SPIE

Volume 14318

Proceedings of SPIE 0277-786X, V. 14318

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Third International Conference on Computing, Machine Learning, and Data Science (CMLDS 2026)*, edited by Ickho Song, Ming Xie, Proc. of SPIE 14318, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

THIRD INTERNATIONAL CONFERENCE ON COMPUTING, MACHINE LEARNING, AND DATA SCIENCE

14318 02	A hybrid CNN-BiLSTM model for complex speech emotion recognition: EMOPLEX [14318-1]
14318 03	SAMYOLO: improved YOLOv11 for real-time drowning behavior recognition in swimming pools [14318-12]
14318 04	A comparative analysis of food price forecasting to enhance food security [14318-10]
14318 05	Learning disentangled representations for ECG: a dual-stream codec for diagnostic-aware compression [14318-13]
14318 06	Attention-driven deep reinforcement learning for dependency-aware task offloading and scheduling in multiserver MEC networks [14318-7]
14318 07	Token pruning in MLLM-based vision-and-language navigation [14318-8]
14318 08	AI-driven quantitative credit risk assessment for IFRS 9 accounting: a machine learning approach with explainable predictions [14318-5]
14318 09	Olympic medal forecasting and the “great coach” effect: an integrated time series and causal analysis [14318-4]
