- 14036 OP **Drone-based sensor resolution as a function of wind speed and integration time** [14036-25]
- 14036 OQ **Experimental setup for non-subjective method of thermal sensor performance testing with the triangle orientation discrimination (TOD) method using Infratest** [14036-26]

POSTER SESSION

- 14036 OR **Collection of IR absorption spectra for energetic materials calculated using density functional theory** [14036-27]
- 14036 OS **Methodological enhancement of NETD optimization through active FPA temperature control** [14036-28]
