

PROCEEDINGS OF SPIE

International Conference on Optical Communication and Intelligent Algorithms (OCIA 2026)

Yang Yue
Editor

27–28 February 2026
Shenzhen, China

Organized by
Shenzhen Technology University (China)

Sponsored by
National Institute of Astrophysics, Optics and Electronics (Mexico)
Shenzhen MSU-BIT University (China)

Published by
SPIE

Volume 14301

Proceedings of SPIE 0277-786X, V. 14301

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *International Conference on Optical Communication and Intelligent Algorithms (OCIA 2026)*, edited by Yang Yue, Proc. of SPIE 14301, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

ISSN: 0277-786X

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xi *Conference Committee*

INTERNATIONAL CONFERENCE ON OPTICAL COMMUNICATION AND INTELLIGENT ALGORITHMS (OCIA 2026)

- 14301 02 **Vehicle cooperative planning method based on global traffic situation** [14301-1]
- 14301 03 **Research on all-weather target perception method for connected vehicles based on multimodal data fusion** [14301-2]
- 14301 04 **Personalized music performance feedback system supported by mobile computing: construction of adaptive environment for vocal training** [14301-3]
- 14301 05 **Data-driven global cybersecurity: analyzing policy effectiveness and optimization pathways** [14301-4]
- 14301 06 **The operational stability evaluation of slag discharge system driven by 5G edge intelligence** [14301-5]
- 14301 07 **Optimization of last-mile delivery using dynamic path algorithms based on reinforcement learning** [14301-6]
- 14301 08 **Algorithms for assessing and predicting the mental health of college students based on big data analysis** [14301-7]
- 14301 09 **Three-dimensional reconstruction of sports technique movements based on multimodal sensor fusion** [14301-8]
- 14301 0A **Application and enhancement of deep learning in infrared image recognition of marine surface vessel targets** [14301-9]
- 14301 0B **An academic English text ambiguity detection algorithm based on contextual word embeddings and deep learning** [14301-10]
- 14301 0C **Genetic algorithm-based optimization design for building interior acoustics** [14301-11]
- 14301 0D **Optimization of cigarette manufacturing equipment parameters based on big data mining technology** [14301-12]
- 14301 0E **YOLO with attention mechanism for enhanced small object detection** [14301-13]
- 14301 0F **Load management data enhancement and prediction model based on deep learning ensemble algorithm** [14301-14]

- 14301 OG **Automated execution and consensus algorithm co-design for state-verifiable distributed systems** [14301-15]
- 14301 OH **Design of automatic recognition algorithm for key points of human body movements in sports training scenarios** [14301-16]
- 14301 OI **Multimodal behavior recognition and automated evaluation algorithm for classroom analysis** [14301-17]
- 14301 OJ **Optimization of AI acceleration models in big data processing and implementation of high-performance computing architectures** [14301-18]
- 14301 OK **Intelligent prediction and optimal scheduling of gas storage facility operation status: decision-making model based on machine learning algorithms** [14301-19]
- 14301 OL **Fault diagnosis and prediction algorithm of automobile engine based on digital twin model** [14301-20]
- 14301 OM **The architecture implementation and performance optimization of artificial intelligence algorithms in the university talent cultivation management platform** [14301-21]
- 14301 ON **Optimizing university learning processes through multi-algorithm synergy: a system implementation** [14301-22]
- 14301 OO **An integrated predictive-optimization framework for adaptive decision-making: model and algorithm design** [14301-23]
- 14301 OP **High-fidelity 3D reconstruction and immersive display of Silk Road heritage using enhanced QEM, SH lighting, and UWB/VIO tightly-coupled positioning** [14301-24]
- 14301 OQ **Numerical computation and implementation for high-dimensional color space layout perception optimization using the adjoint method** [14301-25]
- 14301 OR **CLDN-based multimodal deep feature learning for legal culture integration assessment in smart campuses** [14301-26]
- 14301 OS **The application of machine learning algorithms in data mining of social platforms** [14301-27]
- 14301 OT **Optimization and implementation of monotone iterative algorithm for periodic solutions of delay differential equations in Banach space** [14301-28]
- 14301 OU **Real-time behavioral data analysis and intelligent prediction system design based on stream computing and spatiotemporal graph neural networks** [14301-29]
- 14301 OV **Matrix-based CIPP evaluation algorithm with fuzzy logic and gradient descent optimization for industrial colleges** [14301-30]
- 14301 OW **A dynamic priority scheduling algorithm for cloud-based cultural creative design platforms** [14301-31]

