

PROCEEDINGS OF SPIE

Chemical, Biological, Radiological, Nuclear, and Explosives (CBRNE) Sensing XXVII

**Christopher R. Howle
Tanya L. Myers
Christopher C. Carter**
Editors

**27–30 April 2026
National Harbor, Maryland, United States**

Sponsored and Published by
SPIE

Volume 14048

Proceedings of SPIE 0277-786X, V. 14048

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Chemical, Biological, Radiological, Nuclear, and Explosives (CBRNE) Sensing XXVII*, edited by Christopher R. Howle, Tanya L. Myers, Christopher C. Carter, Proc. of SPIE 14048, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

CHEMICAL HAZARD SENSING I

- 14048 02 **Detection of thin layer surface contaminations using a QCL-based active IR spectrometer** [14048-1]
- 14048 03 **Dual comb QCL spectroscopy of threat chemical vapors** [14048-2]
- 14048 04 **Infrared signatures of the adsorption and photocatalysis of diisopropyl methylphosphonate (DIMP), a chemical warfare agent simulant, on kaolinite-based minerals** [14048-3]
- 14048 05 **High-sensitivity gas-phase detection using Raman Spectroscopy within a hollow-core microstructured optical fiber** [14048-5]

MICROSENSORS AND INTEGRATED PHOTONICS

- 14048 06 **Long-wave infrared frequency comb generator for chemical agent and explosive precursor detection** [14048-8]

REMOTE AND BIOLOGICAL HAZARD SENSING

- 14048 07 **CBRN reconnaissance and surveillance system** [14048-10]
- 14048 08 **AI-guided protein design for detection and countermeasure development for biological targets** [14048-12]
- 14048 09 **AeroSeq: toward automated aerosol genomic surveillance** [14048-13]

AEROSOL CHARACTERIZATION

- 14048 0A **Static aerosol test panels as standoff detection performance targets** [14048-14]
- 14048 0B **Angle-resolved scattering from aerosols and surfaces using broadband LWIR laser spectroscopy** [14048-15]
- 14048 0C **Ambient air test facility: a validation platform for multi-instrument CBRNE aerosol detection systems** [14048-16]

- 14048 OD **Infrared spectroscopic signatures of static aerosol panels** [14048-17]
- 14048 OE **Rapid in situ detection and identification of aerosolized chemicals of interest using the aerodyne high-resolution time-of-flight aerosol mass spectrometer (HTOF-AMS)** [14048-18]
- 14048 OF **Aerosol discrimination using extinction and backscattering-to-extinction ratios measured by a dual-wavelength lidar** [14048-19]

EXPLOSIVE MATERIAL SENSING

- 14048 OG **Depth estimation of a subsurface object by machine learning** [14048-22]
- 14048 OH **Classifying explosives by geometrical separation of their mass spectra** [14048-23]

RADIOLOGICAL AND NUCLEAR SENSING

- 14048 OI **Uncertainty quantification of fireball features extracted from nuclear test films using computer vision** [14048-25]
- 14048 OJ **YOLO11 to SAM2 pipeline for feature extraction from nuclear test films** [14048-26]
- 14048 OK **Machine learning-assisted automated gamma radiation detection using CsPbBr₃ coated fiber Bragg grating sensors** [14048-27]

JOINT SESSION WITH CONFERENCES DS101 AND DS306

- 14048 OL **Coherent Raman spectroscopy for noncontact trace chemical sensing** [14048-28]
- 14048 OM **Chromatoscopy: a new paradigm in chemical sensing** [14048-29]
- 14048 ON **Compact 247.5nm CW laser for fluorescence-free stand-off Raman spectroscopy** [14048-30]

CBRNE FORENSICS

- 14048 OO **Improving nerve agent detection using paper-based microfluidics and surface enhanced Raman spectroscopy** [14048-32]
- 14048 OP **Body-on-a-chip-technology for symptomatic-based toxicity determination of CBRN-agents** [14048-33]

AI/ML ALGORITHMS FOR CBRNE SENSING

- 14048 0Q **White-box test-time steering degrades CBRNE refusals in LLMs** [14048-36]
- 14048 0R **Estimating inverse system response functions using deep learning for compressed sensing** [14048-38]
- 14048 0S **Pretty peaks to messy streets: taking machine learning for spectroscopy from the lab to production: challenges and lessons learned** [14048-39]

ADVANCES IN CBRNE SIGNATURES AND SENSOR ALGORITHMS

- 14048 0T **Arbitrary-shape scatterer models for interpretation of optical spectral data** [14048-40]
- 14048 0U **Improving infrared spectral detection of solids and liquids by using the complex refractive indices** [14048-42]
- 14048 0V **Advances in molecular dynamics models for sublimation of explosives materials** [14048-41]
- 14048 0W **Infrared spectral modeling and simulation of multicomponent aerosol clouds** [14048-43]
- 14048 0X **Vibrational spectroscopy for the standoff detection of organic phosphorous agents on realistic background material** [14048-44]

CHEMICAL HAZARD SENSING II

- 14048 0Y **The impact of sample aging on hyperspectral imaging data** [14048-50]
- 14048 0Z **Vapor detection using MIR and comb-like quantum cascade laser** [14048-51]

HOW CLEAN IS CLEAN? DECONTAMINATION VERIFICATION DTRA WORKSHOP SESSION

- 14048 10 **How clean is clean? S and T challenges and perspectives on surface contamination detection and decontamination verification (Invited Paper)** [14048-56]

POSTER SESSION

- 14048 11 **Explosive sensing at stand-off with QCL dual comb spectroscopy** [14048-52]
- 14048 13 **Miniaturized airborne threat assessment and detection sensor (MATADOR)** [14048-55]
