Volume 14190

Proceedings of SPIE 0277-786X, V. 14190

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Advanced Materials for Optics and Photonics: Chemistry and Engineering Perspectives (AMOP 2026)*, edited by Sherzod Korabayev, Abdurahim Okhunov, Eduard I. Zenkevich, Rustamjon Rakhimov, Proc. of SPIE 14190, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

ADVANCED MATERIALS FOR OPTICS AND PHOTONICS: CHEMISTRY AND ENGINEERING PERSPECTIVES (AMOP 2026)

- 14190 02 **Modern methods of monitoring and quantitative assessment of drilling fluid absorption during well drilling** [14190-1]
- 14190 03 **Computational wavelet lifting approaches for noise reduction and detail enhancement in optical material imaging** [14190-2]
- 14190 04 **Evaluation of optical imaging accuracy restoration using lifting filters method** [14190-3]
- 14190 05 **Effect of thermal treatment on the structural, optical and photoelectric properties of solar cells based on $\text{Cu}_{2-x}\text{CdS}-\text{CdTe}$** [14190-4]
- 14190 06 **Synthesis of the mercury phosphotungstate ionophore and its analysis** [14190-5]
- 14190 07 **Synthesis of ionophores for ion-selective electrodes sensitive to heavy metal ions based on the ligand 6-nitroquinazolin-4(3H)-one** [14190-6]
- 14190 08 **Composition, structure, and analysis of a nickel-selective electrode membrane based on a $\text{Ni}_3[\text{PMo}_{12}\text{O}_{40}]$ ionophore** [14190-7]
- 14190 09 **Composition and structure of an ion-selective electrode membrane based on lead phosphomolybdate ionophore analyzed using modern instruments** [14190-8]
- 14190 0A **Development and characterization of elastic fabrics with enhanced functional properties for technical applications** [14190-9]
- 14190 0B **Computational analysis of optical materials based on simulated data** [14190-10]
- 14190 0C **Optical spectroscopic monitoring and structural characterization of NPK suspension systems for smart agrochemical applications** [14190-11]
- 14190 0D **Data-driven prediction of optical material properties using machine learning** [14190-12]
- 14190 0E **Oxidation of ethylene on microspherical catalysts** [14190-13]
- 14190 0F **Technological characteristics of the process of oxidative chlorination of ethylene with hydrogen chloride in the presence of oxygen** [14190-14]
- 14190 0G **AI-assisted modeling of light propagation in layered biological photonic media** [14190-15]

- 14190 OH **A comprehensive analysis of energy-efficient water harvesting technologies using optical materials** [14190-16]
- 14190 OI **Photonic smart materials for sustainable energy-efficient building envelopes in hot arid climates** [14190-17]
- 14190 OJ **Mechanical characterization of natural silk-based technical textiles for electrical insulation applications** [14190-18]
- 14190 OK **Preparation of natural silk raw material for carpet products and research of physical and mechanical properties** [14190-19]
- 14190 OL **Influence of active component composition on the formation of benzene homologues under photocatalytic conditions** [14190-20]
- 14190 OM **Physicochemical investigation of dimethyl ether synthesis over advanced functional catalysts derived from local raw materials** [14190-21]
- 14190 ON **Kinetic analysis of ethanol-to-divinyl conversion with implications for photonic and advanced catalytic systems** [14190-22]
- 14190 OO **Mechanistic kinetic network for ethanol-to-butadiene: selectivity control via acid–base site engineering** [14190-23]
- 14190 OP **Controlled photooxidation of polymer products under UV irradiation for the formation of light-sensitive properties** [14190-24]
- 14190 OQ **Catalytic conversion of lower aliphatic alcohols over high-silica zeolite cationites for the synthesis of acetal compounds** [14190-25]
- 14190 OR **Catalytic conversion of ethanol and propane–butane mixtures over mesoporous zeolite cationites: an advanced functional materials perspective** [14190-26]
- 14190 OS **Thermodynamic analysis of propane–butane fraction conversion into olefins over advanced catalytic material systems** [14190-27]
- 14190 OT **Influence of zinc salts on organic reaction pathways during light-assisted propane–butane aromatization over high-silica catalysts** [14190-28]
- 14190 OU **Isolation and photochemical characterization of flavonoids from the leaves of *Scutellaria guttata* (spotted skullcap)** [14190-29]
- 14190 OV **Advanced materials-assisted synthesis of methanol and dimethyl ether from local raw materials and process characteristics** [14190-30]
- 14190 OW **Optimization of catalyst modifier composition in advanced functional materials for high-molecular hydrocarbon production from syngas** [14190-31]
- 14190 OX **Effect of sodium-based promoters and their concentration on the catalytic synthesis of high-molecular hydrocarbons from CO and H₂ over advanced functional materials** [14190-32]

