# TABLE OF CONTENTS

|                                                                                                                                    |    |
|------------------------------------------------------------------------------------------------------------------------------------|----|
| Implementation of Securing Text Data Using Steganography and Cryptographic Techniques .....                                        | 1  |
| <i>Sukshma Shetty, Sowmya K, Shreejith D Shetty, Sunil, Vinay Poojari S, Deepak Shenoy</i>                                         |    |
| XenoCipher: A Secure Key Exchange and Encryption Pipeline for Resource-Constrained Devices .....                                   | 7  |
| <i>Alok Ranjan, Vivek S A, Subramanyam C V, Sujal Talekar, Sumit S Kadwadkar</i>                                                   |    |
| LLM-Based Agentic Decision Support for Maritime Threat Assessment .....                                                            | 13 |
| <i>Krishikaa Mathi Bharathi S S, T. Grace Shalini, Bhavesh P, Nayantra Ramkrishnan</i>                                             |    |
| Smart Autonomous Surveillance Rover (SASR) .....                                                                                   | 22 |
| <i>Sneha, Madan Lal Saini</i>                                                                                                      |    |
| EdgeWise Pretrain: Few-Shot Graph Intrusion Detection for Heterogeneous Networks .....                                             | 28 |
| <i>Irfan Mohd</i>                                                                                                                  |    |
| Spectral Attention GNN Framework for Secure Telemetry in UAV and Satellite Communication Systems .....                             | 37 |
| <i>Yogendra Chhetri</i>                                                                                                            |    |
| Hybrid Orthogonal CNN-ResNet50 with Grey Wolf Optimization for Malware Classification on Malnet .....                              | 43 |
| <i>Yogendra Chhetri, Deepika, Sukhvir Kaur</i>                                                                                     |    |
| Privacy-Preserving Collaborative Threat Intelligence for Predictive Cyber Defense .....                                            | 49 |
| <i>Guru Prasad Reddy K, R. Saranya, Santhi M, Rajendran Thanikachalam, Satheesh Kumar M, B. Aishwarya</i>                          |    |
| Quantum-Enhanced Blockchain for Optimized Supply Chain Management: Leveraging Qaoa and Secure Transaction Protocols .....          | 55 |
| <i>L Sherin Beevi, Ponsy R K Sathia Bhama, Joe Prathap P M, Muthupandian V</i>                                                     |    |
| Smart Cybersecurity: A Dataset-Driven Comparative Analysis of ML Techniques for Network Intrusion Detection and Prevention .....   | 61 |
| <i>Astha Das, Saurabh Bilgaiyan, Anuradha Vashishtha, Amartya Chakroborty</i>                                                      |    |
| NeuroMesh Sentinel: Decentralized Swarm Intelligence for Autonomous Multi-Cloud Security .....                                     | 67 |
| <i>Krishnaveni K, Jeevitha K, J.T Anita Rose</i>                                                                                   |    |
| Hybridization of Meta-Heuristic Based Optimization Techniques with RNN- Based Machine Learning for Detection of Cyberattacks ..... | 74 |
| <i>Sasmita Panigrahi, Manas Ranjan Patra, Ashalata Panigrahi</i>                                                                   |    |
| A Dual-Model Nids Architecture Combining Convolutional Neural Networks and Autoencoders for Robust Attack Detection .....          | 80 |
| <i>Robin Jose R, Surya R, Ahila Devi E</i>                                                                                         |    |
| Geospatial Crime Type Prediction Using Machine Learning .....                                                                      | 86 |
| <i>S. Banumathi, K. Prasanna Anjaneyulu, K. Chandra Sekhar</i>                                                                     |    |
| Design of an IDS for Detection of Adversarial Attacks in IoT Using Machine Learning .....                                          | 92 |
| <i>Sachit Kumar Nayak, Ashalata Panigrahi</i>                                                                                      |    |
| ML and Cloud-Based Turbulence Prediction Model for Aviation Safety .....                                                           | 98 |
| <i>Ananya Karn, Brijmohan Lal Sahu</i>                                                                                             |    |

