# TABLE OF CONTENTS

|                                                                                                                                               |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------|----|
| Low-Complexity Precoding Design for Massive MIMO LEO Satellite Communications .....                                                           | 1  |
| <i>Feng Zhu, Yunfei Wang, Ziyu Xiang, Xiqi Gao</i>                                                                                            |    |
| RAS: Reconfiguration-Aware Adaptive Video Streaming Over Satellite Networks .....                                                             | 7  |
| <i>Yijie Liu, Zeqi Lai, Qian Wu, Hewu Li, Yuanjie Li, Jun Liu</i>                                                                             |    |
| Ultra-Low-Complexity Multigroup Multicast Beamforming in Frame-Based Geo Satellite Communication .....                                        | 13 |
| <i>Xin Chen, Hao Lin, Yifan Wu, Zhiyong Luo</i>                                                                                               |    |
| Adaptive Beam Hopping for Over-the-Air Online Federated Learning in LEO Satellite Networks .....                                              | 19 |
| <i>Shaojie Wang, Zhendong Li, Zhou Su, Zihao Zhang, Haixia Peng, Nan Cheng, Wen Chen</i>                                                      |    |
| An Interference Analysis Algorithm Based on Inverse Transform Sampling for D2C and GSO Satellite Systems Operating in Reverse Band Mode ..... | 25 |
| <i>Zimeng Lei, Liang Yin, Yitong Liu, Hongwen Yang</i>                                                                                        |    |
| Cooperative MARL and Heterogeneous Onboard Computing for LEO Satellite Routing .....                                                          | 31 |
| <i>Jiajia Qin, Feng Tian, Qi Zhang, Youlong Wu, Wenxin Yao, Lele Lai, Yue Gao, Haiying Hu</i>                                                 |    |
| Efficient Resource Allocation and Service Migration in MEO Rosette Constellation Satellite Networks .....                                     | 37 |
| <i>Haotong Wang, Jun Du, Chunxiao Jiang, Jintao Wang, Merouane Debbah</i>                                                                     |    |
| Trajectory Designs for UAV Relaying with LEO Satellites: Incorporating Practical Constraints .....                                            | 43 |
| <i>Shang-Ho Lawrence Tsai, Min-Chen Xie, Jen-Ming Wu</i>                                                                                      |    |
| Fast and Generalizable Task Scheduling in Double-Layered Satellite Network: A Graph-Based Deep Reinforcement Learning Approach .....          | 49 |
| <i>Zhonghe Liu, Runzi Liu, Yan Zhang, Mengjie Yi</i>                                                                                          |    |
| Joint Beamforming and Time-Slot Allocation for Spectrum Sharing in Integrated Satellite-Terrestrial Networks .....                            | 55 |
| <i>Guanchang Xue, Bilei Zhou, Ming-Chuan Yang, Jingchao Wang, Rui Ding, Qing Guo</i>                                                          |    |
| Post-Fall Immobility Detection Using Millimeter-Wave Radar and Point Set Representation Learning .....                                        | 61 |
| <i>Yoshiyuki Tsuyama, Robin Orthey, Masaki Ishihara</i>                                                                                       |    |
| Federated Learning-Based Network Traffic Prediction for Digital Twin in Next-Generation Networks .....                                        | 67 |
| <i>Jian Song, Laisen Nie, Yixuan Wu, Muiyang Zhu, Yongjie Li</i>                                                                              |    |
| Passive Synthetic Aperture Equivalent Model and Localization for Spaceborne Squint Scenario .....                                             | 73 |
| <i>Songlin Li, Hao Huan, Junhua Yang</i>                                                                                                      |    |
| Low-Complexity Sniffer-Based Port Selection for Fluid Antenna OTFS Systems Under Time-Varying Channels .....                                  | 79 |
| <i>Cheng Cheng, John S. Thompson, Yuepei Li, Constantinos Psomas, Symon K. Podilchak</i>                                                      |    |
| A Two-Stage Joint Decision Framework for Low-Latency XR Service Delivery Under Cloud-Edge-End Collaboration .....                             | 85 |
| <i>Xinyu Wang, Shaoyong Guo, Yinlin Ren, Yong Yan, Feng Qi</i>                                                                                |    |

