# TABLE OF CONTENTS

|                                                                                                                                                                   |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Wide Band and High Gain 1x2 Decagon Array Patch Antenna for 5GHz Applications .....                                                                               | 1  |
| <i>N. Nandini, Gnanou Florence Sudha</i>                                                                                                                          |    |
| Grid-Aware Harris Hybrid Hawk Optimization for Strategic Electric Vehicle Charging Station<br>Deployment .....                                                    | 8  |
| <i>Anita Merlin I, P.S.Meenambikai, A Cassia Jemi M., T. Dharma Raj, S.Nithya, N.Anita Femilin</i>                                                                |    |
| Junctionless Shallow Extension Engineered Ferroelectric (FET) for Threshold Voltage Reduction and<br>Short Channel Effect Suppression .....                       | 14 |
| <i>Sandhya Tiwari, Anurag Rungta, Shalu Grag, Neeraj</i>                                                                                                          |    |
| An Advanced Deep Representation and Heuristic-based Model for Reliable Epileptic Seizure Detection<br>from Electroencephalogram Signals .....                     | 20 |
| <i>R. Selvam, R. Mahalakshmi</i>                                                                                                                                  |    |
| Double Boost Nine-Level Inverter for Renewable Energy Systems with Reduced Circuit Elements .....                                                                 | 27 |
| <i>M.Vijayakumar, R. Jeyabharath, M.Chitra, T.Sivaprakasam, K. Saravanan, A. Raja</i>                                                                             |    |
| Comparative Analysis of Low-Power SRAM Architectures for Reliable In-Memory Computing .....                                                                       | 33 |
| <i>Md Warish Ali, Rajeevan Chandel</i>                                                                                                                            |    |
| Cognitive Radio-based Adaptive Baseband Chip for Secure IoT Mesh .....                                                                                            | 41 |
| <i>Surya P, Aravind T, R. Saravanakumar</i>                                                                                                                       |    |
| A Comprehensive Review of FPGA Architectures for Securing IoT Systems: Trends, Datasets, and<br>Emerging Applications .....                                       | 47 |
| <i>Yeshaswini R, Vaddi Naga Padma Prasuna</i>                                                                                                                     |    |
| Control-Plane Anomaly Analysis for Hidden Communication in ICMP Traffic .....                                                                                     | 55 |
| <i>Jogi Venkata Sai Kiran, Gonela Venkatesh, D Jerusha</i>                                                                                                        |    |
| Enhanced Power Conversion using a Reduced Switch Multilevel Inverter for Renewable Energy<br>Integration .....                                                    | 60 |
| <i>E. Parimalasundar, K. Suresh</i>                                                                                                                               |    |
| Improving Nano-Scale VLSI Power Analysis Through Machine Learning-based Leakage Estimation .....                                                                  | 64 |
| <i>Arulraj Simon Prabu, Loshna k, Lithana M A, Ramyashree R, G.Palanikumar, Beaulah Princiba D</i>                                                                |    |
| Performance Analysis and Optimization of 5x5 Solar Panel Array under Various Partial Shading<br>Conditions: A Comparative Study of Different Configurations ..... | 71 |
| <i>V. Gowri Shankar, P. Balamurugan, M. Hariragul, S. Kailasam, S. Sudharsan, A.B. Varun</i>                                                                      |    |
| Design and Analysis of 2D FET for NEMS Sensor Application .....                                                                                                   | 79 |
| <i>Karthikeyan K, Pavithra G, Priyanka S, Ragavi S, Shabarna R</i>                                                                                                |    |
| Hybrid Power Management in Mechatronic Systems using Hydrogen Fuel Cells .....                                                                                    | 85 |
| <i>Reba Susan Abraham, Amritheswari M, Neethy Rose Sebastian, Pravika M</i>                                                                                       |    |
| Multiple Fault Detection in EV Vehicles using AI to Avoid Fire Accidents .....                                                                                    | 94 |
| <i>Nivishna S, Sowmiya V, Srimathidevi P, Swathi D, Tharunika DK</i>                                                                                              |    |

