

PROCEEDINGS OF SPIE

International Conference on Remote Sensing, Surveying, and Mapping (RSSM 2026)

Fei Meng
Hongquan Song
Editors

16–18 January 2026
Chongqing, China

Organized by
Southwest Jiaotong University (China)
Henan University (China)
University of Electronic Science and Technology of China (China)

Sponsored by
Chongqing Jiaotong University (China)

SPIE

Volume 14237

Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 14237

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Remote Sensing, Surveying, and Mapping (RSSM 2026)*, edited by Fei Meng, Hongquan Song, Proc. of SPIE 14237, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

xiii	Introduction

Part One

INTELLIGENT PROCESSING METHODS FOR REMOTE SENSING

14237 02	A crop recognition method based on deep learning for multitemporal remote sensing images [14237-58]
14237 03	SAR ship detection algorithm based on attention mechanism and adaptive feature fusion [14237-154]
14237 04	LEMfusion: lightweight edge-enhanced multimodal fusion for UAV infrared-visible target detection [14237-151]
14237 05	A method based on GDAL localization of pixel (0,0,0) values in multispectral images [14237-134]
14237 06	ATG-RFM: adaptive thresholding with GMM-OTSU for flooded rice mapping [14237-80]
14237 07	Enhanced GNSS-R sea ice classification via Doppler-aware vision transformer [14237-53]
14237 08	Soil moisture retrieval in winter wheat fields using CNN-CPO-RF hybrid model [14237-12]
14237 09	Joint CLEAN with multi-PRN reference kernels and ridge-masked CFAR for GNSS-S target detection [14237-97]
14237 0A	SDAN: a scene-adaptive and density-aware optimal association network for SAR and AIS [14237-10]
14237 0B	Satellite calibration sequencing based on genetic algorithm with minimum angle criterion [14237-9]
14237 0C	SASS-net: scattering-attention guided semi-supervised learning for zero-shot SAR target detection [14237-109]
14237 0D	A lightweight dual-branch CNN with attention and cross-polarization fusion for land-cover classification using SAR imagery [14237-501]
14237 0E	Pre-training method of sensitive aircraft detection model based on fine-grained attribute guidance [14237-139]

- 14237 OF **MSF-PointPillars: multiscale fusion PointPillars for 3D object detection** [14237-31]
- 14237 OG **Recognition of typical ground objects from UAV-LiDAR data using potential target occupancy regions** [14237-44]
- 14237 OH **Bathymetric photon extraction based on ICESat-2 data** [14237-36]
- 14237 OI **Hyperspectral image classification of SS-ELM-LRF** [14237-39]
- 14237 OJ **Fire spot detection algorithm combining normalized radiation angles with prior datasets** [14237-65]
- 14237 OK **LF-YOLO: an object detector based on lightweight convolution for remote sensing images** [14237-56]
- 14237 OL **A method for object detection of insulator strings based on SAM and rule constraints** [14237-27]
- 14237 OM **Method for the geometric accuracy detection of wide-area ZY-3 satellite images** [14237-122]
- 14237 ON **Research on 3D LiDAR point cloud classification based on SOM-K-CNN algorithm** [14237-20]
- 14237 OO **Foundation model embeddings for cropland extraction in fragmented mountainous landscapes: robustness and data efficiency** [14237-48]
- 14237 OP **Pixel space based mahalanobis density peaks method for hyperspectral band selection** [14237-91]
- 14237 OQ **Multitarget collaborative identification in manned/unmanned mixed operations in flight zones based on multisource sensing data** [14237-148]
- 14237 OR **Multiseasonal remote sensing land cover mapping of the East Dongting Lake wetland integrating channel attention and LSTM networks** [14237-77]
- 14237 OS **An arbitrary-oriented detector for automated extraction of floating rafts from high-resolution remote sensing images** [14237-23]
- 14237 OT **PAN-WAttNet: category-aware window attention with bidirectional path aggregation for urban scene semantic segmentation** [14237-57]
- 14237 OU **RS-TinyNet: a multidimensional attention network for tiny object detection in remote sensing imagery** [14237-7]
- 14237 OV **A dual-stream framework for optimizing remote sensing image processing in spatiotemporal big data analysis** [14237-69]
- 14237 OW **A study on land cover classification methods for remote sensing images based on image segmentation** [14237-63]

