# TABLE OF CONTENTS

|                                                                                                                                             |     |
|---------------------------------------------------------------------------------------------------------------------------------------------|-----|
| A Framework for Effective Prediction and Classification of Breast Cancer Using Optimal Deep Enhanced Hybrid Classifier with Xai Model ..... | 24  |
| <i>Swati Sah, Rejwan Bin Sulaiman, Saba Abualhija, Mohammad Aljaidi, Mohammad Ahmad Ghassan Samara, Raed Alazaidah</i>                      |     |
| Explainable Deep Transfer Learning for Multi-Class Knee Osteoporosis Diagnosis Using Grad-CAM and DenseNet121 .....                         | 40  |
| <i>Ahmad Aburomman, Khaled Hamad, Suhaila Abuowaida, Adai Al-Momani, Raed Al-Azaidah Omar Alidmat</i>                                       |     |
| Automated Brain Tumor Classification Using ConvNeXt-Tiny and Colorized MRI: A Deep Learning Approach With Enhanced Interpretability .....   | 48  |
| <i>Mohammad Arabiat, Khaled Hamad, Rayan Abuqaddom, Lana Alissa, Nawaf Alshdaifat Suhaila Abuowaida, Ahmad Aburomman</i>                    |     |
| XCAN: A Lightweight Convolutional Neural Network for Efficient Lung Disease Detection from Chest X-Rays .....                               | 57  |
| <i>Saed Alqaraleh, Baraa Alsyed Ahmad, Zeynep Ebrar Ozer</i>                                                                                |     |
| Hybrid Deep Feature Extraction and Machine Learning for Brain Tumor Classification: A Comparative Analysis .....                            | 62  |
| <i>Yusra Al-Najjar, Amer Rawash</i>                                                                                                         |     |
| Explainable Deep Learning for Melanoma Detection: Enhancing Recall in Dermoscopic Image Classification .....                                | 69  |
| <i>Musab Iqtait, Anas M. AL-Oraiqat, Yassin M. Y. Hasan, Sattam Almatarneh, Jafar Ababneh, Sami Askar Oleksandr Drieiev</i>                 |     |
| ILD-SwinViT: Hybrid Transformer Networks for Interstitial Lung Disease Diagnosis from HRCT Images .....                                     | 76  |
| <i>Wafa Tlili, Raouia Mokni</i>                                                                                                             |     |
| Brain Stroke Classification Using YOLOv8 .....                                                                                              | 85  |
| <i>Mahmoud Elhussieni, Sleiman Alhajj, Lama Alhajj, Kashfia Sailunaz, Mehmet Kaya, M. Kemal Özdemir Jon Rokne, Reda Alhajj</i>              |     |
| Comparative Study of Deep Learning Techniques to Detect Malignant Growth in the Human Brain .....                                           | 91  |
| <i>Muath AlShaikh, Kenan Hassan, Razan Habrah, Suhib Bani Melhem</i>                                                                        |     |
| Proposed Smartwatch for Early Detection of Reptile Bites During Sleep: VenomAlert .....                                                     | 98  |
| <i>Khalid Aznag, Khayya El Kharrachi, Ahmed El Oirrak</i>                                                                                   |     |
| Innovative Machine Learning Approaches for Detecting ADHD Using Optimized Feature-Reduced Datasets .....                                    | 102 |
| <i>Hazem Jihad Badarneh, Adnan M. Al-Smadi, Raed Alazaidah, Anwar Katrawi, Rahaf Alsawi Lana Yasin Al Aesa</i>                              |     |
| Deep Learning Framework for Early Alzheimer's Detection in Arabic Speech Enhanced by Feature Engineering .....                              | 107 |
| <i>Hanein O MohmedShareif, Abdullah M. Elmangoush, Ayyah A. Fadhl, Malak A. Ali</i>                                                         |     |

