# TABLE OF CONTENTS

|                                                                                                                                                                          |    |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| An Automated Deep Learning Framework for Dental Disease and Oral Pathology Recognition from Clinical and Radiographic Images .....                                       | 1  |
| <i>J Jeni Nenatha, F. Mary Harin Fernandez</i>                                                                                                                           |    |
| BoxCall AI: An Intelligent Predictive Inventory Management System for Automotive Spare Parts Using XGBoost Regression and Advanced Time-Series Feature Engineering ..... | 7  |
| <i>P. Vasuki, S Vishvasanth, A Rahul Chandrasekar, S Dhurga, M Tharun Balaji, Y Sowmiya</i>                                                                              |    |
| Beyond the Pixels: Deep Learning-Based Classification of AI-Generated Images .....                                                                                       | 16 |
| <i>L. Jabasheela, B Hariharan, T Kathireswar, K Gowtham</i>                                                                                                              |    |
| Hybrid Naïve Bayes-ID3 Model for Phishing Classification Using Lexical and Behavioural Features .....                                                                    | 23 |
| <i>Jayshnav S, G Suseela, G Niranjana, Archana Mahendran</i>                                                                                                             |    |
| HX-MARL: Explainable Hypergraph-Driven MultiAgent Reinforcement Learning for Trust-Aware and Adversarially Robust Spectrum Allocation in CRN .....                       | 29 |
| <i>A. Shankar, P. Shyamala Bharathi</i>                                                                                                                                  |    |
| Real-Time Monitoring and Performance Visualization of a Three-Phase Squirrel Cage Induction Motor .....                                                                  | 35 |
| <i>P Divya, M Vishnu Priya, W Abitha Memala, A. Rameshbabu, G.T. Sundar Rajan, C. Bhuvaneswari</i>                                                                       |    |
| Compact Disaster-Response Rover with Hazard Detection and Remote Operation Using GraphSpectral Vision Intelligence .....                                                 | 41 |
| <i>S Guru Prasath, V Hemanth, S Praveen Kumar, G Pranay Rebeyro, T. Sripriya, M. Sudhagar</i>                                                                            |    |
| IoT Enabled Air Quality Forecasting and Pollution Control System .....                                                                                                   | 47 |
| <i>T Anu Virgin, A Ayona, P Jaya, M Nithya, T. Sripriya, M. Benisha</i>                                                                                                  |    |
| IoT-Enabled Bioenergy Generation from Food Waste for Sustainable Power Systems .....                                                                                     | 52 |
| <i>V Sathyajith, H Kathir, R Cibiraj, S Lokeshwaran, L. Hubert Mary, T Karthika</i>                                                                                      |    |
| Eagle-Eye Based Pain and Myocardial Infarction Monitoring and Control System Using Hierarchical Neuro-Physiological Intelligence .....                                   | 58 |
| <i>K Mohammed Nadeem, U Deepak, K Raghul, S Srihari, W. Nancy, T. Sripriya</i>                                                                                           |    |
| Apply 5G Wireless with Cybersecurity: Protect Data with a Secure Wireless Network .....                                                                                  | 64 |
| <i>A. Jaya Mabel Rani, Khaled Alqawasm, V Samuthira Pandi, A S Chithra, Bh. Prashanthi Gaurav Pushkarna</i>                                                              |    |
| Implement Edge and Cloud Computing for Distributed Healthcare Data Processing: Handling Medical Data in Real-Time .....                                                  | 70 |
| <i>Pr Buvaneswari, Mohammad Rasmi Al-Mousa, Kolisetti Giridhara Sravani, Rajeev Sobti, K. Murugesan T Ranjitha Devi</i>                                                  |    |
| Exploit Blockchain Technology and Cybersecurity in Healthcare Records: Protect Patients' Private Information .....                                                       | 76 |
| <i>Suresh Kumar Pithani, Nidal Yousef, Bhavani Govarthanan, M Sabitha, P. Deepthi, Amandeep Nagpal</i>                                                                   |    |
| Create Resilient Edge-Cloud Computing Platforms with the Internet of Things for Disaster Management: Analyzing Sensor-Driven Emergency Data in Real-Time Scenarios ..... | 82 |
| <i>Chandra Doddapalli Ramachandra Reddy, Ahmad Abdelhafiz Ali Samhan, J. Shakila, Gaurav Pushkarna Sheik Saidhbi, Ramesh Banoth</i>                                      |    |

