SPIE

Volume 14263

Proceedings of SPIE 0277-786X, V. 14263

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Power Electronics and Power Conversion (ICPEPC 2026)*, edited by Jianjun Xu, Tianzhen Wang, Proc. of SPIE 14263, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

ENERGY OPTIMIZATION AND GRID-CONNECTED CONTROL

- 14263 02 **Site selection and capacity determination method for hydrogen fuel cell energy storage systems** [14263-6]
- 14263 03 **Testing and evaluation of power regulation performance for megawatt-scale hydrogen fuel cell grid-connected systems** [14263-36]
- 14263 04 **Evaluation method for fuel cell combined heat and power system planning based on a bi-level fuzzy model** [14263-35]
- 14263 05 **Adaptive event triggered disturbance rejection control for grid-connected inverters in photovoltaic microgrids** [14263-7]
- 14263 06 **Research on the evaluation method of distribution network carrying capacity considering the uncertainty of distributed power sources** [14263-22]
- 14263 07 **Dynamic operation and economic performance of a photovoltaic-driven green ammonia system** [14263-33]
- 14263 08 **Interpretable machine learning-based method for predicting solar radiation potential on urban buildings** [14263-18]
- 14263 09 **Bi-objective optimization modeling of virtual power plants based on the NSGA-II algorithm** [14263-25]
- 14263 0A **Investigation of the initial pressure effects on PHCAES system's performance** [14263-4]
- 14263 0B **Synchronization stability analysis for PMSG-based wind farms with VSC-HVDC systems** [14263-27]
- 14263 0C **Congestion surplus allocation in regional electricity markets incorporating virtual power plants** [14263-17]
- 14263 0D **Research on hierarchical collaborative optimization and resilience enhancement strategies for microgrid clusters in new power systems** [14263-9]
- 14263 0E **Adaptive control of digital flexible load resources in intelligent grids driven by artificial intelligence** [14263-30]
- 14263 0F **Photovoltaic MPPT strategy based on improved hippopotamus optimization algorithm** [14263-16]

- 14263 OG **Research on coordinated power load planning methods for optimising urban energy structures** [14263-28]
- 14263 OH **Research on energy structure optimisation and carbon emissions assessment based on electricity big data** [14263-29]
- 14263 OI **Research on energy consumption optimization and load forecasting driven by electric power big data** [14263-26]

POWER SYSTEM AND DIAGNOSIS TECHNOLOGY

- 14263 OJ **Research on modeling and simulation of transformer winding equivalent circuit** [14263-8]
- 14263 OK **A cloud-native approach to scheduling and optimization in distribution automation systems** [14263-38]
- 14263 OL **Improved honey badger algorithm and LSSVM oil-immersed transformer fault diagnosis** [14263-11]
- 14263 OM **Research on improved fishing optimization algorithm and optimization of steam turbine reducer** [14263-13]
- 14263 ON **Analysis of harmonic temperature rise characteristics of oil-immersed transformers based on a non-uniform internal heat source model** [14263-24]
- 14263 OO **Research on optimal configuration of distributed generation based on multiscenario analysis** [14263-12]
- 14263 OP **Harmonic mitigation and economic operation strategy for oilfield distribution networks based on passive-active coordinated optimization** [14263-10]
- 14263 OQ **Coordinated control strategy of RSC-GSC for DFIG under unbalanced grid voltage** [14263-23]
- 14263 OR **CPU-GPU accelerated electromagnetic transient simulation of star-connected cascaded H-bridge SVGs** [14263-19]
- 14263 OS **Coordinated fault ride-through strategy for hybrid MMC-HVDC based on adaptive fuzzy-PR control and trajectory planning** [14263-31]
- 14263 OT **Frequency-domain modal analysis of the oscillatory stability for AC/DC microgrid clusters interconnected by DC distribution networks** [14263-21]
- 14263 OU **Intelligent motor bearing fault diagnosis method based on VMD-CNN-LSTM-coordinate attention (CA)** [14263-20]
- 14263 OV **Physics-informed and innovation-gated extended Kalman filtering for high-precision position estimation without ground-truth** [14263-5]

- 14263 OW **Numerical simulation of transient characteristics of transverse electromagnetic wave propagation in lossy media** [14263-3]
- 14263 OX **Research on diagnosis methods for open-circuit faults in half-bridge MMC submodules** [14263-37]
