

PROCEEDINGS OF SPIE

International Conference on Physics and Quantum Computing (ICPQC 2026)

**Daowen Qiu
Wanyang Dai**
Editors

**17–19 April 2026
Guangzhou, China**

Organized by
Guangdong University of Education (China)

Sponsored by
AEIC—Academic Exchange Information Centre (China)

Published by
SPIE

Volume 14266

Proceedings of SPIE 0277-786X, V. 14266

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Physics and Quantum Computing (ICPQC 2026)*, edited by Daowen Qiu, Wanyang Dai, Proc. of SPIE 14266, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

QUANTUM COMPUTING AND COMMUNICATION

- 14266 02 **Automated simulation-driven optimization of superconducting qubit trench structures using an enhanced Q-learning algorithm** [14266-30]
- 14266 03 **Towards larger entanglement: enhance the GHZ benchmarking with circuit cutting method** [14266-7]
- 14266 04 **Quantum computing for natural language processing: a comprehensive review** [14266-34]
- 14266 05 **Quantum teleportation with a noisy entangled state** [14266-37]
- 14266 06 **Performance analysis of fully-passive asynchronous measurement-device-independent quantum key distribution** [14266-9]
- 14266 07 **HQVC-Net: a hybrid quantum vision convolutional network for explainable medical imaging** [14266-6]
- 14266 08 **A review of spin environment engineering for extended coherence in molecular qubits** [14266-27]
- 14266 09 **Differential private equality testing of quantum states** [14266-31]
- 14266 0A **Quantum mechanics changes the world technological breakthroughs in quantum computing, communication, and sensors** [14266-24]
- 14266 0B **Topology-guided optimization of quantum coherence in merged-element transmon networks under Lindblad dynamics** [14266-32]
- 14266 0C **Research evolution and challenges of evaluation datasets for large vision models in public security domain** [14266-36]
- 14266 0D **Measurement of power frequency electric fields based on Rydberg atoms** [14266-33]
- 14266 0E **Research on tunable broadband plasmon-induced transparency based on non-coplanar Dirac semi-metallic metamaterials** [14266-16]
- 14266 0F **Zero-energy lines and perturbation response in a two-dimensional SSH-like three-band lattice** [14266-11]
- 14266 0G **Topological phases and edge modes in the ladder model with unequal legs** [14266-4]

PHYSICS FOUNDATIONS AND MATERIALS

- 14266 OH **Research progress of Hubble constant** [14266-38]
- 14266 OI **Use the least squares method to test the symmetry of the data** [14266-29]
- 14266 OJ **Cyclic inequalities for generalized mixed chord-integrals** [14266-19]
- 14266 OK **QCD phase diagram from chiral random matrix theory: from two to three light flavors**
[14266-13]
- 14266 OL **π -conjugated metal-organic frameworks as bifunctional electrocatalysts for oxygen
evolution and reduction reaction** [14266-8]
- 14266 OM **The information measure of distributions in the half-plane** [14266-21]
- 14266 ON **A machine learning-based inverse design method for optimal detection efficiency of HPGe
detectors** [14266-28]
- 14266 OO **Research on collaborative control of heterogeneous vehicle formations based on
distributed strategy** [14266-2]
- 14266 OP **A theory of the generation and function of gravitons** [14266-22]
- 14266 OQ **Electron kinetic acceleration mechanisms in weak guide field collisionless magnetic
reconnection at MHD scales** [14266-25]
- 14266 OR **Particle heating mechanisms in weak guide field collisionless magnetic reconnection at
MHD scales** [14266-26]
- 14266 OS **Response of a class of synchronized autonomous chaos system** [14266-17]
- 14266 OT **A two-dimensional hyperchaotic image encryption scheme based on Lagrangian spatial
migration and global matrix collision** [14266-18]
- 14266 OU **Research on scattering coefficient of aerosol particles with Sauter mean diameter for
different particle size distributions** [14266-12]
- 14266 OV **Study on processing quality of sheet materials for CO₂ laser cutting** [14266-14]
- 14266 OW **Electron correlation effects on radiative opacity of Nd III-IV: a large-scale calculation**
[14266-3]
- 14266 OX **Machine learning potential-based molecular dynamics simulations of water transport in
graphene nanoslit channels** [14266-15]

- 14266 OY **Angle-resolved polarized Raman spectroscopy of β -Ga₂O₃ single crystals** [14266-10]
- 14266 OZ **Probing nuclear structure effects on electromagnetic fields in isobar collisions using the AMPT model** [14266-5]