|                                                                                                                                                                 |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| MetaAntennaNet: Meta-Learned Radiation Pattern Optimization for Reconfigurable Smart Antennas .....                                                             | 102 |
| <i>Vinoth M</i>                                                                                                                                                 |     |
| Design and Analysis of an Ultrasonic Repeller to Combat Red Spider Mites in Tea Gardens .....                                                                   | 107 |
| <i>Ram Toi, Pronita Bora, Sushanta Kabir Dutta, Pankaj Sarkar</i>                                                                                               |     |
| Hardware-Aware Neural Architecture Search (NAS) with Area, Power, and Latency Constraints for ASIC Implementation .....                                         | 113 |
| <i>Abhishek Kumar, Rajeevan Chandel</i>                                                                                                                         |     |
| ECG-OralNet: A Hybrid Vision Transformer and CNN-based System for Predicting Cardiovascular from Oral Health and ECG Patterns .....                             | 121 |
| <i>K.S.Shashikala, S.Umamaheswaran, Prajwal HN, Omkar Maruti Naik, Divakar</i>                                                                                  |     |
| WaveFusionML: Multi-Resolution Learning for Electromagnetic Field-Aware Antenna Design .....                                                                    | 127 |
| <i>Vinoth M</i>                                                                                                                                                 |     |
| A Backstepping Approach Based Diving Control of Autonomous Underwater Vehicle using H <sub>2</sub> Control with External Disturbances .....                     | 132 |
| <i>Siddhartha V, Bhagya Prasad Rao B</i>                                                                                                                        |     |
| Generative AI for Automated RTL to GDSII Design Space Exploration and PPA Optimization .....                                                                    | 140 |
| <i>M.Aruna, Senthilkumar Subramani, Lakshmi Durga Panguluri, Gowrisankar Krishnamoorthy Kumarasenthil Muthuvel, Amsa Selvaraj</i>                               |     |
| Cerebrovascular Scan Analyzer an Intelligent Deep Learning System for Early Hemorrhagic Stroke Detection using CT Scan .....                                    | 146 |
| <i>Mukkamalla Kesava Narayana Reddy, P Sai Mukesh, N Divya, Nallamothe Seetaiah Bala Gangadhara Gutam, Sayyed Nagulmeera</i>                                    |     |
| Enhancement of Transmission Line Efficiency using Continuous Insulation Line Algorithm Compared with Hidden Markov Algorithm by Optimizing the Insulation ..... | 153 |
| <i>Srinivas Nekkanti, S.Jaanaa Rubavathy</i>                                                                                                                    |     |
| Modality Dropout for Robust Anomaly Detection in Resource-Constrained IoMT Wearables .....                                                                      | 158 |
| <i>R.Vinoth Kumar, A.Selvakumar</i>                                                                                                                             |     |
| Strategies for Light Management in Thin and Flexible c-Si Solar Cells Utilizing Copper Oxide (CuO) Nanoparticles .....                                          | 164 |
| <i>A. Sandeep Kumar Reddy, Arijit Bardhan Roy</i>                                                                                                               |     |
| Thermal-Aware Heterostructure Multi-Gate Tunnel Field Effect Transistor based SRAM for Low Power Applications .....                                             | 170 |
| <i>N.Praveen Kumar, D. Rehaman Hussain, N. Geetha Rani, Kalivaraprasad Badita</i>                                                                               |     |
| Negative Bitline-Write and Read-Assist Technique for Low-Power SRAM Design .....                                                                                | 175 |
| <i>Tania Choudhary, Rajeevan Chandel</i>                                                                                                                        |     |
| An Intelligent Autonomous Robot for Precision Irrigation based on Soil Condition Monitoring .....                                                               | 182 |
| <i>Kanagamalliga S, Vinayagam P, Vignesh R, Sabarivasan V</i>                                                                                                   |     |
| Non-Invasive Biosensor-Integrated Artificial Pancreas System for Smart Management of Diabetes Mellitus .....                                                    | 188 |
| <i>Abinayavalli Chellapandian, Nethra Bharathwaj, Tejasvin Kansal, Karishma Prasad S.Vasanthadev Suryakala, T.Rajalakshmi</i>                                   |     |

|                                                                                                                                                |     |
|------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Optimal Placement and Coordinated Parameter Tuning of FACTS Devices for Enhanced Power System Performance .....                                | 194 |
| <i>E. Parimalasundar, P. Venkatesh</i>                                                                                                         |     |
| FPGA-Accelerated Convolutional Feature Extractor for Real-Time Skin Image Analysis using Optimized Hardware CNN Blocks .....                   | 200 |
| <i>Susan Maria Sojen, Irine Andrew, Niba Jabeen Akber, Dinah Ann Varughese, Sri Adibhatla Sridevi</i>                                          |     |
| Multi-Sensor Fusion With Transformer-based Deep Learning for Real-Time Fetal Health Monitoring .....                                           | 207 |
| <i>V.Sharmila Packiavathy, KAnita Davamani</i>                                                                                                 |     |
| Multi-Objective Optimization of Smart Grid Energy Management using Machine Learning-based Load Forecasting Models .....                        | 216 |
| <i>Vallamkonda Raja Sekhar, Kotra Vyshnavi, Kandukuri Shaheenaz, Gaddala Sravani<br/>Vadde Lakshmi Prasanna</i>                                |     |
| Enhanced Solar Power Output Forecasting using Ensemble Learning with Weather-Integrated Data Fusion .....                                      | 223 |

