# TABLE OF CONTENTS

|                                                                                                                                                                                                                                                |    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Logical Topology Adaptation in DCI/DCX-Embedded Multi-Granularity Routing Layered Optical Networks .....                                                                                                                                       | 1  |
| <i>Hayato Yuasa, Takuma Kuno, Yojiro Mori, Shih-Chun Lin, Motoharu Matsuura, Suresh Subramaniam<br/>Wakako Maeda, Shigeyuki Yanagimachi, Hiroshi Hasegawa</i>                                                                                  |    |
| Straggler-avoiding Scheduling: How P2MP Optical Networks Accelerate Geo-distributed LLM Training .....                                                                                                                                         | 4  |
| <i>Bohan Fu, Meihan Wu, Binjun Tang, Ruoxing Li, Xiaoliang Chen, Zuqing Zhu</i>                                                                                                                                                                |    |
| Field Experiments on Frame-Based Delay Measurement Using OpenZR+ Pluggable Transceivers: Enabling Latency-Managed IP-over-DWDM for Data Center Interconnects .....                                                                             | 7  |
| <i>Sae Kojima, Kazuya Anazawa, Hiroyuki Ishihara, Toru Mano, Hideki Nishizawa, Dmitrii Briantcev<br/>Daniel Kilper, Marco Ruffini, Yoshiaki Sone, Koichi Takasugi</i>                                                                          |    |
| Convergence of Optical Networks and Computing: the Potential of Smart NICs with Pluggable Optics .....                                                                                                                                         | 10 |
| <i>Filippo Cugini, Rana Abu Bakar, Francesco Paolucci, Juan Jose Vegas Olmos, Andrea Sgambelluri<br/>Piero Castoldi</i>                                                                                                                        |    |
| 9dB link margin gain using a Quantum Dot SOA in an 8-wavelength DWDM 50Gbps NRZ CPO link .....                                                                                                                                                 | 13 |
| <i>Alexander Sludds, Srinivasan Ashwyn Srinivasan, Aly Elrefaie, Mazin Alalusi, Ian MacFarlane<br/>Dominic Goodwill, Joyce K. S. Poon, Darius Bunandar, Jessie Rosenberg</i>                                                                   |    |
| An 8×256 Gbps DWDM Silicon Photonic Microring Transmitter Using a 200 GHz Spaced Quantum-Dot Comb Laser .....                                                                                                                                  | 16 |
| <i>Xianglin Bu, Shujie Pan, Jintao Xue, Shenlei Bao, Junjie Yang, Chao Cheng, Wenfu Zhang, Siming Chen<br/>Binhao Wang</i>                                                                                                                     |    |
| Super-Channel Transmission with Ultra-Compact Microring Modulators Achieving Net 612.9 Gbps per Polarization .....                                                                                                                             | 19 |
| <i>Erwan Weckenmann, Arman Safarnejadian, Alireza Geravand, Jean-Michel Vallée, Zibo Zheng<br/>Simon Levasseur, Ming Zeng, Leslie A. Rusch, Wei Shi</i>                                                                                        |    |
| Bidirectional Full C-band Transmission over Hollow-core Cable using 400G ZR .....                                                                                                                                                              | 22 |
| <i>Y. Hong, A. Ali, M. Kamalian-Kopae, S. Bakhtiari Gorajoobi, J. Hooley, C. Wallace, J. Gaudette<br/>D.J. Richardson, B.J. Puttnam</i>                                                                                                        |    |
| 2x30.4Tb/s Bidirectional 60.85-km Long Data Center Interconnect using Low Loss Hollow Core Fiber and 800G ZR OSFP modules .....                                                                                                                | 25 |
| <i>Arnaud Dupas, Carina Castineiras Carrero, Haik Mardoyan, Peng Li, Lei Zhang, Jie Luo, Chengpeng Fu<br/>Chifeng Hu, Oriol Bertran Pardo, Abdelali El Imadi, Naseredin Aramnejad, Vishal Gadiya<br/>Jérémie Renaudier</i>                     |    |
| 20.2Pb/s C+L-band Wavelength Reconfigurable Real-time Optical Network Applied in Inter Data-Center Transmission with 316 Switching Channels .....                                                                                              | 28 |
| <i>Linbojie Huang, Peng Sun, Longquan Dai, Juan Wu, Min Lin, Shijia Yan, Shangcheng Wang, Honglin Ji<br/>Zichen Liu, Xu Zhang, Chao Li, Zhixue He, Shaohua Yu</i>                                                                              |    |
| Multiband Transmission Supported by Wavelength Conversion and Parametric Amplification .....                                                                                                                                                   | 31 |
| <i>Shimpei Shimizu, Kosuke Kimura, Akira Kawai, Masashi Abe, Shunya Konno, Takushi Kazama<br/>Koji Enbutsu, Takahiro Kashiwazaki, Megumi Hoshi, Masanori Nakamura, Fukutaro Hamaoka<br/>Takeshi Umeki, Takayuki Kobayashi, Yutaka Miyamoto</i> |    |