- 14190 0Y **Investigation of advanced reactor systems for catalytic conversion of methane to ethylene** [14190-33]
- 14190 0Z **Catalytic oxidative coupling of methane for ethylene and ethane production: kinetics, modeling, and reactor hydrodynamics** [14190-34]
- 14190 10 **Kinetic modeling of methane oxidative dimerization over advanced oxide functional materials for energy applications** [14190-35]
- 14190 11 **Ethylene production from methane via oxidative coupling over advanced functional catalysts: kinetics and selectivity control** [14190-36]
- 14190 12 **Study of the texture and physicochemical characteristics of catalysts used in the reaction of obtaining low molecular ethylene hydrocarbons by catalytic pyrolysis of monochloromethane** [14190-37]
- 14190 13 **Development of composite granules from polyethylene and polypropylene waste: physical and mechanical properties** [14190-38]
- 14190 14 **Preparation and characterization of a composite activated sorbent based on peanut shells and ailanthus sawdust** [14190-39]
- 14190 15 **Development of polyaniline-based composite ion-exchange materials and investigation of their physicochemical properties** [14190-40]
- 14190 16 **Improved operational stability of perovskite solar cells via incorporation of a multifunctional polymer additive** [14190-41]
- 14190 17 **Advances in quantum photonics and spin-based quantum computing: a comprehensive analysis of materials** [14190-42]
- 14190 18 **Nanophotonic and photothermal materials for solar energy harvesting and sustainable thermal management** [14190-43]
- 14190 19 **Integrated photonic systems and materials for high-speed communication, quantum networks, and intelligent optical computing** [14190-44]
- 14190 1A **Advanced functional materials for next-generation photonic and optoelectronic devices** [14190-45]
- 14190 1B **High-voltage photon-injection pulse thyristors with optical couplings based on low-doped layers of GaAs–AlGaAs heterostructures** [14190-46]
- 14190 1C **Kinetics of swelling of polyvinyl alcohol gel and PVA–magnetite composite in an electrolyte medium** [14190-47]
- 14190 1D **Quantum sensors and metrology: evidence-based systematic analysis of photonic, atomic, and machine-learning-assisted platforms for sub-shot-noise precision measurement (2020–2025)** [14190-48]

- 14190 1E **Optomechanical control of long-lived bulk acoustic phonons in the quantum regime: ground-state cooling and coherent photon–phonon conversion** [14190-49]
- 14190 1F **Advanced photonic crystal materials and nanophotonic devices for quantum technologies, optical sensing, and integrated photonic systems** [14190-50]
- 14190 1G **Optomechanical control of x-ray photons via nuclear-resonant cavities: bridging optical and hard x-ray regimes** [14190-51]
- 14190 1H **Quantum photonic materials beyond silicon** [14190-52]
- 14190 1I **Near-infrared persistent luminescent hybrid materials for broadband optical amplifiers and multidimensional data storage** [14190-53]
- 14190 1J **Nonlinear optical materials and all-optical switching** [14190-54]
- 14190 1K **Hybrid AI–physics modeling for predicting optical behavior of nanostructured materials** [14190-55]
- 14190 1L **Deep learning–assisted discovery of advanced optical materials for photonic applications** [14190-56]
- 14190 1M **Machine learning–driven computational design of high-performance optical materials** [14190-57]
- 14190 1N **AI-driven computational framework to predict the properties of photonic materials by simulation and machine learning methods** [14190-58]
- 14190 1O **Data-driven discovery of novel optical materials through machine learning algorithms** [14190-59]
- 14190 1P **Bio-enhancement of textile materials dyeing processes** [14190-60]
- 14190 1Q **Optical diagnostic techniques for physical analysis of coal dust explosion hazards** [14190-61]
- 14190 1R **Properties of coal dust and its effects on the human body** [14190-62]
- 14190 1S **Obtaining modifiers for polymers by epoxidation of technical vegetable oils** [14190-63]
- 14190 1T **Numerical integration methods for engineering and optical system modeling: rectangle and trapezoidal approaches** [14190-64]
- 14190 1U **Methods for handling peculiarities in plate bending problems for optomechanical application** [14190-65]
- 14190 1V **Optical and microstructural analysis of K_2CO_3 -desulfated phosphoric acid for advanced material applications** [14190-66]

