# TABLE OF CONTENTS

|                                                                                                                                                                   |    |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Design of a Digital Twin Interactive System for a Radio Control Wheeled Vehicle .....                                                                             | 1  |
| <i>Qi Li, Wen-kai Wu, Zhi-qi Lang, Hong-cheng Jiao, Tao Jing, Han-tao Zhao</i>                                                                                    |    |
| Autonomous Sorting Via Human-Robot Grasp Mapping and Pca-Based Decoupling .....                                                                                   | 10 |
| <i>Tao Tao, YaHao Xu, XiangRong Xu, FuChun Sun, HuaiDong Zhou</i>                                                                                                 |    |
| Event-Structured LLM Planning for Continuous-Parameter Industrial Workflows .....                                                                                 | 15 |
| <i>Haishan Wei, Zheng Zhang</i>                                                                                                                                   |    |
| Vision-Energy Coupled Robotic Dry Ice Cleaning with Adaptive Trajectory Planning for Runway<br>Prism Lights .....                                                 | 24 |
| <i>Kezheng Sun, Yongyong Sun, Wu Yan, Yangmin Ou, Zhaoyang Liao</i>                                                                                               |    |
| Research on Intelligent Prediction and Design Method of Gear Modification Parameters Based on Fine<br>Tuning Large Model .....                                    | 29 |
| <i>Xuemei Chen, Jungang Nie, Mengmeng Zhao, Chen He</i>                                                                                                           |    |
| Design of Split Glass Molding Heating Assembly and Construction of Neural Network Temperature<br>Control System .....                                             | 39 |
| <i>Machong Qu, Yingmeng He, Bo Su, Changqing Gao, Liqiang Cheng, Wendi Dong, Liping Ma, Jiaqing Xie</i>                                                           |    |
| Trajectory Design of Angular Displacement for Centrifugal Actuator Based on Model Predictive<br>Control and Research on Vehicle Lateral Vibration Reduction ..... | 49 |
| <i>Haiyan Xu, Bing Xu, Yu Zhang, Yizhe Song, Yijue Sun</i>                                                                                                        |    |
| Multi-Dimensional Monitoring of Line Loss Anomalies in Dedicated Transformer Users Under<br>Quantitative Perception Training .....                                | 53 |
| <i>Zhongjing Zhang, Yu Zhang, Ying Lan</i>                                                                                                                        |    |
| Research on Automatic Monitoring Algorithm for Frequency Modulation Fault Signals in<br>Electromechanical Integrated System Circuits .....                        | 57 |
| <i>Liexiong Li, Suqun Chen, Lingzhi Li</i>                                                                                                                        |    |
| FedAPA-FD: Class-Sensitive Personalized Federated Learning for Non-IID Bearing Fault Diagnosis .....                                                              | 66 |
| <i>Shiyuan Yu, Jiaojie Li, Zijian Zhou</i>                                                                                                                        |    |
| Design and Control of 5DOF Tiltrotor Quadcopter Aerial Operation Platform .....                                                                                   | 71 |
| <i>Zhongyu Yao, Jin Yu, Wusheng Chou</i>                                                                                                                          |    |
| A Reasoning-Based Robotic Bolt Fastening System with a Dexterous Hand .....                                                                                       | 78 |
| <i>Tao Tao, ChunYun Zhang, HuaiDong Zhou, FuChun Sun</i>                                                                                                          |    |
| Design and Integration of an Embodied Cyber-Physical System for Autonomous Conversational<br>Interaction: A Healthcare Case Study .....                           | 83 |
| <i>Chacharin Lertyosbordin, Puvasit Aphisinrungsrot, Krittitee Iamruttanawong, Danainut Trekitwatanakul<br/>Danaithep Trekitwatanakul</i>                         |    |
| VLM as a Virtual Proprioception: Semantic Slip Detection for Sensorless Grippers Using Quantized<br>Small-Scale Models .....                                      | 88 |
| <i>Chacharin Lertyosbordin, Boonyawat Chaithirasakul, Puvasit Aphisinrungsrot, Sorathon Chungsawanant<br/>Nontapat Prayoonthong</i>                               |    |

