SPIE

Volume 14043

Proceedings of SPIE 0277-786X, V. 14043

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Artificial Intelligence and Machine Learning for Multi-Domain Operations Applications VIII*, edited by Peter J. Schwartz, Myron E. Hohil, Proc. of SPIE 14043, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

HUMAN-AI TEAMING

- 14043 03 **DataOps-to-decision: reproducible analytics for multisensor aircraft tracking with GoDSAT-AT** [14043-2]
- 14043 05 **Contributing to situation awareness by LLM-based tactical symbol extraction** [14043-4]
- 14043 06 **Demonstrating artificial intelligence's impact on wargaming and operational simulations: implications for planning multidomain operations** [14043-5]

ROBOTIC SYSTEMS

- 14043 07 **Multimodal AI for dismounted soldier-robot teaming and context-aware threat response** [14043-6]
- 14043 08 **Neuromorphic systems to enable AI for next-generation robotic platforms** [14043-7]
- 14043 09 **Information driven reward shaping for improved reinforcement learning in distributed edge-tasks** [14043-8]

ANALYSIS OF AI

- 14043 0A **Artificial intelligence and machine learning for multidomain operations, part II: new approaches, solutions, and opportunities** [14043-9]
- 14043 0C **Use case evaluations for AI adoption in the Department of War (DOW): humans versus large language models (LLMs)** [14043-11]

AI GENERALIZATION

- 14043 0D **A novel cross-domain invention generation framework** [14043-12]
- 14043 0E **ProcgenOOD: a benchmark for out-of-distribution generalization in reinforcement learning** [14043-13]
- 14043 0F **Impossibility engineering: teaching AI to recognize when adversaries change the game** [14043-14]

RISK IDENTIFICATION AND MITIGATION

- 14043 OG **Causal explainable AI (C-XAI) for military risk management** [14043-15]
- 14043 OH **ARMOR: adaptive reasoning for mitigation of operational risk** [14043-16]
- 14043 OI **RL-STPA: a phased mission system approach to safety analysis for reinforcement learning** [14043-17]

3D APPLICATIONS

- 14043 OJ **Automatic intelligent feature extraction** [14043-18]
- 14043 OK **MonoGraph-depth: dynamic graph feature refinement for monocular depth estimation** [14043-19]
- 14043 OL **HoloPose: real-time 3D human pose estimation on Microsoft HoloLens for augmented reality interaction** [14043-20]

OBJECT DETECTION AND TRACKING

- 14043 OM **Improving drone-based object detection using reinforcement learning concepts** [14043-21]
- 14043 ON **Characterizing the effects of bandwidth limitations on video object tracking** [14043-22]

SIGNAL PROCESSING

- 14043 OP **Advancing electromagnetic spectrum operations with knowledge graphs and artificial intelligence** [14043-26]
- 14043 OQ **Deep learning-based encoders for automatic modulation classification** [14043-27]
- 14043 OR **Synthetic data generation and evaluation for positioning, navigation, and timing data using generative AI methods** [14043-28]

ISR APPLICATIONS

- 14043 OT **Bridging the semantic gap: RAG-enhanced search for heterogeneous ISR data in coalition shared data** [14043-30]
- 14043 OU **ADEQUATE: a feature-aware dataset profiling tool for multidomain model adaptation** [14043-31]

- 14043 0V **ORP-diffusion: optical reservoir priors for correlated perturbations in diffusion models**
[14043-32]

RESOURCE-CONSTRAINED AI

- 14043 0W **Vision-language models at the tactical edge: evaluation and challenges for defense-relevant captioning for situation awareness** [14043-33]
- 14043 0X **Joules-per-bit at the edge: bounding and auditing LLM inference energy with RAPL telemetry and FLOPs-to-J models** [14043-34]
- 14043 0Y **Scalable neural architecture search for efficient CNN inference acceleration** [14043-35]

AGENTS AND DATA

- 14043 0Z **Do LLM-derived graph priors improve multiagent coordination?** [14043-36]
- 14043 11 **Enabling high-volume data processing of space-based data via generative AI compression** [14043-40]
- 14043 12 **Who's next? Intelligent prioritization of data for labeling** [14043-41]
- 14043 13 **Cross-model agentic pipeline framework for generative AI disinformation data production**
[14043-42]

POSTER SESSION

- 14043 14 **The AICDS-G system: an intelligent command decision support framework for ground operations** [14043-43]
- 14043 15 **On mode collapse in generative adversarial networks: causes, consequences, and remedies** [14043-44]
- 14043 16 **Comparative study of point cloud, voxel, and mesh representations for 3D semantic object detection** [14043-45]
- 14043 17 **Uncertainty-aware pedestrian detection under occlusion for autonomous driving with lightweight vision transformers** [14043-47]
- 14043 18 **ColFastVLM: lightweight visual document retrieval with on-device multimodal embeddings**
[14043-48]