|                                                                                                                                                                                |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Variance-Guided Adaptive DWT-DCT Image Steganography for Defense and UAV Applications .....                                                                                    | 104 |
| <i>Gatram Sravan Kumar, Mitu Baral, Mettu Bhavya Nayana Reddy, Kamalakanta Sethi</i>                                                                                           |     |
| <i>G Rama Mohan Babu</i>                                                                                                                                                       |     |
| Sensitive Data Masking and Security Validation in File Upload System .....                                                                                                     | 110 |
| <i>Edwin Santhosh L, Karthick S.A, J Sarojini Premalatha</i>                                                                                                                   |     |
| An Explainable WGAN-GP Framework for Deepfake Voice Detection .....                                                                                                            | 116 |
| <i>S. Sahebzathi, T. Aruna, A. Al kabeeba, T. Praveena</i>                                                                                                                     |     |
| Quantum-Resistant Cryptography for Secure IoT Communication Systems .....                                                                                                      | 120 |
| <i>Aakash S, Kalish S, Nivetha S</i>                                                                                                                                           |     |
| A Miniaturized Frequency Reconfigurable Antenna for Sub-6 GHz 5G and WBAN Communications .....                                                                                 | 126 |
| <i>Vignesh M, Arulmurugan S, Minakshmi Shaw, Pradeeksha P V, Sobika A K, Sarveshwaran J</i>                                                                                    |     |
| Military Digital Twins - a Data-Hardened Architecture for Digital Twins to Enable Operational<br>Resilience in Adversarial Environments .....                                  | 133 |
| <i>Anand Rath, Manas Ranjan Patra</i>                                                                                                                                          |     |
| Detection of Coordinated Social Media Manipulation using Temporal Network Analysis .....                                                                                       | 139 |
| <i>Ramya D, Vishali M, Dhora M, Meena R, Bowtyashree K</i>                                                                                                                     |     |
| Strategic Information Confrontation Through Persistent Digital Surveillance: An Integrated Osintsocial<br>Engineering Framework for Long-Term Intelligence Weaponization ..... | 145 |
| <i>Abinash Kumar Pala, Manish Tripathy, Priyadarsan Patra, Raghunandan Swain, Dinesh Kumar Dash</i>                                                                            |     |
| <i>Sandipan Mallik</i>                                                                                                                                                         |     |
| Transforming Text into Secure Information: A DES Encryption and Deep Learning Approach .....                                                                                   | 151 |
| <i>Rahul Kumar, Kirti Kumari, Ch Sree Kumar, Manjushree Nayak, Brojo Kishore Mishra, Sandipan Mallik</i>                                                                       |     |
| Quantifying Narrative Dominance: The “Authenticity Trap” and Data-Driven Decision Support in<br>Cognitive Warfare .....                                                        | 158 |
| <i>Nishank Sharma</i>                                                                                                                                                          |     |
| Learning-Driven Wi-Fi Intrusion Prevention Using Anomaly Detection and Attack Classification .....                                                                             | 162 |
| <i>Sahil Sharma, Teek Parval Sharma</i>                                                                                                                                        |     |
| SAKSHI: Agentic AI for Regional Intelligence Using Structured Open-Source Intelligence (OSINT) .....                                                                           | 168 |
| <i>Nishank Sharma, Surya Prakash, Hemprasad Patil</i>                                                                                                                          |     |
| AI-Driven Battlefield Decision Support Using Probabilistic Threat Modeling (Bayesian Networks)<br>Integrated with Multi-Objective Optimization (NSGA-II) .....                 | 174 |
| <i>Joe Prathap P M, Thanushree C Somapur, W Vinil Dani</i>                                                                                                                     |     |
| LSTM Based Threat Intelligence Methods for Intrusion Classifications of DOS Attack in WSN .....                                                                                | 180 |
| <i>Bipin Bihari Jayasingh, M Yogitha</i>                                                                                                                                       |     |
| A Real-Time Drone Detection System Using Hybrid Deep Learning YCFANet .....                                                                                                    | 186 |
| <i>Siba Sundar Das, Sai Krishna Beeraka, Charulata Palai, Pradeep Kumar Jena</i>                                                                                               |     |
| Operation Sindoor: Role of the Indigenous Integrated Air Command and Control System (IACCS) in a<br>High-Tempo Network-Centric Conflict – A Case Study .....                   | 192 |
| <i>Niranjana Kumar Parhi</i>                                                                                                                                                   |     |

|                                                                                                                                                                                  |     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
