# TABLE OF CONTENTS

|                                                                                                                               |    |
|-------------------------------------------------------------------------------------------------------------------------------|----|
| Integrating Haptic Vest to the Virtual Reality .....                                                                          | 1  |
| <i>Gillian Culberson, Xiaoli Zhang, Qiaojie Zheng</i>                                                                         |    |
| Model-Free Adaptive Secure Containment Control for Nonlinear Multiagent Systems .....                                         | 6  |
| <i>Wanning Wang, Qian Wang, Ding Han, Yixuan Xue, Hexiang Zheng</i>                                                           |    |
| Comparative Analysis of 2D Visual Localization Precision in Deep Learning Models for Robotic<br>Pick-and-Place System .....   | 11 |
| <i>Kronwut Chotipanus, Phuwanat Phueakthong, Nattawat Pinrath</i>                                                             |    |
| Early-Stage Fire Recognition and Localization Based on YOLOv8 and Binocular Vision Fusion .....                               | 17 |
| <i>Yifan Gan, Linsen Xiong, Weiming Xu, Shengli Chu, Jianfeng Li, Wenpei Zheng, Dantong Zhu<br/>Ruisheng Yong</i>             |    |
| Deep Learning-Based Perception and Recognition Framework for Autonomous Robots .....                                          | 24 |
| <i>Jiadong Zhang, Wei Wang</i>                                                                                                |    |
| Research on the Method of Material Grasping Localization for Kitchen Service Robots .....                                     | 28 |
| <i>Xintong Mu, Jiali Chen, Zheng Liu, Hao Liu</i>                                                                             |    |
| Fault Detection of UUV Structures Based on EEMD Feature Decomposition and K-Medoids Clustering<br>Algorithm .....             | 33 |
| <i>Bowen Li, Kunlong Hong, Jianzhong Tang, Yong Nie</i>                                                                       |    |
| Rescue Target Recognition Method Based on Feature Similarity Matching .....                                                   | 38 |
| <i>Rui Tan, Kunlong Hong, Jianzhong Tang, Bowen Li</i>                                                                        |    |
| System Design of Point-Wise Aggregation System for Multi-LiDAR Sensor Network .....                                           | 44 |
| <i>Yuta Fukiya, Kuon Akiyama, Ryoichi Shinkuma</i>                                                                            |    |
| Analysis of Object Tracking for LiDAR Data with Point-wise Time Information .....                                             | 48 |
| <i>Kohei Okuno, Haruma Shiraishi, Kuon Akiyama, Ryoichi Shinkuma</i>                                                          |    |
| Underwater Object Tracking Method Based on Acousto - Optic Multi - Sensor Fusion .....                                        | 52 |
| <i>Ning He, Jiaguang Wei, Xiaowei Feng, Xiaofei Wang, Wenxuan He, Shanzhi Xu</i>                                              |    |
| Monocular Vision-Based Stockpile Localization in Waste Bunkers .....                                                          | 58 |
| <i>Haipeng Wang, Qili Chen, Wenbai Chen</i>                                                                                   |    |
| A Pose Estimation Algorithm Based on Improved PVN3D Grasp-Oriented Task for Robotic Hand .....                                | 63 |
| <i>Rui Li, Mingyang Cui, Zhonghao Li</i>                                                                                      |    |
| MGA-UNet: A Lightweight Visual Segmentation Network for Industrial Multi-Scale Workpieces .....                               | 68 |
| <i>Jiajing Cheng, Shuangshuang Wu, Wenbai Chen, Lincheng Feng</i>                                                             |    |
| 3D Vision-Based Weld Extraction for Sphere-Cylinder Junctions: A Geometric Prior Approach .....                               | 72 |
| <i>Weijie Cheng, Xincheng Tian</i>                                                                                            |    |
| HOLO-Track: Scale-Adaptive Geometric Association with Redundant Initialization Suppression for<br>Multi-Object Tracking ..... | 76 |
| <i>Shengyi Xu, Jian Wang</i>                                                                                                  |    |

