

PROCEEDINGS OF SPIE

Unmanned Systems Technology XXVIII

**Raja Suresh
Robert Diltz
Christopher T. Goodin**
Editors

**28–29 April 2026
National Harbor, Maryland, United States**

Sponsored and Published by
SPIE

Volume 14047

Proceedings of SPIE 0277-786X, V. 14047

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Unmanned Systems Technology XXVIII*, edited by Raja Suresh, Robert Diltz, Christopher T. Goodin, Proc. of SPIE 14047, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

MULTI-AGENT AUTONOMY FOR MULTI-DOMAIN OPERATIONS I

- 14047 02 **Earthling logic: toward artificial general intelligence** [14047-1]
- 14047 03 **Rigorous reliability control in Monte Carlo analysis of uncertain systems** [14047-2]
- 14047 04 **Distributed planning in teams of unmanned vehicles with agentic AI in a warehouse scenario** [14047-3]
- 14047 05 **High-performance networking for visual stream assessment tasks using UAS-based mobile backhaul infrastructure** [14047-4]

MULTI-AGENT AUTONOMY FOR MULTI-DOMAIN OPERATIONS II

- 14047 06 **Vision-based UAV localization using a fisheye ground-camera network for sensor package deployment in post-disaster structure inspection** [14047-6]
- 14047 07 **Cross-view landmark recognition for cooperative visual navigation** [14047-8]
- 14047 08 **Evaluating controller area network vulnerability threat modeling using cybersecurity frameworks** [14047-9]
- 14047 09 **Federated visual homing for cooperative multirobot navigation in GPS-denied environments** [14047-10]

AUTONOMY FOR UGV AND UAV I

- 14047 0A **Digital twin of proving ground for off-road autonomous driving** [14047-12]
- 14047 0B **Data-enabled evaluation of autonomous ground vehicles: Monte Carlo simulation and CI/CD analytics** [14047-13]
- 14047 0C **Linguistically optimized operational teaming (LOOT): a natural language command and control framework for unmanned ground vehicles using real-time aerial drone imagery** [14047-18]

AUTONOMY FOR UGV AND UAV II

- 14047 OD **A simulation benchmark for LiDAR-based odometry in off-road autonomous vehicles**
[14047-14]

AUTONOMY FOR UGV AND UAV III

- 14047 OF **Investigating vehicle-pedestrian interaction for autonomous vehicles under perception noise based on driver risk assessment** [14047-17]
- 14047 OG **Shadow-based uncrewed aerial system altitude estimation** [14047-19]
- 14047 OH **Automated production flow of lens assemblies enables scalable, low-cost production of high-precision lens assemblies** [14047-20]
- 14047 OI **Field-tested autonomy: operational insights from UAS-based live streaming of the Army/Navy cross country race** [14047-21]

MULTI-AGENT AUTONOMY FOR MULTI-DOMAIN OPERATIONS III

- 14047 OJ **Tactical survivability through predictive world modeling: a JEPA-based approach for intelligent unmanned systems** [14047-27]
- 14047 OK **Multidomain sensor fusion and coordinated tasking for autonomous agent systems**
[14047-25]
- 14047 OL **Emergency safe landing zone selection in unmanned aerial systems** [14047-26]

POSTER SESSION

- 14047 OM **Monocular-vision-based 3D obstacle detection with a single degree-of-freedom roll joint**
[14047-22]

DIGITAL POSTER SESSION

- 14047 ON **Reinforcement learning for multiagent intersection navigation in autonomous driving**
[14047-11]