|                                                                                                                                                                     |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Platforms for Sharing Threat Intelligence: Improving Teamwork in Cybersecurity by Disseminating Threat Indicators and Countermeasures in Real-Time .....            | 88  |
| <i>Rajesh Jagadeesan Ravikumar, Charulatha Umashankar</i>                                                                                                           |     |
| IoT-Enabled Photovoltaic Performance Optimization with Cloud Analytics and Machine-Learning-Based Fault Detection .....                                             | 94  |
| <i>T Dhinakaran, N Praveen Kumar, C Samivel, B.S Thejesh, M. Benisha, M. Bharathi</i>                                                                               |     |
| Hardware and Localization Analysis of Low-Power LoRaWAN GPS Tracker for Transport Applications .....                                                                | 101 |
| <i>S Vana Bagavath Pandiyan, A Aathi Bala, S Sriram, M Monish, T Karthika, L Hubert Mary</i>                                                                        |     |
| Integrate Augmented and Virtual Reality Settings for Digital Twins: Coordinated Representation and Management of Continuous Manufacturing Operations .....          | 107 |
| <i>B. Uma Rani, Mohammad Kanan, P. Yamini Devi, Ramesh Banoth, Padmavathi N, Alok Jain</i>                                                                          |     |
| Design and Simulation of a High-Step up Luo Converter for Solar Power Applications .....                                                                            | 113 |
| <i>S Nishant, Td Sudhakar, C Rajathi, E Saniya Benzer</i>                                                                                                           |     |
| Federated Deep Learning-Based Self-Healing and Autonomous Virtual Network Function Management for Intelligent 6G Network Slicing .....                              | 118 |
| <i>Kishor Golla, M. Ramkumar</i>                                                                                                                                    |     |
| Blockchain-Enabled Secure Orchestration Framework for AI-Driven Virtual Network Function Deployment in 6G Edge Networks .....                                       | 125 |
| <i>Kishor Golla, M. Ramkumar</i>                                                                                                                                    |     |
| Leverage Quantum Computing and Artificial Intelligence for Complex Problem Resolution: Innovative Optimization Framework .....                                      | 131 |
| <i>Suresh Kumar Pithani, Hebatullah Awwad, J. Lethisia Nithiya, Shobana D, Rajini Parimala, Amit Dutt</i>                                                           |     |
| Novel Blockchain-Based Decentralized Image Processing Framework: Safe Data Exchange, Authentication, and Verification in Smart City Surveillance Applications ..... | 137 |
| <i>Ganapathi Subramanian Pechiappan, Khaled Alqawasmi, Subhadra Perumalla, V. Nehru J. Lakhmi Prasanna, Navdeep Singh</i>                                           |     |
| Big Data Analytics Proven Smarter with Quantum Computing: A Framework for Optimizing Data at Scale .....                                                            | 143 |
| <i>K Dhanalakshmi, Mohammad Kanan, P. Hanumantha Rao, S. Bhuvana, V. Manasa, Balpreet Singh</i>                                                                     |     |
| Protect AI Model Implementation: Building Cyber-Resilient Threat Detection Systems with a Fusion of AI and Cybersecurity .....                                      | 149 |
| <i>Naga Sekhar Madala, Mahmoud Odeh, R. Deepa, M. Amutha, Srilakshmi Aluri, Gaurav Pushkarna</i>                                                                    |     |
| Statistically Adaptive Smooth Heaviside Thresholding for Robust Signal Denoising .....                                                                              | 155 |
| <i>K Laksheta D, P Mohanapriya, S. Radhika</i>                                                                                                                      |     |
| AI-Enabled Smart Footwear For Women's Safety With Iot-Based Emergency Alerts And Evidence Capture .....                                                             | 160 |
| <i>S. Dharshana, A. Lithishya, V. Harini, M. Shobana</i>                                                                                                            |     |
| UniFAS: A Unified Multi-Modal Attention and Contrastive Learning Framework for Robust Face Anti-Spoofing .....                                                      | 166 |
| <i>P Poornima, M. Tamilselvi</i>                                                                                                                                    |     |

|                                                                                                                                                                     |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Deep Learning Enhanced Key Generation Mechanism for Attribute-Based Encryption in Cloud Healthcare Security .....                                                   | 172 |
| <i>P. Karthik, D. Latha</i>                                                                                                                                         |     |
| Integrating Traditional Cultural Elements with Modern Design Sensibilities .....                                                                                    | 177 |
| <i>Rupesh Anand Gajbhiye, Debjani Mukherjee</i>                                                                                                                     |     |
| Post-Deployment Performance Assessment of Machine Learning-Based Fraud Detection Models .....                                                                       | 182 |
| <i>Logeshwari Dhavamani, R Shankar Navneeth R, D Shivaraj</i>                                                                                                       |     |
| Transformer Based Prediction Framework For Perinatal Health Multi Conditional Fetal Health And Delivery Risk Assessment From CTG Signals .....                      | 188 |
| <i>G M Ezhilarasan, A Chandrasekar, Mr B Blessed Sam</i>                                                                                                            |     |
| Comparative Evaluation of Keypoint-based and Frame-based Deep Models for Videoderived Seizure Prediction .....                                                      | 195 |
| <i>T Shine Krishon, S Sathishwaran, S Raghavi</i>                                                                                                                   |     |
| Distribution network Reconfiguration under multi objective using Barber's optimization Algorithm: comparative study on IEEE Test Systems .....                      | 199 |
