Combined Proceedings International Plant Propagators' Society 2025

IPPS Volume 75

Held 2025

Editors:

Robert L. Geneve
Ranjith Pathirana
H. William Barnes, Jr.
Alexandra Mackay
Kathleen Stewart
Elsa du Toit
Fred T. Davies, Jr.
Ryan Stewart
Louise Heissel

ISBN: 979-8-3313-3955-5

Table of Contents

Southern Africa Region

Andrew Hankey and Tony De Castro	Four new species of *Ledebouria* from Steenkampsberg, Mpumalanga South Africa	1-9

Australian Region

Bree James	Inaugural address	10-13
Puthiyaparambil Josekutty	Convener's message	14-15
Tony Arioli and Dr Marianne Weisser	Seasol® seaweed extract for advanced plant root growth, development and stress tolerance	16-23
Chloe Bawden	South Africa exchange 2025	24-33
Des Boorman	Grafting tips, tricks and tools of the trade	34-39
Rakhi Chaturvedi	Cellular totipotency and crop improvement utilizing plant tissue culture techniques	40-47
Sadanand A. Dhekney, Gabrielle Johnson, William Burks, Erik Lindsay and Michael Foland	*Cannabis sativa* propagation for field cultivation and cannabinoid production	48-57
Yan Diczbalis	Can I eat that palm? An introduction to edible palms, their propagation, production and conservation	58-67
Daniel Docherty	Syngenta is bringing science backed by research and data to the biostimulant market through investment	68-69
Elaine Duncan	Growing plants in the northern Queensland wet and dry tropics: a guide to thriving in a unique climate	70-78

Bridie Franks	Comparison of acclimation conditions and media types for the optimal growth of *Echeveria* 'Dark Vader' and K*alanchoe* 'Gremlin,' following in vitro propagation	тф-уф
Komal Goel, Alexis Marshall, Andy Ball, Gaurav Zinta and Nitin Mantri	Reintroduction of orphaned crops for biodiversity conservation and climate-resilient agriculture	90-95
Vinod Kumar Gopal, Lakshmi Nambiar, C. P. Nishanth and M.T. Athulya	A novel method to provide solar PV with backup power for plant nurseries, agriculture, and remote dwellings	96-104
Tania L Harman	Research and development tax incentive for the propagation industry	105-108
Jayeni Chathurika Amarathunga Hiti-Bandaralage and Shaun O'Brien	Commercial tissue culture propagation of pomegranate (*Punica granatum*) in Australia	109-125
Peter A. Howe	Symbiotic nitrogen fixing bacteria of native legumes from the southwest of Western Australia, and the significance for the nursery and revegetation industry	126-146
David W.M. Leung	Over three decades of plant tissue culture-based plant propagation for diverse applications	147-154
Nitin Mantri, Komal Goel, Divya, Kadambot Siddique, Josekutty Puthiyaparambil	The future of nursery pathogen detection and management	155-161
Van Anh Nguyen, Madeleine Gleeson, Chris O'Brien, Eveline Y.Y. Kong, Karen Sommerville, Stephen Adkins, Bryn Funnekotter, Ricardo L. Mancera, Neena Mitter, Alice Hayward	Utilization of sodium dichloroisocyanurate for nodal culture initiation of *Lenwebbia sp*. main range – a critically endangered Australian native Myrtaceae	162-170
Anil Kumar Nadesa Panicker	Salvaging crop wild relatives: Conservation story from a global hotspot	171-179

Ranjith Pathirana	Freezing biological time: cryopreserving clonal crop diversity for sustainable horticulture and forestry	180-197
Tripti Singh	Sustainable forest and wood product sector in Australia	198-199
Natalie D. Vallance	The role of plant nurseries in conserving Australia's rare, endangered and priority plant species	200-219
Tony VanderStaay	Efficiencies in a small production nursery	220-223
New Zealand Region		
Christine E.H. Coker	Gardens of tomorrow: future trends of sustainable, technological and community-driven gardening	224-227
Robert Geneve	Geophytes – From the ground up	228-246
Henry A. Gonzalez, Silvia Valles, James S. Owen, Jr., Gemma Reguera, Christopher M. Ranger, R. Thomas Fernandez	Scaling up two-stage woodchip bioreactors to recycle nutrients in greenhouse irrigation return water	247-253
Charlie Hall	Economic trends and benchmarking in the green industry: A 2025 IPPS synthesis	254-258
Vance Hooper	A lifetime with magnolias: From layering beds to tissue culture explants	259-264
Emily G. Joseph	Propagation for conservation and cultivation potential in the Pacific Northwest	265-275
James Robbins and Joe Mari Maja	Drones in nursery production	276-279