|                                                                                                                                                                                           |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Explainable Deep Learning for Autism Diagnosis from RNA-Seq Data Using Game-Theoretic Feature Analysis .....                                                                              | 113 |
| <i>Tasaddi M. Hanoun, Asaad N. Hashim</i>                                                                                                                                                 |     |
| Advanced Deep learning to Detection Autism .....                                                                                                                                          | 121 |
| <i>Tasaddi M. Hanoun, Asaad N. Hashim</i>                                                                                                                                                 |     |
| Evaluating and Enhancing Mammography Data Management Through the Hakeem Electronic Health Recording System: A Case Study in Digital Health Transformation in Jordan .....                 | 129 |
| <i>Sanaa Hussein Alnaimat, Norhashimah Mohd Norsuddin, Iza Nurzawani Che Isa, Marwan Ahmed Al-Shipli Ahmad. A. Abushattal, Sattam AlMatarneh</i>                                          |     |
| Diagnosis Model for Heart Disease Based on Whale Optimization Algorithm and K Nearest Neighbour Classifier .....                                                                          | 136 |
| <i>Hamouda Chantar, Mohammed Shantal, Almahdi Alshareef</i>                                                                                                                               |     |
| Digital Health and the Internet of Things in Huntington's Disease Diagnosis and Management: A Systematic Review .....                                                                     | 142 |
| <i>Leen Alhassan, Osama Hammad, Hanan Hirzallah, Yousef Alghzawi, Layla Amaireh, Faten Kharbat</i>                                                                                        |     |
| Classifying Snoring Sounds for Acoustic Detection of Sleep Apnea .....                                                                                                                    | 149 |
| <i>Mohammad Al-Hattab, Hussein Ayman Odeh</i>                                                                                                                                             |     |
| A Comprehensive Comparison of Machine Learning Approaches to Detect Botnet Phishing Attacks .....                                                                                         | 153 |
| <i>Raed Alazaidah, Beesan Al-haj, Ala'a Al-Shaikh, Suhaila Abuowaida, Ghassan Samara, Adai Almomani</i>                                                                                   |     |
| Cybersecurity Attacks Detection Using Machine Learning: Ensemble Learning .....                                                                                                           | 162 |
| <i>Rahaf Alsawi, Raed Alazaidah, Hayel Khafajeh, Ali Abu Zaid, Ghassan Samara, Mohammed Aljaide</i>                                                                                       |     |
| Detection of Multi-Vector DDoS Attack Based on Machine Learning Over a Unified Real-Time Network Security Framework .....                                                                 | 167 |
| <i>Dena Abu Laila</i>                                                                                                                                                                     |     |
| Comprehensive Analysis and Detection of Network Level Session Hijacking Attacks Across TCP/IP and UDP Protocols .....                                                                     | 173 |
| <i>Dena Abu Laila</i>                                                                                                                                                                     |     |
| A Lightweight Entropy-Based Framework for Multi-Attack Detection in Software-Defined Networks(SDN) .....                                                                                  | 179 |
| <i>Lina Ayoub, Mohammad Shurman</i>                                                                                                                                                       |     |
| Lightweight LSTM-Based Detection of CoAP Resource Exhaustion Attacks in Constrained IoT Devices .....                                                                                     | 184 |
| <i>Mahmoud Aljamal, Mohammad Aljaide, Zaid Jawasreh, Ayoub Alsarhan, Ghassan Samara, Raed Alazaidah</i>                                                                                   |     |
| Assisted Framework for Advanced IoT Intrusion Detection .....                                                                                                                             | 195 |
| <i>Zina Houhamdi, Mohamed Raid Athamena, Belkacem Athamena</i>                                                                                                                            |     |
| Data Mining-Based Intrusion Detection for IoT Environments .....                                                                                                                          | 201 |
| <i>Belkacem Athamena, Mohamed Raid Athamena, Zina Houhamdi</i>                                                                                                                            |     |
| Lightweight Machine Learning Approaches for Intrusion Detection in LoT Environments .....                                                                                                 | 205 |
| <i>Waleed Amer, Marwa Abdel Sattar Jaradat, Hani Hamoud Alsharari, Suha Afaneh<br/>Mohammad Rasmi Al-Mousa, Mahmoud Asassfeh, Sami Askar, Ghassan Samara<br/>Malak Hamad Al-Mashagbeh</i> |     |

|                                                                                                                                                                                |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Reducing Power Consumption in Wireless Sensor Networks via Random Node Re-Clustering Based on the Modified LEACH-EA Protocol .....                                             | 211 |
| <i>Ghassan Samara, Raed Alazaidah, Mahmoud Odeh, Omar Isam Al Mrayat, Mohammad Hassan Mohammad Rasmi Al-Mousa, Hussain Mohammed Turki, Abedalhakeem Issa, Mohammed Aljaidi</i> |     |
| A Risk-Aware GMRE-ACO Framework for Energy-Efficient UAV Data Collection in Wireless Sensor Networks .....                                                                     | 219 |
| <i>Ghassan Samara, Raed Alazaidah, Ibrahim Obeidat, Omar Isam Al Mrayat, Mahmoud Odeh Mais Haj Qasem, Hayel Khafajeh, Mohammed Aljaidi, Malik Jawarneh</i>                     |     |
| FORTRESS: A Hybrid Fiber-RF Communication Protocol for Anti-Jamming Resilience in UAV Systems .....                                                                            | 226 |
| <i>Ghassan Samara, Mahmoud Odeh, Mohammad Rasmi Al-Mousa, Omar Isam AL Mrayat Mohammed Aljaidi, Mais Haj Qasem, Raed Alazaidah, Alaa Bani-Bakr, Malik Jawarneh</i>             |     |
| An Energy-Efficient Routing Approach for Wireless Sensor Networks Based on Hybrid Deep Reinforcement Learning and Metaheuristic Optimization .....                             | 233 |
| <i>Mohanad Ali Meteab Al-Obaidi, Shajan Mohammed Mahdi, Yasmin Makki Mohialden Nadia Mahmood Hussien</i>                                                                       |     |
| Enhanced Fuzzy Logic-Based Optimization Framework for IoT Deployments in Wireless Sensor Networks .....                                                                        | 244 |
| <i>Suhail Odeh, Mahmoud Obaid, Rafik Lasri, Amir Bannoura, Murad Al Rajab</i>                                                                                                  |     |