- 14237 0X **Target elevation inversion based on single-scene imagery** [14237-123]
- 14237 0Y **Single-photon LiDAR for high-speed moving targets over wide range of distances** [14237-89]
- 14237 0Z **Application of GaoFen-14 satellite hyperspectral image for land cover fine classification**
[14237-133]
- 14237 10 **Maritime tiny ship detection based on structural re-parameterization and scale-aware enhancement of YOLOv8s** [14237-108]
- 14237 11 **Application of improved K-means algorithm with optimized initial cluster centers in remote sensing image classification** [14237-16]
- 14237 12 **Intelligent detection method for power supply system insulators based on deep contrastive learning** [14237-136]
- 14237 13 **Spatio-temporal edge-aware multitask learning for high-resolution remote sensing change detection** [14237-49]
- 14237 14 **Dynamic synergistic dual-domain adversarial network for satellite imagery restoration on edge platforms** [14237-92]
- 14237 15 **IBBSNet: an information bottleneck-based network for hyperspectral band selection**
[14237-82]
- 14237 16 **A machine learning method for detecting incorrect GNSS integer ambiguity fixing**
[14237-34]
- 14237 17 **Land cover classification in mountainous regions using AlphaEarth foundation embeddings: a case study in Guizhou Province, China** [14237-70]
- 14237 18 **Neuro-symbolic transformer for self-supervised learning of spatiotemporal emission data**
[14237-24]
- 14237 19 **ALFormer: a lightweight transformer network with anchor-token bridge attention for self-supervised cross-modal descriptor generation** [14237-1]
- 14237 1A **DLE-Net: a landslide classification ensemble model based on pre-trained DINOv2**
[14237-153]
- 14237 1B **An improved transformer with coordinate attention and BCE-dice loss for landslide detection** [14237-25]
- 14237 1C **Integrating spectral indices and PELT detection for dynamic urban transition analysis in the Greater Bay Area** [14237-81]
- 14237 1D **RFGWRK: a hybrid downscaling framework for high-resolution precipitation mapping in geohazard-prone mountainous regions** [14237-88]
- 14237 1E **Omni-Tridos: omni-dimensional self-attention enhanced triple-domain feature learning for moving infrared small target detection** [14237-113]

- 14237 1F **Validating the accuracy of SWOT microwave radiometer observations based on GNSS wet delay** [14237-78]

ENVIRONMENTAL MONITORING AND SURFACE EVOLUTION

- 14237 1G **An improved algorithm for detecting ocean fronts based on high-accuracy satellite remote sensing data: distribution and variability of persistent fronts in the northwest Pacific** [14237-143]
- 14237 1H **Research on difference change detection algorithm for geological defects in Shishi Power Plant** [14237-159]
- 14237 1I **Evaluation of applicability of two precipitation datasets in the YunGui plateau** [14237-106]
- 14237 1J **Ecological characteristics and evolution of northwest China based on remote sensing ecological indices: a case study of Xining City** [14237-107]
- 14237 1K **Spatiotemporal characteristics of production-living-ecological space evolution in plain region around Bohai sea** [14237-32]
- 14237 1L **Analysis of surface temperature changes in Nan'an District, Chongqing City after 2000** [14237-121]
- 14237 1M **Analysis of groundwater storage anomalies and driving factors in Gansu province based on GRACE/GRACE-FO satellite observations** [14237-116]
- 14237 1N **Evolution of vegetation NDVI and its response mechanism according to MODIS products in Qinling Mountains of Shaanxi, China** [14237-22]
- 14237 1O **Forest aboveground biomass retrieval in Hainan island by integrating multisource remote sensing and machine learning** [14237-137]
- 14237 1P **Application of generative few-shot learning for remote sensing-based damage assessment of power transmission towers** [14237-11]
- 14237 1Q **A dynamic predication model for surface subsidence coupling spatial and temporal influences** [14237-149]
- 14237 1R **Direct extraction of intertidal characteristic boundaries based on time series exposure frequency** [14237-105]
- 14237 1S **Research on low-saliency road identification and path optimization under high-resolution remote sensing** [14237-66]
- 14237 1T **Flood water segmentation and disaster assessment using YOLO and Sentinel-1A data: a case study of the 2024 Meizhou flood, Guangdong** [14237-120]

