

PROCEEDINGS OF SPIE

Sixth International Symposium on High Power Laser Science and Engineering (HPLSE 2026)

**Rendy Wu
Xiang Zhang**
Editors

**17–21 April 2026
Chengdu, China**

Organized by
Chinese Laser Press (China)

Executive Organizer
Shanghai E Photon Optoelectronics Technology (China)

Published by
SPIE

Volume 14299

Proceedings of SPIE 0277-786X, V. 14299

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Sixth International Symposium on High Power Laser Science and Engineering (HPLSE 2026)*, edited by Rendy Wu, Xiang Zhang, Proc. of SPIE 14299, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

THE SIXTH INTERNATIONAL SYMPOSIUM ON HIGH POWER LASER SCIENCE AND ENGINEERING

- 14299 02 **Fast inversion of laser pulse waveforms in multipass amplification systems for high-power laser facilities based on deep learning and transfer learning with multistage hybrid training strategy** [14299-1]
- 14299 03 **Effect of ion source voltage on properties of $\text{HfO}_2/\text{SiO}_2$ high-reflectance films** [14299-2]
- 14299 04 **Research on cleanliness control technology for slab amplifiers based on laser cleaning** [14299-3]
- 14299 05 **Wavefront and pointing transmission modeling and optomechanical coupling analysis for the target-area section of picosecond petawatt laser facility** [14299-4]
- 14299 06 **A highly stable 4.57W, 40MHz picosecond 266nm solid-state laser based on optimized MOPA amplification and nonlinear frequency conversion** [14299-5]
- 14299 07 **Programmable spectral design of chirped fiber Bragg gratings: demonstration of a saddle-shaped spectrum** [14299-6]
- 14299 08 **An Er: fiber femtosecond optical frequency comb for the instability measurement of rubidium optical frequency standard** [14299-7]
- 14299 09 **Measuring the thermal properties of wide bandgap semiconductors using an improved optical method based on high-modulation frequency laser** [14299-9]
- 14299 0A **3D color micro-topography reconstruction based on spectral information** [14299-11]
- 14299 0B **Study of the influence of airflow disturbance factors on the OAM spectra of a vortex beam** [14299-12]
- 14299 0C **Simulation study on spatiotemporal manipulation of plasma optics** [14299-13]
- 14299 0D **Research of a multicolor failsafe technique using reference laser in fiber front end system** [14299-16]
- 14299 0E **Numerical analysis of slit-induced field modulation in large-aperture exposure tiled MLD gratings based on RCWA** [14299-17]
- 14299 0F **Characteristics and mitigation analysis of near-field modulation of mosaic grating compressor for kilojoule petawatt laser system** [14299-18]

- 14299 OG **Design of a broadband, high-throughput, time-framed x-ray spectrometer for laser-plasma diagnostics based on multichannel focusing bent-crystal schematics** [14299-19]
- 14299 OH **Development of a high-power subnanosecond Nd:YVO₄ Innoslab laser toward LiDAR applications** [14299-20]
- 14299 OI **Study on flow-filed and temperature-filed adjustment in an alkali vapor cell using blade morphology** [14299-21]
- 14299 OJ **Design and thermal simulation analysis of a high-energy, compact laser head for an erbium-doped glass laser applied to laser ranging** [14299-22]
- 14299 OK **Opto-mechanical-thermal integration simulation in the whole machine design of high-power midinfrared laser** [14299-23]
- 14299 OL **A modular cross-correlation measurement system with tunable delay for 81.25 MHz picosecond pulses** [14299-24]
- 14299 OM **Linear frequency modulated burst-mode fiber laser** [14299-25]
- 14299 ON **Femtosecond laser direct writing FBG-based components for high-power fiber lasers** [14299-26]
- 14299 OO **Investigation of temporal waveform control in petawatt frequency doubling under third-order nonlinearity** [14299-27]
- 14299 OP **Phosphorus-doped fiber for flat supercontinuum generation** [14299-29]
- 14299 OQ **Modeling and simulation of the effects of fiber bending on optical discharge characteristics in double-clad fibers** [14299-31]
- 14299 OR **QCW 589nm laser generation based on dual-chip VECSELs** [14299-32]
- 14299 OS **Mechanism study on optimization of EUV conversion efficiency by pulse shaping for long-pulse laser-driven Li targets** [14299-33]
- 14299 OT **Monitoring and analysis of temperature in Shenguang II upgrade terminal system and its impact on harmonic conversion efficiency** [14299-34]
- 14299 OU **Stable narrow-bandwidth DSR from an all-polarization-maintaining Tm-doped fiber laser** [14299-35]
- 14299 OV **Dependence of weakly coupled optical fiber couplers on normalized frequency** [14299-36]
- 14299 OW **A 5.5 kW near single-mode narrow-linewidth fiber laser based on a tapered fiber oscillator-seed** [14299-37]
- 14299 OX **Sensitivity improvement in angle-resolved scattering measurement of highly reflective coatings based on cavity ring-down technique** [14299-39]

- 14299 0Y **High-power supercontinuum generation in graded-index multimode fibers pumped by picosecond pulses** [14299-41]
- 14299 0Z **High-power filled-aperture coherent beam combining of narrow-linewidth fiber lasers** [14299-42]
- 14299 10 **Intuitive physics and design strategy for nearly 100% diffraction efficiency in multilayer dielectric gratings at Littrow angle** [14299-43]
- 14299 11 **Stimulated Brillouin scattering suppression using cascading phase modulation for 3kW narrow-linewidth all-fiber amplifier** [14299-44]
- 14299 12 **Laser-driven carbon ion acceleration with multi-PW pulses and double-layer targets by 3D PIC simulations** [14299-45]