- 14301 0X **An algorithmic framework for overcoming data silos in digital educational management platforms** [14301-32]
- 14301 0Y **Multiscale feature generation and innovative design method for paper-cut patterns using diffusion models with semantic constraints** [14301-33]
- 14301 0Z **Big data drives the optimization of intelligent error-correction models for German speech synthesis technology** [14301-34]
- 14301 10 **Algorithmic simulation of multiphysics coupling in coal seam gas displacement: role of Langmuir constants and CO₂ dynamic viscosity** [14301-35]
- 14301 11 **Design of energy allocation algorithm for adaptive power management system of delivery robots** [14301-36]
- 14301 12 **A traffic assignment model considering individual utility under network vulnerability perspective** [14301-37]
- 14301 13 **Intelligent computational modeling method for uncertainty factors in nuclear power construction engineering** [14301-38]
- 14301 14 **Algorithm optimization of machine learning in multimodal data analysis under cross-platform application framework** [14301-39]
- 14301 15 **Optimization of IoT sensor data processing performance by integrating edge computing and deep learning** [14301-40]
- 14301 16 **Research on dynamic path optimization and conflict avoidance algorithm of low-altitude UAV group cooperative flying** [14301-41]
- 14301 17 **Intelligent manufacturing quality inspection system based on multiobjective optimization** [14301-42]
- 14301 18 **Adaptive trajectory planning for autonomous mobile agents in dynamic protective environments** [14301-43]
- 14301 19 **Cargo volume prediction and vehicle scheduling based on BP-LSTM** [14301-44]
- 14301 1A **Audio format optimization and noise suppression based on multidimensional evaluation and adaptive algorithms** [14301-45]
- 14301 1B **Optimization of translation replacement relocation scheme based on improved genetic algorithm** [14301-46]
- 14301 1C **A distributed zonotopic estimation algorithm for cyber-physical systems under encryption-based encoding schemes** [14301-47]
- 14301 1D **Optimization of deployment strategy for single UAV with multiple shielding media based on improved particle swarm algorithm** [14301-48]

- 14301 1E **Research on an automatic generation method of SOTIF hazardous scenes based on generative adversarial networks** [14301-49]
- 14301 1F **Construction of personalized learning method of ideology and politics based on collaborative filtering algorithm** [14301-50]
- 14301 1G **AIoT multimodal intrusion detection algorithm integrating RFID spatiotemporal data** [14301-51]
- 14301 1H **A differential positioning method based on 5G and BeiDou satellites in complex environments** [14301-52]
- 14301 1I **Volunteer service empowerment methods based on symbolic interactionism and dynamic social networks** [14301-53]
- 14301 1J **Multimodal graph adaptive inference algorithm for dynamic diagnosis of knowledge state** [14301-54]
- 14301 1K **A random forest-based predictive and causal analysis of factors influencing students' mathematics achievement** [14301-55]
- 14301 1L **A study on a three-stage hybrid filtering and adaptive windowing framework for noisy microelectronic interference signals** [14301-56]
- 14301 1M **Joint inversion study of thin film thickness and refractive index based on optical interference** [14301-57]
- 14301 1N **An improved method for chip defect detection based on YOLOv11** [14301-58]
- 14301 1O **Three-dimensional path planning for UAVs using a quantum local search-enhanced differential evolution algorithm** [14301-59]
- 14301 1P **Modeling and simulation of dynamic masking scheduling based on improved particle swarm optimization** [14301-60]
- 14301 1Q **YOLOv8 vehicle detection method based on lightweight coordinate attention** [14301-61]
- 14301 1R **Noise prediction and performance evaluation of optical fiber communication signals based on deep learning** [14301-62]
- 14301 1S **IoT monitoring system for field environmental data based on FreeRTOS** [14301-63]
- 14301 1T **Design of wireless resource management scheme for network slicing** [14301-64]
- 14301 1U **Security-constrained unit combination optimization in power systems integrating classical mixed-integer programming and quantum heuristic algorithms** [14301-65]
- 14301 1V **Air quality monitoring based on machine learning: a case study of Changsha City** [14301-66]