- 14237 1U **Extraction and dynamic monitoring of impervious surfaces in Nanchang metropolitan area coupled with nighttime light remote sensing** [14237-37]
- 14237 1V **Emotional effects of urban functional mix: spatial mechanisms revealed by multisource urban big data** [14237-30]

Part Two

- 14237 1W **Spatiotemporal dynamics of urban ecological quality in Jinan from remote sensing** [14237-72]
- 14237 1X **Research on farmland extraction in the Lower Liaohe Plain based on Sentinel-2 imagery and planting structure zoning** [14237-45]
- 14237 1Y **The synergistic effect mechanism of land subsidence and shoreline erosion on coastal zone risk** [14237-61]
- 14237 1Z **Spatial optimization models for water resources allocation integrating remote sensing imagery and surveying information** [14237-28]
- 14237 20 **Spatial distribution characteristics and influencing factors of leisure agriculture in Heilongjiang province** [14237-128]
- 14237 21 **Research on land use change and landscape ecological risk assessment under Park City construction: a case study of Shenyang's main urban area (2000-2023)** [14237-55]
- 14237 22 **Three-dimensional thermal and haline structure of mesoscale eddies in the Kuroshio extension: a composite analysis integrating satellite and Argo observations** [14237-142]
- 14237 23 **Identification and monitoring of landslide hazards along railways in mountainous areas using SBAS-InSAR technology** [14237-62]
- 14237 24 **Research on the evaluation of landscape ecological service value and spatial planning optimization of parks based on remote sensing and GIS** [14237-8]
- 14237 25 **Intelligent identification of erosion gullies based on SegFormer: a case study in Hailun City, Heilongjiang Province** [14237-104]
- 14237 26 **Analysis of snowfall at Daxing Airport based on ground observation data and GPM satellite data** [14237-118]
- 14237 27 **Monitoring and analysis of land subsidence in coal mines under paste filling mining conditions** [14237-73]
- 14237 28 **Risk assessment and prediction of illegal construction waste dumping using GIS and multi-criteria decision analysis** [14237-115]
- 14237 29 **Shoreline evolution and seabed morphodynamic changes in the coastal waters adjacent to Daishan Island** [14237-76]

- 14237 2A **Forest fuel load estimation from sentinel-2A and UAV data with spectral mixture model and canopy height model** [14237-129]
- 14237 2B **Forest wildfire risk assessment of BiJie in GuiZhou Province based on driving factors with multisource remote sensing data** [14237-102]
- 14237 2C **Spatiotemporal distribution and influencing factors of traditional villages in Guilin** [14237-43]
- 14237 2D **Characteristics and dynamic mechanisms of Oujiang Estuary evolution based on remote sensing and field data** [14237-84]
- 14237 2E **Analysis of the causes and observational characteristics of the heavy rainstorm in Liaoning on July 29–30, 2025** [14237-93]
- 14237 2F **Alpine wetland mapping using multisource remote sensing data: a case study in the source region of Yangtze River** [14237-85]
- 14237 2G **Attribution of riverside urban flood sources based on integrated remote sensing precipitation and hydrological modeling** [14237-86]
- 14237 2H **Research on airport clearance application based on high-resolution remote sensing images** [14237-155]
- 14237 2I **Thermodynamic and dynamic structure evolution and phase space characteristics of the northward-moving typhoon Bavi (2008)** [14237-14]
- 14237 2J **Effect of mantle anelastic dispersion on ocean tide loading modelling in Southwestern coastal region of United States** [14237-83]
- 14237 2K **Evaluating tourist attractions and analyzing their transport accessibility based on online information sources: a case study of Beihai City, China** [14237-135]

HIGH-PRECISION SURVEYING, MAPPING, AND NAVIGATION

- 14237 2L **Research on optimization and application of power grid infrastructure construction business processes based on data-driven approach** [14237-130]
- 14237 2M **Application of handheld SLAM 3D laser scanning technology in ancient architecture modeling and surveying** [14237-29]
- 14237 2N **Short-term prediction of ionospheric total electron content based on deep neural network models** [14237-21]
- 14237 2O **High-precision GNSS tropospheric delay model based on Kriging interpolation** [14237-119]
- 14237 2P **A unified management framework and platform for multisource heterogeneous spatiotemporal data in new electricity systems** [14237-99]
- 14237 2Q **Dual-Kalman-filter-based tracking for DS/FH navigation signals** [14237-42]