|                                                                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Vision-Based Crack Extraction and Robot Trajectory Generation for Automated Sealing Application .....                                                      | 80  |
| <i>Ruotong Hu, Xincheng Tian</i>                                                                                                                           |     |
| A Lightweight Facial Expression Recognition Method with Dual Attention Mechanisms .....                                                                    | 84  |
| <i>Shuai Ma, Hong Zhu</i>                                                                                                                                  |     |
| An Improved YOLOv8n-Based Algorithm for Detecting Surface Welding Parts of Small Balancing Beams of Quay Crane .....                                       | 89  |
| <i>Ruiqi Su, Chuancun Wang, Long Liu</i>                                                                                                                   |     |
| Noise-Resilient Federated Contrastive Learning for NSCLC Diagnosis: A Dual-Tier Framework with Confidence-Aware Aggregation .....                          | 95  |
| <i>Jyun Jie Chuang, Tse Hsien Lu, Yue Chang, Fucai Xie</i>                                                                                                 |     |
| Role-Structured Reinforcement Learning for Heterogeneous Airship-Guided UAV Pursuit Tracking .....                                                         | 101 |
| <i>Kejie Yang, Yuting Zhou, Ming Zhu, Yifei Zhang</i>                                                                                                      |     |
| Lightweight Infrared Small Target Detection with Wavelet-Based Frequency Decomposition and Spatial-Aware Attention .....                                   | 106 |
| <i>Zhan Jin, Haonan Chen</i>                                                                                                                               |     |
| A Comparative Study of PPO and SAC for End-to-End Visual Peg-in-Hole Insertion .....                                                                       | 113 |
| <i>Haobo Zhou, Weichang Wang, Yuping Cai</i>                                                                                                               |     |
| ODC-Explorer: A Structure-Aware Multi-UAV Collaborative Exploration Framework with High-Quality Viewpoint Selection .....                                  | 118 |
| <i>Xinxin Zheng, Hai Lin, Xinsong Yang</i>                                                                                                                 |     |
| Actor-Critic Based Reinforcement Learning For Continuous Control In Autonomous Robot Navigation .....                                                      | 125 |
| <i>Do Yun Kim</i>                                                                                                                                          |     |
| Broad Learning Control for Uncertain Strictfeedback Systems with Asymmetric Full-State Constraints .....                                                   | 132 |
| <i>Youzhi Dong, Donghao Zhang, Linghuan Kong, Wei He</i>                                                                                                   |     |
| Design and Analysis of a Jellyfish-Inspired Robot for Water Eutrophication Remediation .....                                                               | 138 |
| <i>Chaoguang Zhang, Yong Chen</i>                                                                                                                          |     |
| Research on Initial Peak Suppression of LADRC Based on ANFIS-ESO .....                                                                                     | 144 |
| <i>Xihanga Xu, Chunxi Wang, Zhe Wang, Xu Ma, Longjian Ju, Shengquan Tang</i>                                                                               |     |
| Development and Design of an Intelligent Anti-slip Robot for Freight Trains: Structure Design .....                                                        | 149 |
| <i>Souliya Phetsaphangthong, Liguu Shuai, Guo Zhang</i>                                                                                                    |     |
| Cooperative Optimization Method for Intersection Signals Based on Transformer-BEV Representation and QMIX Value Decomposition Reinforcement Learning ..... | 158 |
| <i>Shun Li</i>                                                                                                                                             |     |
| Collaborative Manufacturability Assessment and Autonomous Control for Intelligent Milling Lines Via Knowledge-Data Fusion .....                            | 162 |
| <i>Qinghua Liu, Xiaomeng Tong, Maolin Cai, Xiaohui Gao, Zirui Li</i>                                                                                       |     |
| Vibration Analysis of a High-altitude Cable Deicing Robot .....                                                                                            | 170 |
| <i>Zhiyi Peng</i>                                                                                                                                          |     |

|                                                                                                                                                  |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| The GAN-BiRRT* Motion Planning Method for the Filter Pool Cleaning Robot .....                                                                   | 174 |
| <i>Junshi Wang, Yuanxun Fan</i>                                                                                                                  |     |
| Dynamic Collaborative Scheduling Optimization of Multi-Robot Based on PPO in Air-Ground<br>Collaboration Scenes .....                            | 182 |
| <i>Zihui Peng, Jintao Zhu, Lingzhi Li, Xincheng Liu, Hailong Jiang, Jifei Li</i>                                                                 |     |
| Design of Robotic Arm Control System Based on Fuzzy PID Algorithm .....                                                                          | 189 |
| <i>Tianyu Wu</i>                                                                                                                                 |     |
| Research on Automatic Assembly Method for Multihole Shaft Fitting Using Mirror-Imaging-Based<br>Pose Recognition and Robot Visual Servoing ..... | 195 |
| <i>Chengjia Weng, Xutang Zhang, Xianglin Bai, Tiangong Jin</i>                                                                                   |     |
| Perception-Driven Continuous Motion Mode Scheduling for Cross-Domain Robots in Land-Water<br>Transition Regions .....                            | 209 |
| <i>Shuang Liu, Xiaoqing Li</i>                                                                                                                   |     |
| Wind-Aware Smooth Path Planning for UAVs in Urban Environments Based on Improved A*<br>Algorithm .....                                           | 218 |
| <i>Xing Liu, Juanjuan Gao, Shengxuan Shang, Mohan Qin, Zhongyi Lin, Qichen Tan</i>                                                               |     |
| Design and Analysis of an Actively Swinging Variable-Diameter Wheel-Leg Robot for Complex Terrain<br>Locomotion .....                            | 222 |
| <i>Haoran Zheng, Bin Lü, Yufeng Liang</i>                                                                                                        |     |
| Mechanism and Circuit Design of Intelligent Explosive Disposal Robot .....                                                                       | 227 |