| HAWK-ViT-CNNNet: A Knowledge-Guided Hybrid Deep Learning Model for Breast Cancer<br>Diagnosis .....                                          | 2168 |
| <i>Senthil Velan Sugantham, D Venkata Vara Prasad, Balasubramanian Viswanathan</i>                                                           |      |
| Self-Supervised Explainable and Uncertainty-Aware Deep Learning Framework for Parkinson's<br>Disease Handwriting-based Screening .....       | 2174 |
| <i>D K Shareef, Shaik Rafeeq Ahmed, Shaik Abdul Mueed, Sunku Sreekar, Pamisetty Hemanth Raj<br/>K Srinivasulu Achari</i>                     |      |
| Neural Network-Driven Optimization of Quality Engineering Metrics for High-Volume Healthcare<br>Claims and EDI Transaction Performance ..... | 2182 |
| <i>Devi Manoharan</i>                                                                                                                        |      |
| AI-Driven Data Analysis Pipelines for Enterprise Data Engineering .....                                                                      | 2192 |
| <i>Sailaja Songa, Govinda RaviRaj Mulasa, Santhosh Deep Moturi</i>                                                                           |      |
| A Microservices-based Software Engineering Model for Scalable and AI Driven Data Engineering<br>Systems .....                                | 2201 |
| <i>Santhosh Deep Moturi, Sailaja Songa, Govinda RaviRaj Mulasa</i>                                                                           |      |
| Hybrid Vision Transformer and Deep Reinforcement Learning Framework for Real-Time<br>Spatial-Temporal Deepfake Detection and Analysis .....  | 2210 |
| <i>Vignesh M, Sudipta Sundar, M. Muhemin Sheriff</i>                                                                                         |      |
| Grama Medai: A Portable AI-Enabled Diagnostic Laboratory for Rural Healthcare .....                                                          | 2217 |
| <i>Pavithra M, Naveen Kumar S, Rakesh Varsan S, Reshma Dharshini S, Sutiksn A</i>                                                            |      |
| A Lightweight and Explainable Framework for Emotion Cause Pair Extraction .....                                                              | 2226 |
| <i>Latha R, Karthikeyan K, Dinesh Kumar K, Muthu Krishnan V</i>                                                                              |      |
| An Integrated Framework for Real-Time Phishing Website Detection using XGBoost and BERT .....                                                | 2232 |
| <i>G. Lalitha Kumari, K. Koteswara Rao, K. Bhavana, I. Sri Naga Venkata Raja, K. Venkateswara Rao<br/>Mogal Safiya</i>                       |      |
| GradCAM Assisted EfficientNet Framework for Explainable 2D MRI Breast Lesion Detection .....                                                 | 2239 |
| <i>Pedapudi Vijaya Bhaskar, Nilamani Bhoi, Diddi Sai Ramalakshmi, Edubilli Sharmila<br/>Dadi Greeshmanth Arun, Chiriki Sri Sai Raj</i>       |      |
| Domain Adaptation in HTR through Self-Supervised Visual Pretraining .....                                                                    | 2247 |
| <i>Ashlin Deepa R N, Preetham Janugam, Rahul Sangubotla, SK. Jani Pasha, Rambakka Rohith</i>                                                 |      |
| An Empirical Analysis of Privacy-Preserving Federated Learning under Non-IID Data Distributions .....                                        | 2253 |
| <i>Akash Badhan, Hassandeep Singh, Pooja Shama</i>                                                                                           |      |
| Flood Prediction and Alerting System using Machine Learning .....                                                                            | 2261 |
| <i>Selvaganesh M, V. Anupriya, K. Vijayaragavan, S.K. Srinivasan, S. Sanjay</i>                                                              |      |
| Development and Deployment of a Secure AI-Enabled Edge Computing Framework for Healthcare<br>Data Analytics .....                            | 2267 |
| <i>Sri Devi R, Reshma. S. M, Harikaran.V</i>                                                                                                 |      |

|                                                                                                                                             |      |
|---------------------------------------------------------------------------------------------------------------------------------------------|------|
| Explainable Multimodal Deep Learning for Huntington’s Disease Forecasting using EfficientNet-B3<br>and Graph Neural Networks .....          | 2275 |
| <i>A. Inbavalli, S. Padmapriya, M. Sivaranjini, A. Balachandar, K. Kalaiselvi, C. Manimegalai</i>                                           |      |
| Early Identification of Alzheimer’s Disease using Blood Plasma Protein Profiles: A Comparative Study<br>of XGBoost and SVM Algorithms ..... | 2281 |
| <i>P. Anitha, V. Arul Gnanam, N.Prakash, E. Loganathan, E. Nithyakala, S.Nivetha</i>                                                        |      |