- 14237 2R **Python software design and application for complex precision geodetic surveying projects**
[14237-50]
- 14237 2S **Reconstructing indoor parking garage topology maps using semantic information from images** [14237-54]
- 14237 2T **Research on a representation method for 3D building roof models based on a hierarchical topology graph** [14237-35]
- 14237 2U **Cloud-based processing and image recognition computing system and application for borehole logging** [14237-95]
- 14237 2V **Research on ship trajectory prediction based on LSTM and attention mechanism**
[14237-141]
- 14237 2W **A main-auxiliary filtering algorithm for robust SINS/GPS integrated navigation under strong interference** [14237-6]
- 14237 2X **Monitoring and mechanism analysis of reservoir-induced crustal vertical deformation based on GNSS precise point positioning** [14237-157]
- 14237 2Y **Integration of UAV photogrammetry and airborne LiDAR for high-resolution river channel topographic mapping and hydrological modeling** [14237-158]
- 14237 2Z **Fusing ICESat-2 with penetration-depth compensation for precise orbit error correction of bistatic InSAR data in desert areas** [14237-19]
- 14237 30 **BDS-3 PPP performance using CODE and iGMAS products: impact of weighting functions and multi-GNSS integration** [14237-47]
- 14237 31 **Research on wide-area BeiDou/GNSS time transfer based on adaptive stochastic noise constraints** [14237-13]
- 14237 32 **Integrated algorithm based on genetic algorithm for optimizing TRP matrix** [14237-40]
- 14237 33 **Design and implementation of an intelligent guidance system for mine disaster avoidance pathways** [14237-94]
- 14237 34 **Drift-controlled SLAM for large-span railway geometry precision measurement** [14237-38]
- 14237 35 **Application research of unmanned aerial vehicle oblique photogrammetry technology in village planning: a case study of Shanlinwan Village, Shitang Town, Wanyuan City**
[14237-117]
- 14237 36 **Urban traffic flow prediction via data-driven spatiotemporal model** [14237-103]
- 14237 37 **Integrating an enhanced gravity model for POI selection and visit probability prediction in time geography** [14237-15]

- 14237 38 **An improved sequential least squares filtering approach for ambiguity resolution in carrier-phase-based precise relative positioning** [14237-18]
- 14237 39 **Flight test monitoring and auxiliary decision-making technology based on finite state machine** [14237-90]
- 14237 3A **Deep learning-based intelligent navigation aberration identification and automatic early warning** [14237-68]
- 14237 3B **Implementation and accuracy assessment of BeiDou PPP-B2b high-precision positioning algorithm** [14237-111]
- 14237 3C **Uncertainty evaluation of thermocouple parameter calibration results** [14237-51]
- 14237 3D **Research on binocular stereo vision measurement based on the parallax principle** [14237-52]
- 14237 3E **Confirmation of NORAD catalog number 66994 for an Arabian satellite and the simulation of its approaching to #56120 Starlink** [14237-67]
- 14237 3F **Rule engine-based automated quality inspection method for real-scene 3D data: a case study of provincial real-scene 3D data quality inspection and ingestion** [14237-114]
- 14237 3G **Impact of array geometry on inversion robustness in limited-domain ambient noise imaging** [14237-125]
- 14237 3H **Conservation and activation of material cultural through 3D digital geomatics and virtual reality technology in Qinghai section of the Yellow River Basin** [14237-3]
- 14237 3I **Research on intelligent identification of underground pipelines using ground-penetrating radar based on FDTD forward modeling and rolling-spectrum analysis** [14237-156]
- 14237 3J **Research on the construction of a bridge real-scene 3D digital twin platform based on 3D Gaussian splatting** [14237-26]
- 14237 3K **A real-time data fusion system for underground cable detection: multifrequency GPR and high-precision satellite positioning** [14237-100]
- 14237 3L **A simulation model for airborne single-photon LiDAR scanning point clouds** [14237-152]
- 14237 3M **Research on the operation and control system and application of high-resolution special satellite** [14237-33]
- 14237 3N **Accuracy and applicability analysis of Gaofen-7 satellite laser altimetry data in large-scale mapping applications** [14237-138]
- 14237 3O **Analysis of spurious distortion characteristics of navigation signals** [14237-74]
- 14237 3P **Airborne 3D laser scanning for surveying and mapping in a mountainous university campus** [14237-64]