|                                                                                                                                             |     |
|---------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Movable Arrays of Rydberg Sensors: Modelling and Optimization .....                                                                         | 91  |
| <i>Tao Xu, John Thompson, Wasio O Popoola, Constantinos Psomas, Kapila W. S. Palitharathna</i>                                              |     |
| Edge IoBNT Networks for Bioprocess Digital Twins: A Physics-Informed ML Approach .....                                                      | 97  |
| <i>Mohammad Behdad Jamshidi, Dinh Thai Hoang, Diep N. Nguyen</i>                                                                            |     |
| Channel Charting in Smart Radio Environments .....                                                                                          | 103 |
| <i>Mahdi Maleki, Reza Agahzadeh Ayoubi, Marouan Mizmizi, Umberto Spagnolini</i>                                                             |     |
| Latency Minimization for Secure RSMA-Assisted Mobile Edge Computing Networks .....                                                          | 109 |
| <i>Jianping Yao, Chao Tang, Jie Xu, Yi Fang, Guojun Han, Tony Q. S. Quek</i>                                                                |     |
| Detect Error Performance for Satellite Aerial Terrestrial Integrated Cognitive Networks with NOMA<br>and Non-Ideal Limitations .....        | 115 |
| <i>Peilin Qi, Kefeng Guo, Qihui Wu, Ali Nauman, Muhammad Ali Jamshed</i>                                                                    |     |
| Deep Reinforcement Learning for Joint Rate-Energy Optimization in NOMA BackCom Networks .....                                               | 121 |
| <i>Yousuf Rehan, Muhammad Ayaan Qasmi, Muhammad Danish Khattak, Muazzam A. Khan Khattak<br/>Muhammad Sohaib J. Solaija, Syed Ali Hassan</i> |     |
| Resource Allocation for D2D-Enabled NOMA Cellular Networks with Composite Signal .....                                                      | 127 |
| <i>Haiqian Yin, Gang Xie</i>                                                                                                                |     |
| Energy Efficient for Holographic RIS-aided NOMA Near-Field Short-Packet Communication System .....                                          | 133 |
| <i>Sandeep Singh, Keshav Singh, Fan-Shuo Tseng, Arnav Mukhopadhyay</i>                                                                      |     |
| Semantic Knowledge Base-Enhanced Joint Source-Channel Coding Framework for Robust Semantic<br>Communications .....                          | 139 |
| <i>Haixiao Gao, Mengying Sun, Yanhan Wang, Xiaodong Xu, Zechuan Fang, Nan Ma, Ping Zhang</i>                                                |     |
| A Large Language Model-Based Decision Transformer Approach for UAV Data Collection .....                                                    | 145 |
| <i>Zhixiong Chen, Hyundong Shin, Arumugam Nallanathan</i>                                                                                   |     |
| Fusing Situations of Massive Mobile Nodes Improves the LLM-Based Attack Prediction for AI-Native<br>Edges .....                             | 151 |
| <i>Rushan Li, Jin Tan, Zhuoran Duan, Guoshun Nan, Qimei Cui, Xiaofeng Tao</i>                                                               |     |
| Large Reasoning Models for Optimal Resource Management in Next Generation Wireless Networks .....                                           | 157 |
| <i>Tayyib Ul Hassan, Attiya Waqar, Aamina Binte Khurram, Arsalan Ahmad, Haejoon Jung, Syed Ali Hassan</i>                                   |     |
| Energy Efficiency Maximization in Hybrid Bit-Semantic Communication Networks .....                                                          | 163 |
| <i>Guangyuan Zheng, Miaowen Wen, Yuankun Tang, Qianqian Wang, Xinyue Pei, Zhiguo Ding</i>                                                   |     |
| Explainability Boosted Anomaly Detection Framework for O-RAN Based NextG Networks .....                                                     | 169 |
| <i>Nurullah Aksu, Ali Fuat Sahin, Semiha Tedik Bařaran</i>                                                                                  |     |
| Secrecy Rate Maximization for IRS-Aided MIMO Systems via Unfolded Product Riemannian Gradient<br>Descent Network .....                      | 175 |
| <i>Weijie Xiong, Jian Yang, Jingran Lin, Qiang Li</i>                                                                                       |     |
| DEEL: Diffusion-Enhanced Energy and Latency Trade-Off for Low-Altitude Emergency Networks .....                                             | 181 |
| <i>Shuo Wu, Peng Yu, Can Tan, Xinxiu Liu, Honglin Fang, Wenjing Li, Shu Fu, Shaoyong Guo</i>                                                |     |
| Multi-Inference Offloading Strategy for Distributed Large Language Models in Industrial IoT .....                                           | 187 |
| <i>Yang Li, Tao Jing, Xuehan Li, Boyang Zhang, Bo Gao, Minghao Zhu</i>                                                                      |     |

|                                                                                                                                              |     |
|----------------------------------------------------------------------------------------------------------------------------------------------|-----|
| High-Accuracy Electromagnetic Parameter Calibration for Ray Tracing Based Channel Modeling by<br>Chaos-Enhanced Gray Wolf Optimization ..... | 193 |
| <i>Changyou Tai, Pan Tang, Peijie Liu, Zirui Xu, Chengze Gu, Jianhua Zhang</i>                                                               |     |
| Task Offloading in 3D Edge Computing Networks .....                                                                                          | 199 |
| <i>Renata dos Reis, Caio de Souza, Marcos Falcão, Andson Balieiro, Tarik Taleb</i>                                                           |     |
| Dynamic Carbon-Aware Hybrid Task Offloading for Collaborative Edge-Cloud Computing .....                                                     | 205 |
| <i>Pin-Chun Chen, Li-Hsing Yen, Yan-Wei Chen, Ze-Yu Jin, Chien-Chao Tseng</i>                                                                |     |
| Uncertainty-Aware Bi-Level Robust Beamforming Optimization for 6G Cell-Free RAN .....                                                        | 211 |
| <i>Xiaojia Wang, Jianhua Tang, Miaowen Wen</i>                                                                                               |     |
| PR-EML: Physics-Respecting and Explainable Machine Learning for Proactive Multi-Band Adaptation<br>in UAV-V2X Networks .....                 | 217 |
| <i>Omair Ahmad, Mostafa M. Fouda, Mohamed I. Ibrahim, Zubair Md Fadlullah</i>                                                                |     |
| Dynamic Optimization of PER-UE RAN Parameters Based on Latency Tolerance Via Deep Learning .....                                             | 223 |
| <i>Eiji Takahashi, Takeo Onishi, Yoshiaki Nishikawa, Katsunori Date</i>                                                                      |     |
| Massive Digital AirComp with Vector Quantization and Bidirectional Links for FEEL .....                                                      | 229 |
| <i>Wenting He, Xiangdong Jia, Wenyan Liang</i>                                                                                               |     |
| Costs and Incentives for Data Owners to Participate in Federated Learning Seen Through Game Theory .....                                     | 235 |
| <i>Abbas Zal, Alessandro Buratto, Thomas Marchioro, Leonardo Badia</i>                                                                       |     |
| Online Client Association and Adaptive Modulation in Hierarchical Federated Learning .....                                                   | 241 |
