# TABLE OF CONTENTS

|                                                                                                                                                     |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------|----|
| RL-Optimized Natural Language Prompts for Enabling User-Centric Computational Thinking via Small-Scale LLMs .....                                   | 1  |
| <i>Shubham S. Bhatt, Michael S. Hsiao</i>                                                                                                           |    |
| Generative AI as a Pedagogical Agent: Investigating Student Reliance, Perceived Utility, and Ethical Trade-Offs in Computer Science Education ..... | 7  |
| <i>Bryan Vera, Vishwa Bhatt, Jerry Cervantes-Fernandez, Mira Kim, Soo Dong Kim, Jennifer Kim Jin</i>                                                |    |
| TrueNorth: PERMA+4 and Conversational Agentic RAG to Optimize Long-Term STEM Engagement .....                                                       | 13 |
| <i>Katja Crusius, Joan Puteri Zheng, Varsha Shetty, Sonia Baron, Tracy Gaolese, William Wyatt Anthony Dong, Windtell Souphavong, Yan Li</i>         |    |
| Computer-Aided Instruction for K-12 Teachers .....                                                                                                  | 19 |
| <i>Alberto C. Cruz, Anjana Yatawara, Maruti Mishra, Jianjun Wang</i>                                                                                |    |
| A Lightweight Indoor Drone Navigation Framework for Inventory Applications .....                                                                    | 23 |
| <i>Qian Zhang, Carter Wilson, Kaylee Onesy, Mia Y. Wang</i>                                                                                         |    |
| HarmonizeAI: Enhancing Group Dynamics Through AI-Assisted Collaborative Music Generation .....                                                      | 28 |
| <i>Mohan Chi, Huayu Tang, Mia Y. Wang, Yingjie Victor Chen, Baijian Yang</i>                                                                        |    |
| Working it Out on the Remix: Improving Genre Labeling in the Million Song Dataset .....                                                             | 36 |
| <i>Jennifer White, Mia Y. Wang</i>                                                                                                                  |    |
| Causal Inference-Based Analysis of an English Learning Recommendation System's Effectiveness .....                                                  | 40 |
| <i>Koya Hiraishi, Mirei Hayashi, Toshihiko Yamasaki, Tomoaki Higashino, Hirokazu Doi</i>                                                            |    |
| Using AI Techniques for Building Personalized LMS Learning Modules .....                                                                            | 44 |
| <i>Florian Schimanke, Boris Ruf</i>                                                                                                                 |    |
| Tracking Temporal Variations in Predictive Models for Healthcare Claims Data .....                                                                  | 52 |
| <i>Krishna Karan Ghantasala</i>                                                                                                                     |    |
| Privacy-Preserving Statistical Learning for Multi-Center Medical Data: A Fully Decentralized Approach .....                                         | 59 |
| <i>Krishna Karan Ghantasala</i>                                                                                                                     |    |
| Capabilities of AI Literary Assistant for Aphorists .....                                                                                           | 64 |
| <i>Bogdan Denny Czejdo, Mieczysław Kozłowski, Janusz Zalewski</i>                                                                                   |    |
| A Data-Driven Approach to Piano Pedagogy Through Audio Feature-Based Performance Evaluation .....                                                   | 70 |
| <i>Vincent Cao</i>                                                                                                                                  |    |
| Take a Deep Breath: Enhancing LLM Performance on Math Word Problems Through Prompting .....                                                         | 77 |
| <i>Naomi Jiang</i>                                                                                                                                  |    |
| Using AI in Academic Writing: Development of Best Practices for Teacher Education Research .....                                                    | 85 |
| <i>Maissa A. Hamad, Daniel A. Tillman, William H. Robertson, Josefina V. Tinajero, Song A. An Claudia Cochran</i>                                   |    |
| Enhancing Learning Path Recommendation via Multi-task Learning .....                                                                                | 91 |
| <i>Afsana Nasrin, Lijun Qian, Pamela Obiomon, Xishuang Dong</i>                                                                                     |    |

|                                                                                                                                               |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Loosing the Fear with AI-Enhanced Action Science: Professional Development and Informal Learning<br>of STEM Topics in Secondary Schools ..... | 98  |
| <i>Juan P. Santana, William H. Robertson</i>                                                                                                  |     |
| The Impact of Art-Based Techniques for Positive Health Outcomes .....                                                                         | 104 |
| <i>Julienne A. Greer</i>                                                                                                                      |     |
| Slack-Jawed and Breathless .....                                                                                                              | 108 |
| <i>Shawn Powers</i>                                                                                                                           |     |
| Perspectives for the Use of AI as a Tool for the Design and Implementation of Learning Centered<br>Curricula .....                            | 110 |
| <i>Lars Kölker, Florian Eggenkemper, Florian Schimanke, Henning Klafke, Robert Mertens</i>                                                    |     |
| Designing an Inclusive Personalized Guided Mindfulness Chatbot for Stress Management .....                                                    | 117 |
| <i>Sarah Naidu, William Greeley, Qian Zhang</i>                                                                                               |     |
| Biometric Stress Detection and Adaptive Automation in UAV Operation: A Review .....                                                           | 121 |
| <i>Estee Yu, Erick Yu, Qian Zhang</i>                                                                                                         |     |
| Automating STEM Education: An AI Driven Platform for Learning Modules .....                                                                   | 133 |