|                                                                                                                                         |    |
|-----------------------------------------------------------------------------------------------------------------------------------------|----|
| Petabit-per-Second C+L Band Transmission Over a Field-deployed 15-Mode Fiber Link .....                                                 | 34 |
| <i>G. Di Sciullo, R. S. Luís, M. van den Hout, Q. Wu, P. Sillard, F. Achten, R. Emmerich</i>                                            |    |
| <i>N. Braig-Christophersen, B. J. Puttnam, D. A. Shaji, L. A. Zischler, A. Marotta, F. Graziosi, C. Lasagni</i>                         |    |
| <i>P. Serena, A. Bononi, G. Rademacher, C. Okonkwo, C. Schubert, R. Freund, J. Sakaguchi, A. Mecozzi</i>                                |    |
| <i>H. Furukawa, C. Antonelli</i>                                                                                                        |    |
| Mode Loss Impact on Transmission over a 15-Mode Multi-Mode Fiber Point-to-Point Link .....                                              | 37 |
| <i>Stefano Gaiani, Besma Kalla, Ruben S. Luís, Daniele Orsuti, Menno van den Hout, Pierre Sillard</i>                                   |    |
| <i>Thomas Bradley, Chigo Okonkwo, Paola Parolari, Alberto Gatto, Pierpaolo Boffi, Hideaki Furukawa</i>                                  |    |
| Broadband Long-haul Weakly-coupled 3-LP-mode FMF Transmission only Using Single-mode Transceivers .....                                 | 40 |
| <i>Chengbin Long, Gang Qiao, Yuyang Gao, Jiarui Zhang, Jian Cui, Siyuan Liu, Baolong Zhu, Wei Chen</i>                                  |    |
| <i>Lei Shen, Jie Luo, Yongqi He, Zhangyuan Chen, Juhao Li</i>                                                                           |    |
| Numerical and Experimental Investigation of Multiband WDM transmission Employing Backward Raman Pumping over Hybrid SMF-MCF Links ..... | 43 |
| <i>Kosuke Kimura, Shimpei Shimizu, Megumi Hoshi, Kohki Shibahara, Akira Kawai, Masanori Nakamura</i>                                    |    |
| <i>Fukutaro Hamaoka, Takayuki Kobayashi, Yutaka Miyamoto</i>                                                                            |    |
| Highly accurate range acquisition for FMCW LiDAR with optimized resampling and maximum likelihood estimation .....                      | 46 |
| <i>Ying Lu, Jun Zhou, Ruiqiong Yang, Ning Cheng, Xuezhe Zheng</i>                                                                       |    |
| High-Linearity Directly-Modulated DFB Laser for Pre-Distortion-Free FMCW LiDAR .....                                                    | 49 |
| <i>Zhangdi Chen, Philippe Pagnod-Rossiaux, Victor Rodrigues, Candice Blin, Martine Thebault</i>                                         |    |
| <i>Angelo Vanga, Kamelya Bougueroua, Guang-Hua Duan, Andreas Kohl, Frédéric Grillot, Nicolas Chimot</i>                                 |    |
| Silicon Nitride LiDAR Chip with Minimal Back-Reflection for Timing Jitter Compensation .....                                            | 52 |
| <i>Guan-Jie Huang, Chueh-Yu Chen, Wan-Chun Lin, Shih-Hsiang Hsu</i>                                                                     |    |
| Wafer-scale heterogeneously integrated self-injection-locked lasers .....                                                               | 55 |
| <i>Igor Kudelin, Bowen Song, Kaustubh Asawa, Boqiang Shen, Yang Shen, Ali Dorche, Joel Guo</i>                                          |    |
| <i>Jonathan Peters, Glenn Kim, Nathan Kim, Catherine Nguyen, Theodore Morin, Zeyu Zhang, Chong Zhang</i>                                |    |
| <i>Tin Komljenovic, Minh Tran</i>                                                                                                       |    |
| Ultrafast FMCW LiDAR with Micrometer Resolution Enabled by a Quantum Walk Comb Laser .....                                              | 58 |
| <i>Bahareh Marzban, Laurenz Kulmer, Lucius Miller, Tobias Blatter, Alexander Dikopoltsev, Giacomo Scalari</i>                           |    |
| <i>Juerg Leuthold, Jerome Faist</i>                                                                                                     |    |
| Transceiver Optical Phased Array for Parallel Ranging Based on Grating-lobe Demodulation .....                                          | 61 |
| <i>Jie Li, Heming Hu, Ziming Wang, Weipeng Wang, Wenqiang Yue, Baisong Chen, Yingzhi Li, Huan Qu</i>                                    |    |
| <i>Zihao Zhi, Haolun Du, Xianqi Pang, Guiyang Zhang, Xiangyi Sun, Yijie Lin, Qian Wang, Jinglei Qin</i>                                 |    |
| <i>Mengjia Jin, Xiaolong Hu, Xueyan Li, Junfeng Song</i>                                                                                |    |
| Super linewidth broadening based on heater-free Mach-Zehnder-Interferometer-Coupled Microring Resonator .....                           | 64 |
| <i>Wenju Li, Hanghang Li, Haodong Yang, Yizheng Chen, Zhuang Fan, Xiaolong Fan, Wenchan Dong</i>                                        |    |
| <i>Jing Xu, Xinliang Zhang</i>                                                                                                          |    |
| Silicon Flat-Top MZI Based O-Band CWDM (De) Multiplexer with Arbitrary Coupling Ratio MMI Couplers .....                                | 68 |
| <i>Zakriya Mohammed, Mayank Raj, Chuan Xie, Ali Dorche, Ari Novack, Matthew Streshinsky</i>                                             |    |
| <i>Parag Upadhyaya, Yohan Frans</i>                                                                                                     |    |

|                                                                                                                                                                                                                                                                |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Silicon Photonic Integrated Polarization Synthesizer .....                                                                                                                                                                                                     | 71  |