Jim Rumbal	Looking back to the future with Hinoki cypress	280-287
Jiyong Shin and Erik S. Runkle	LED lighting: Keys to successful applications in horticulture	288-294
Southern Region – North America		
Michael Roe	Technical sessions of International Plant Production Society – Southern Region of North America (SRNA) annual meeting – Presidential address	295-297
Fred T. Davies, Jr.	A horticultural journey and leadership opportunities with IPPS	298-320
Jerrin Victor	Designing careers with intent: The futuristic resume framework	321-326
Anthony T. Bowden	Beyond the dip: Redefining auxin application for improved propagation outcomes	327-342
Sisi Chen, QingchunLiu, Yisell Velazquez Hernandez, Alexandra M. Revynthi, Sandra Wilson, and Xingbo Wu	Advancing tropical hibiscus breeding through pest and disease resistance	343-350
Martha Vilchez, Qinglin Wu and Jeb S Fields	Evaluating wood materials made from hammermilled heat-treated boards as peat moss alternatives in greenhouse production of tomato and marigold	351-361
Yan Zhang and Ping Yu	Can organic mulches effectively manage *Thrips parvispinus* in ornamental plants?	362-370
Masroor Ul Hasan Syed, Aryan Anand, Shekhar Suman Borah, Harshitha Manjunatha, Prabha Sundaravadivel, Patricia R. Knight, Siva P. Kumpatla, Prasanna H. Gowda, H. Allen Torbert	MagCount: A digital framework for automated counting of southern magnolias for inventory management in nurseries	371-377

Juang Horng Chong	What we know and don't know about fungus gnats	378-385
Lynn Griffith	Nutritional considerations for optimum stock plant and cutting production	386-392
Jennifer Tucker	Finding your niche: A growing journey	393-397
Nelda Hernández and Paul R. Fisher	Train your staff how to water! the professional irrigator training series	398-405
Chris Marble	The latest in nursery weed control: Herbicides, application equipment, mulch, and other strategies to save money	406-417
Sandra B. Wilson	"I can propagate that": A survey of propagation research from seeds to tissue culture	418-425
Jeremy Pickens	Cooked roots, stunted shoots: The hidden cost of hot containers	426-432
Mark F. Freeman and Paul Winski	Boxwood disease mitigation with biologicals	433-439
Max McKeown	IPPS European exchange 2024	440-449
Harshitha Manjunatha, Prabha Sundaravadivel, Shekhar Suman Borah, Lakshman Tamil, Siva P. Kumpatla, Patricia R. Knight	AI-driven tool for high-dimensional phenotyping of floral health in roses using hyperspectral imaging	450-456
Megan Gibb and Jeb S. Fields	Replacing some peat with sugarcane bagasse biochar can improve nutrient retention in floriculture production	457-469
Shuwen Luo, Yulong Chen and Ping Yu	Effects of gibberellic acid, nitrate, and scarification on *Osmanthus fragrans* seed germination	470-475

Eastern Region – North America

Joe F. Boggs, Ashley Kulhanek, Amy K. Stone, Kayla I. Perry, Samuel F. Ward	Box tree moth: What should you do?	476-482
Tim Brotzman	Best and favorite plants I have grown or wish I had met earlier and still might try	483-497
Paul Capiello	Plant evaluations at Yew Dell Botanical Gardens	498-502
Steve Castorani	Vintage vibes for modern times	503-518
Theresa M. Culley and Jenna Breiner	Dealing with box tree moth: Identifying best boxwood cultivars using genetics	519-527
Robert Geneve	Seed dispersal – Running away from home	528-546
Jesse Gossage and Mike Bosela	Aerial Root Layering in Spicebush as a Proxy to Sassafras Propagation	547-548
Mike Hayman	Contributions from pioneering plantsmen	549-579
Alyssa M. Headley, Brandon M. Miller, and Jerry D. Cohen	Somatic embryogenesis as a propagation strategy for hybrid hazel	580-583
Bill Hendricks	Favorite woody plants from a career nurseryman	584-594
Jordan Holtkamp and Matt Bartlett	Brokers, partnerships and production	595-596
Derek Humbert	Propagation and production of oaks	597-605
Brian F. Jorge	Expanding the palette of native plants	606-608
Axl Knickerbocker and Kim Shearer	Plant evaluation of J. Frank Schmidt trial packs	609-612

Olivia Liebing and W. Garrett Owen	The effects of foliar IBA in nursery liner propagation	613-617
Xinghao Mao and Mark P. Bridgen	Colombia: The world's cut flower powerhouse	618-626
Megan Philpott, Mairead Kennedy, and Valerie Pence	The future of conservation: Cryobiotechnology for oak and clover	627-630
Martin Stone and Brooks A. Dorman	Chlorophyll content of grafted tomatoes in an early production environment	631-635
Rachel Conley	New plant forum 2025 – Eastern Region IPPS	636-645

Western Region – North America

Robert Geneve	The fascinating ways plants move	646-661