- 14301 1W **Multiscale attention-guided LSTM for time series prediction** [14301-67]
- 14301 1X **DOA estimation algorithm based on adaptive filtering with dual reference elements**
[14301-68]
- 14301 1Y **Refined identification modeling of noise characteristics in laser received signals** [14301-69]
- 14301 1Z **A least mean square algorithm with differential evolution optimization for electrocardiogram signal denoising** [14301-70]
- 14301 20 **Adaptive collaborative filtering algorithm for anomaly detection in cloud computing**
[14301-71]
- 14301 21 **Development and integration of fusion processing algorithms for heterogeneous text data in Japanese translation systems** [14301-72]
- 14301 22 **Design and application of mechanical optical fiber distribution system based on CLOS cross-matrix algorithm** [14301-73]
- 14301 23 **Optimization of 3D printing parameters for polymer composites using evolutionary algorithms** [14301-74]
- 14301 24 **Image recognition method based on invariant moments and tabu search algorithm**
[14301-75]
- 14301 25 **Design and performance comparison of cross-language semantic modeling algorithms for language transfer learning** [14301-76]
- 14301 26 **Network log anomaly detection and evaluation based on unsupervised deep learning**
[14301-77]
- 14301 27 **Computer simulation and optimization design of the intelligent monitoring system for oil and gas transportation pipelines** [14301-78]
- 14301 28 **Construction and inference algorithm of East Asian regional knowledge graph based on large-scale text and structural data** [14301-79]
- 14301 29 **Target micromotion sensing method based on millimeter-wave radar** [14301-80]
- 14301 2A **Multimodal data fusion algorithm for VR-driven digital media platforms to enhance user experience** [14301-81]
- 14301 2B **Construction of a one-core, four-drive sports functional training effect prediction model based on AI predictive algorithms and big data** [14301-82]
- 14301 2C **Methodologies for developing immersive cultural experience courses driven by augmented reality** [14301-83]
- 14301 2D **Machine learning-based bearing failure research** [14301-84]

- 14301 2E **Optimization of an asymmetric LCC-LCC constant-current WPT system considering dynamic impedance** [14301-85]
- 14301 2F **A lightweight apple detection model based on improved YOLOv8** [14301-86]
- 14301 2G **A spatio-temporal graph neural network-based method for optical network traffic forecasting and anomaly detection** [14301-87]
- 14301 2H **Multi-UAV cooperative smoke shielding optimization based on HAG-TS** [14301-88]
- 14301 2I **Multiagent systems and their algorithm optimization in engineering applications for collaborative learning environments in online education** [14301-89]
- 14301 2J **Dynamic pricing optimization in logistics based on reinforcement learning algorithms** [14301-91]
- 14301 2K **Educational analysis system based on multidimensional data** [14301-92]
- 14301 2L **Real-time object detection for autonomous driving based on YOLOv8 and LiDAR fusion** [14301-93]
- 14301 2M **An auxiliary book editing and proofreading algorithm based on rule-semantic hybrid modeling** [14301-94]
- 14301 2N **Lightweight safety helmet detection algorithm based on improved YOLOv8n and partial convolution** [14301-95]
- 14301 2O **Optimal timing prediction based on an integrated model of feature selection and risk modeling** [14301-96]
- 14301 2P **Multilingual speech emotion recognition and context understanding algorithms from the perspectives of linguistics and ethnography** [14301-97]
- 14301 2R **Multidimensional data prediction based on ARIMA-LSTM-RF hybrid model** [14301-99]
- 14301 2S **Semantic reasoning and consistency verification algorithm for evaluation elements based on knowledge graph** [14301-100]
- 14301 2T **Computer algorithms for intelligent sensor data fusion in urban rail transit systems** [14301-101]
- 14301 2U **Design and implementation of network intrusion detection algorithm based on improved BiLSTM-Attention model** [14301-102]
- 14301 2V **Research on intelligent design and synergistic optimization algorithms for photothermal performance in low-carbon building materials** [14301-103]
- 14301 2W **An improved RT-DETR algorithm for dense pedestrian detection in complex scenarios** [14301-104]

- 14301 2X **Detection of bursty events based on microblog** [14301-105]
- 14301 2Y **Dynamic target arrival direction estimation algorithm based on particle filter** [14301-106]
- 14301 2Z **Optimization of inversion algorithms based on machine learning in transient electromagnetic data processing** [14301-107]
- 14301 30 **Application of spatio-temporal clustering algorithm based on big data in the analysis of tourists' behavior in the palace museum: a case study of Ctrip and TripAdvisor reviews** [14301-108]
- 14301 31 **Design of an automatic computation model for imagery distribution characteristics in British and American literary texts** [14301-109]
- 14301 32 **Distributed network management systems in cloud computing environments** [14301-110]
- 14301 33 **Research on lightweight algorithm design and mobile deployment optimization for Japanese translation models** [14301-111]
