SPIE

Volume 14039

Proceedings of SPIE 0277-786X, V. 14039

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Radar Sensor Technology XXX*, edited by Abigail S. Hedden, Gregory J. Mazzaro, Proc. of SPIE 14039, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

ALGORITHMS AND PROCESSING TECHNIQUES I

- 14039 02 **Near-field beamforming improvements for MIMO radar systems** [14039-1]
- 14039 03 **A two-part phase-encoded linear sampling technique for synthetic aperture radar**
[14039-2]
- 14039 04 **Pulse intermodulation due to amplifier supply voltage oscillations in staggered PRI radars**
[14039-3]

PROGRAMS AND SYSTEMS

- 14039 05 **Comparing the angle-of-arrival estimate variance between phase interferometer and phase-comparison monopulse systems** [14039-5]
- 14039 06 **Fidelity improvements for performance and behavior models of low-range radar altimeters**
[14039-6]
- 14039 07 **Three-dimensional wind field estimation based on multibeam phased array radar sensors: the possibility of a converged solution in ground and airborne systems** [14039-7]

RADAR MICRO-DOPPLER

- 14039 08 **Amplitude monopulse micro-Doppler S-band radar measurements and analysis on a scale-model helicopter** [14039-8]
- 14039 09 **Micro-Doppler signature analysis for aerial target detection and classification** [14039-9]
- 14039 0A **Radar-based vital-sign monitoring using physics-guided skeleton estimation by mitigating random body movements** [14039-11]

MILLIMETER-WAVE SENSING AND IMAGING I

- 14039 0B **Enhanced image reconstruction of complex targets using a distributed radar-repeater network and k-domain processing** [14039-13]

MILLIMETER-WAVE SENSING AND IMAGING II

- 14039 OD **Low-cost precision scanning platform for mm-wave SAR imaging using a modified 3D printer** [14039-15]
- 14039 OE **Experimental NLOS localization using real-world environmental clutter with RCS variation in a radar-repeater system** [14039-16]
- 14039 OF **Stepped frequency continuous-wave software-defined radar for water-level sensing** [14039-17]
- 14039 OG **Millimeter-wave radar sensing of mobile robots** [14039-18]
- 14039 OH **Loaded waveguide dielectric measurements of powdered erythritol tetranitrate** [14039-19]

NOISE, LPI, AND NON-LINEAR RADAR

- 14039 OI **High-dynamic range measurements for the development of a harmonic radar system** [14039-20]
- 14039 OJ **Metrics for evaluating low probability of detection radar waveforms (Early Career Research Award)** [14039-21]
- 14039 OK **A multichannel wideband noise radar** [14039-22]

ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING FOR RADAR

- 14039 OL **From data acquisition to AI-based motion classification: an early-career faculty-led platform for undergraduate micro-Doppler radar experiments** [14039-24]
- 14039 OM **Cognitive radar and AI: advancing smarter, resilient RF systems** [14039-25]
- 14039 ON **In-cabin passenger state determination using mmWave radar based on vehicle entry and exit activities** [14039-26]
- 14039 OO **Diffusion-model-based ground clutter suppression for distributed multiview radar imaging** [14039-28]

POSTER SESSION

- 14039 OP **Application of the localized plane wave approximation to MBOR scattering** [14039-27]
- 14039 OQ **A study of drone tracking by linear motion and coordinated turn models** [14039-29]