|                                                                                                                                       |     |
|---------------------------------------------------------------------------------------------------------------------------------------|-----|
| Design of a Robust Structural Optimization Framework for Industrial Robots Considering Kinematic and Dynamic Uncertainties .....      | 93  |
| <i>Xi Liu, Hongjuan Yang, Changping Liu, Quan Shi, Yaoxi Wen, Jinhua Liao</i>                                                         |     |
| Robust Force Control for Omnidirectional Mobile Robots in Wall Grinding Tasks .....                                                   | 97  |
| <i>Junyu Fan</i>                                                                                                                      |     |
| An Improved Path Planning Algorithm Based on Progressive Target Bias and Smoothing Strategy for Mobile Robots .....                   | 101 |
| <i>Chao Ding, Silei Han, Min Qu, Jiasen Tian, Xiao Tan</i>                                                                            |     |
| Research on High-Precision Indoor Navigation System Based on Improved Federated Filtering and Tightly-Coupled Fusion .....            | 108 |
| <i>Zhenyu Shi, Jianan Liu, Shiyong Kou, Pengliang Song</i>                                                                            |     |
| Research Review on UAV-Based Air-Ground Small Target Detection and Tracking .....                                                     | 113 |
| <i>Shaoqiong Duan, Shixiao Wu, Xi Wang</i>                                                                                            |     |
| An Improved Artificial Potential Field Algorithm for 3D Obstacle Avoidance Path Planning of Robotic Manipulators .....                | 117 |
| <i>Mingzhe Xu</i>                                                                                                                     |     |
| Graphene-Based High-Resolution Flexible Strain Sensor Array and Its Application in Robotic Hand Control .....                         | 122 |
| <i>Yueran Ding, Jun Yang, Wengchao Luo, Yuan Jia</i>                                                                                  |     |
| Adaptive Impedance Control of a Dexterous Hand for Ground Assembly of Large Space Truss Structures .....                              | 127 |
| <i>Wenqiang Xian, Yan Wang, Jianchao Han, Yun Li, Rongrong Yu</i>                                                                     |     |
| LLM/VLM-Driven Integrated Testing Framework for Autonomous Driving Assistance Systems: From Requirements to Failure Attribution ..... | 132 |
| <i>Hao Chen, Feiyang Liu, Bin Li, Zhiyun Li, Yunfei Zhang</i>                                                                         |     |
| DisassemblyResearch on Disassembly Scheduling Optimization Based on Quantum Annealing in Intelligent Manufacturing Environment .....  | 139 |
| <i>Yupeng Zhang, Liang Cong</i>                                                                                                       |     |
| Human-Robot Collaborative Control and Simulation of Lower Limb Exoskeleton Robot Based on Gait Online Learning and Prediction .....   | 144 |
| <i>Erbao Lu, Chong Xiao</i>                                                                                                           |     |
| Adaptive Fast Super-Twisting Sliding Mode Control Method for Lower Limb Exoskeleton Robots .....                                      | 149 |
| <i>Junqiang Li, Junpeng Wang, Juan Wang, Dong Yang</i>                                                                                |     |
| Detection of the Upper Surface Pose of Yarn Cones for Robot Gripping .....                                                            | 154 |
| <i>Jian He, Yujie Chen</i>                                                                                                            |     |
| A Global Vision-Based Mobile Obstacle Perception and Global Path Optimization Method for Unmanned Vehicles .....                      | 161 |
| <i>Shuang Yu, Liangxi Xie, Ming Xiao, Zihao Guo</i>                                                                                   |     |
| A Study on Trajectory Tracking Control of USVs Based on an Improved Sliding Mode Control Algorithm .....                              | 166 |
| <i>Zonghe Ding, Ling Chen, Liming Chang, Qi Qu</i>                                                                                    |     |

|                                                                                                                                        |     |
|----------------------------------------------------------------------------------------------------------------------------------------|-----|
| Trajectory Tracking Control of a Quadrotor UAV Subject to Dryden Turbulence .....                                                      | 171 |
| <i>Kaiwen Gu, Shaojie Jing, Jun Liu</i>                                                                                                |     |
| A Safety-Triggered Controller for Three-Wheeled Omnidirectional Mobile Robots .....                                                    | 175 |
| <i>Liming Chang, Zonghe Ding, Lu Zou, Qi Qu, Yang Ran, Mingtao Hu</i>                                                                  |     |
| Engineering Methodology and Optimization for Multimodal Sequential Perception Fusion in Complex Traffic Scenarios .....                | 179 |
| <i>Run Yuan, Haonan Long, Xueli Wang</i>                                                                                               |     |
| A Vision-Guided Bin-Picking Method for Asymmetric Metallic Tubes Based on Image Segmentation and Convolutional Template Matching ..... | 185 |
| <i>Yuyang Gao, Xiaoran Zhang, Ligang Jin, Rui Song</i>                                                                                 |     |
| A Hexagonal Soft Robot Driven by High-Frequency HASEL Actuators .....                                                                  | 189 |
| <i>Chao Cao, Shaonan Shi, Yao Li, Bing Li</i>                                                                                          |     |
| An Efficient Deep Reinforcement Learning Framework with Hierarchical Modeling and Policy Compression .....                             | 193 |
| <i>XiaoLing Bai, XingHan Li, Xu Jiang, Li Sun</i>                                                                                      |     |
| A Single-Motor Vibration-Driven Microrobot with Terrain Adaptability for Robust Cross-Material Locomotion .....                        | 199 |
| <i>Peng Liu, Chenghao Wang, Lingqi Tang, Yao Li, Bing Li</i>                                                                           |     |
| Learning a Kinodynamic Trajectory Manifold for Impact-Aware Compliant Catching of Fast-Moving Objects .....                            | 203 |
| <i>Guorui Pei, Mengshi Zhang, Xi Chen, Jinsong Wu, Jiaming Qi, Peng Zhou</i>                                                           |     |
| Robust Humanoid Reinforcement Learning via State Invariance Encoding for Diverse Initial Postures .....                                | 208 |
| <i>Weikang Dai, Huikai Fan, Manyi Xu, Meijun Chen</i>                                                                                  |     |
| A Multi-Physics Coupled Continuous-Time Model for SOC and TTE Prediction in Quadruped Robots .....                                     | 212 |
| <i>Tianhong Zhu, Xinnan Wang, Jianqi Lao</i>                                                                                           |     |
| A Bio-Inspired Mapping Method for Cyborg Cockroaches Using Motion Pattern Recognition .....                                            | 216 |
