

PROCEEDINGS OF SPIE

Autonomous Air and Ground Sensing Systems for Agricultural Optimization and Phenotyping XI

**Abhilash Chandel
Christoph Bauer**
Editors

**27–28 April 2026
National Harbor, Maryland, United States**

Sponsored and Published by
SPIE

Volume 14045

Proceedings of SPIE 0277-786X, V. 14045

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Autonomous Air and Ground Sensing Systems for Agricultural Optimization and Phenotyping XI*, edited by Abhilash Chandel, Christoph Bauer, Proc. of SPIE 14045, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SENSOR TECHNIQUES I

- 14045 02 **Sensitivity analysis of a line-scan hyperspectral camera for the early detection of solar-induced fluorescence (SIF) variations in nitrogen-stressed cotton** [14045-1]
- 14045 03 **Using 3D vision for differential height-based mechanical weeding of vegetables** [14045-2]

SENSOR TECHNIQUES II

- 14045 05 **Bridging the camera gap: evaluating AI-based cross-sensor domain shift in weed detection on the amiga robotic platform** [14045-4]
- 14045 06 **Longwave thermal infrared atmospheric compensation using in situ scene elements: accurate temperature determination of blackbody and graybody targets from small unmanned aircraft systems** [14045-5]
- 14045 08 **Automated radiometric calibration and atmospheric compensation of longwave thermal infrared imagery collected from small unmanned aircraft systems (sUAS)** [14045-7]

ROBOTICS AND AUTOMATION

- 14045 09 **Preliminary development and evaluation of a vision-guided automated chestnut picking with a Delta arm and vacuum end-effector** [14045-8]
- 14045 0C **Learning robot-terrain interaction for improved traversability estimation in agricultural environments** [14045-11]
- 14045 0D **Development of a low-cost UGV for autonomous crop monitoring: navigation optimization using boustrophedon path planning and pure pursuit tracking algorithms** [14045-12]

DATA SCIENCE

- 14045 OE **Soil type image classification using DHG-RF: DenseNet121 and HOG map fusion with Random Forest** [14045-13]
- 14045 OF **Machine-learning method for severity grading of powdery mildew in vineyards using aerial images from UAVs** [14045-14]
- 14045 OG **Deep learning models with a hierarchical method using RGB images from UAV and proximal sensor data for real-time detection of strawberry plant health** [14045-15]

UAV

- 14045 OI **Weed detection in faba bean using unoccupied aerial system imagery and computer vision models** [14045-17]
- 14045 OJ **Development of a quadcopter UAS for early detection of bovine respiratory disease using a YOLO object detector** [14045-18]
- 14045 OK **Evaluating BVLOS high-altitude UAV imagery for precision agriculture applications** [14045-19]
- 14045 OL **Aerial real-time hyperspectral vegetation analysis** [14045-20]