- 14190 1W **Synthesis and structural characterization of silicon-containing zeolites for advanced material applications** [14190-67]
- 14190 1X **Changes in the Debye length in two-dimensional junction under the influence of external voltage, temperature and light** [14190-68]
- 14190 1Y **Bridging quantum optics and photonic engineering: a systematic literature review** [14190-69]
- 14190 1Z **Solid-state synthesis of homoleptic complex with 2,9-dimethyl-4,7-diphenyl-1,10-phenanthroline for dye-sensitized solar cell application** [14190-70]
- 14190 20 **Nanophotonic optical manipulation: fiber-based tweezers, metamaterial platforms, and on-chip optofluidic integration for micro and nano-scale particle control** [14190-71]
- 14190 21 **Formation of an optical layer based on Li-Mn spinel for the determination of Li⁺ by sorption spectrometry** [14190-72]
- 14190 22 **Numerical modelling and comparative analysis of 2D-material-integrated optical fibers for enhanced nonlinear photonic functionality** [14190-73]
- 14190 23 **Thermally stable amine–amide corrosion inhibitors for carbon steels in sulfuric acid: toward sustainable protection of energy infrastructure** [14190-74]
- 14190 24 **Engineering and optical-infrared radiation shielding potential of phosphorite-based fire-resistant composites** [14190-75]
- 14190 25 **Quantum-dot single-photon sources integrated with reconfigurable silicon nitride photonic circuits for scalable quantum information processing** [14190-76]
- 14190 26 **Chemical modification of chlorine-containing polymers with hexamethylenediamine for Mo(VI) sorption** [14190-77]
- 14190 27 **Perovskite-based photovoltaics: stability challenges and engineering solutions for sustainable energy generation** [14190-78]
- 14190 28 **Influence of cotton drying processes on raw material components: a basis for real-time optical monitoring and control** [14190-79]
- 14190 29 **Synthesis and study of dental polymeric material** [14190-80]
- 14190 2A **The influence of a selective catalyst on the cyclization process of liquid paraffin hydrocarbons in synthetic naphtha** [14190-81]
- 14190 2B **Using ultraviolet lamp to enhance the natural feeding efficiency of fish that feed on mosquitoes** [14190-82]
- 14190 2C **Study of the antimicrobial activity of iodine-containing dressings in the treatment of purulent wounds** [14190-83]

- 14190 2D **Synthesis of fluorescent-magnetic silicon quantum dots/ Fe_3O_4 nanocomposites and their application as bioimaging and MRI contrast agent** [14190-84]
- 14190 2E **Separation of nitric acid in Anionit AM by acid retardation and optical micrometry methods** [14190-85]
- 14190 2F **Sol-gel synthesis and physicochemical properties of La-modified ZnO-based nanostructured photocatalytic materials** [14190-86]
- 14190 2G **IR-spectral analysis of complexes formed during the process of purifying water from heavy metal ions** [14190-87]
- 14190 2H **Increasing the efficiency by collecting solar energy onto a solar panel using a reflector** [14190-88]
- 14190 2I **Removal of metal ions from industrial wastewater with bentonite-modified chitosan *Apis mellifera*** [14190-89]
- 14190 2J **Prospects of combination of power plants technology** [14190-90]
- 14190 2K **Synthesis of nanocomposites based on hybrid quantum dots and their physicochemical properties** [14190-91]
- 14190 2L **Synthesis and physicochemical properties of carbon-based quantum dot and polymer composites** [14190-92]
- 14190 2M **Modeling of a thin-layer copper nanostructure using the MD method** [14190-93]
- 14190 2N **Simulation of swirling jet flows based on two-fluid turbulence model** [14190-94]
- 14190 2O **Investigation of the optoelectronic properties of natural plant-derived *Typha* surfaces treated with chemical elements** [14190-95]
- 14190 2P **Influence of magnetic field and temperature on the surface density of states in semiconductor structures** [14190-96]
- 14190 2Q **Determination of the dependence of magnetic field susceptibility in low-dimensional semiconductor structures on temperature, pressure, and strong electromagnetic field** [14190-97]
- 14190 2R **Magnetic field dependence of the two-dimensional density of states in narrow-band quantum well semiconductor structures** [14190-98]
- 14190 2S **Perovskite solar cells and modules: pathways to high efficiency, long-term stability, and scalable manufacturing** [14190-99]
- 14190 2T **Synthesis and engineering of safety performance evaluation of road trains for transporting optical materials** [14190-100]

- 14190 2U **Development and characterization of composite organic compounds for reducing environmental impact of copper tailings** [14190-101]
- 14190 2V **Analysis of functional groups of compounds obtained by infrared spectroscopy** [14190-102]
- 14190 2W **Development of a technology for the production of corrosion inhibitors based on a mixture of alkylimidazolines** [14190-103]
- 14190 2X **Solvent formulation for the efficient removal of asphalt-resin-paraffin deposits** [14190-104]
- 14190 2Y **Determination of the structure and spatial composition of a new catalyst for acetaldehyde synthesis based on SEM and XRD** [14190-105]
- 14190 2Z **Photonic monitoring and optimization of catalyst structure in ethylene oxychlorination for vinyl chloride production** [14190-106]
