Sponsored and Published by
SPIE

Volume 14040

Proceedings of SPIE 0277-786X, V. 14040

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Laser Radar Technology and Applications XXXI*, edited by Gary W. Kamerman, Lori A. Magruder, Monte D. Turner, Proc. of SPIE 14040, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

ADVANCED SYSTEMS DESIGN AND PERFORMANCE

- 14040 02 **Fathom: high-resolution topobathy Lidar for inland and coastal hydrographic applications**
[14040-1]
- 14040 03 **Mini-MARLI: a small Lidar for measuring of atmospheric wind and aerosol profiles from Mars orbit** [14040-2]
- 14040 04 **Dual-stage MTA resolution for airborne laser scanning** [14040-3]
- 14040 05 **Dual-Doppler Lidar measurements during multimonth field campaign** [14040-4]
- 14040 06 **Design and airborne evaluation of high-altitude Geiger-mode Lidar mapping systems and data processing workflows (Invited Paper)** [14040-5]
- 14040 07 **UniMD3D: a multidataset training framework for point cloud semantic scene understanding**
[14040-6]
- 14040 08 **VNIR-SWIR hyperspectral Lidar for stand-off characterization of gases and aerosols**
[14040-23]

ENABLING COMPONENT TECHNOLOGIES

- 14040 09 **Growth and characterization of nonhygroscopic KPb₂Br₅:CeBr₃ and TIPb₂Br₅:DyBr₃ midinfrared lasing media** [14040-11]
- 14040 0A **CMC electronics InGaAs quadrant detector module for precision beam tracking, alignment, and laser warning systems** [14040-12]
- 14040 0B **NIR hybrid receivers for defense, detection, and communication** [14040-13]

EMERGING CONCEPTS, THEORY, AND MODELING

- 14040 0C **Assessing gap fraction and lacunarity of forest canopy from LiDAR measurements** [14040-7]
- 14040 0D **DARSoC: a radiation-hardened reconfigurable LiDAR SoC for long-range atmospheric sensing** [14040-8]

- 14040 OE **Investigations into frequency modulated continuous wave (FMCW) Lidar architectures and designs** [14040-22]
- 14040 OF **Laser altimetry-enhanced foundation model embeddings for global elevations (Invited Paper)** [14040-10]

REALTIME LIDAR SENSING APPLICATIONS

- 14040 OG **Analog system for detection and tracking of small-size drones based on an innovative optical spectrometer** [14040-15]
- 14040 OH **Real-time embedded safe landing area detection using flash LiDAR and deep neural networks for aerial vehicles** [14040-16]

GMAPD 3D LIDAR DATA PROCESSING

- 14040 OJ **Crosstalk-induced artifacts and resolution degradation in 3D Geiger-mode Lidar data** [14040-20]
- 14040 OK **An end-to-end processing chain for Geiger-mode LiDAR at the edge** [14040-21]
