# TABLE OF CONTENTS

|                                                                                                                                                                       |    |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Ensemble Machine Learning for Accurate Breast Cancer Classification: RFECV-Optimized Feature Selection and Real-Time Gradio Deployment .....                          | 1  |
| <i>Suneel Kumar Rebaka, N. Vidya Sree, Ramachandrarao Panchadarla, Mahesh Lalam, Roshini Marisetty Gandhi Siripurapu</i>                                              |    |
| Enhancement of Dynamic Performance in Multi-Area Power Systems Using TCPS and SMES Units .....                                                                        | 7  |
| <i>Sambugari Anil Kumar, Besta Hariprasad, Boothapati Anil Kumar, G. Kishor, M. Venkateswarlu G. Venkata Subba Reddy</i>                                              |    |
| Performance Enhancement of Distribution Systems via Renewable Energy and EV Charging Station Integration using the Red Deer Algorithm .....                           | 12 |
| <i>A. Hima Bindu, V. Naga Bhaskar Reddy</i>                                                                                                                           |    |
| Sanket: An Audio-Visual Bidirectional Translator for Indian Sign Language .....                                                                                       | 17 |
| <i>Nupreeth Mandappa K V, Aditya Raj, Mayur, Maxson Mathew, Pradeep K R</i>                                                                                           |    |
| Hybrid FA-ACO Framework for Load Balancing in Software Defined Networks .....                                                                                         | 22 |
| <i>Mohammad Riyaz Belgaum, Walid El Fezzani, Salman Jan, Ashraf Ali, Mohammed Uzair Sandip Swarnakar</i>                                                              |    |
| Explainable and Adaptive Intrusion Detection Framework Using TON_IoT Telemetry for Cloud Computing .....                                                              | 28 |
| <i>Sherin Sunny, Hafza Ayesha Siddiqa, Jan Sher Khan</i>                                                                                                              |    |
| Intelligent Traffic Signal Optimization Using Multiagent G - DQN with Adaptive Reward Optimization .....                                                              | 36 |
| <i>Mogili Venu, Manjula Sanjay Koti, R. Deepa, K. Jayakumar, A. Abhinav Reddy</i>                                                                                     |    |
| Application of Homomorphic Encryption Technology and Design of Transaction Privacy Protection Scheme in the Circulation of Central Bank Digital Currency (CBDC) ..... | 42 |
| <i>Bing Du, Mingxia Tong</i>                                                                                                                                          |    |
| Adaptive Temporal Dynamic Fuzzy Clustering Framework for Evaluating Cross-Cultural Communication Competence of International Students .....                           | 49 |
| <i>Dan Wang, Gang Xuan</i>                                                                                                                                            |    |
| ML Based Component Value Prediction for Analog Filters* .....                                                                                                         | 56 |
| <i>Nafeesa Gadagkar, Bhavana Nadiger</i>                                                                                                                              |    |
| Soft Voting Ensemble Based Machine Learning Appraoch for Alzheimer's Disease Diagnosis and Severity Classification .....                                              | 62 |
| <i>Shreyash Muchandi, Gujanatti Rudrappa, Shreya Patil, Yashodeep Halgekar, Nayan Kanbarkar</i>                                                                       |    |
| Machine Learning Based Transient Fault Detection in Sensor Networks and Electrical Circuits .....                                                                     | 69 |
| <i>Sakshi K, Prerana K, Sushma S</i>                                                                                                                                  |    |
| An Explainable 3D Deep Learning Framework for Alzheimer's Diagnosis Using Hybrid Attention and Grad-CAM .....                                                         | 77 |
| <i>B. Sathiyaprasad, S. Vishwa, C. Vishal</i>                                                                                                                         |    |
| Context-Aware Hazard Tool Detection for Occupational Safety Using YOLO and Temporal Logic .....                                                                       | 82 |
| <i>Aarthi. A, Bhaskar Vinay. K, Sonia Jenifer Rayen</i>                                                                                                               |    |

|                                                                                                                                      |     |
|--------------------------------------------------------------------------------------------------------------------------------------|-----|
| Adaptive Hybrid Lightweight Cryptography-Based Secure Communication Framework for IoT Networks .....                                 | 88  |
| <i>Ushasree. R, Saranya Ashokkumar, Prateeksha N. Siddhanti, V. Harini, S. S. V. N. S. Unnathi</i>                                   |     |
| Multi-DOF Disturbance Rejection Motion Control Technology for Underwater Robots in Complex Operating Conditions .....                | 94  |
| <i>Quanquan Gong, Liuqian Yang, Jinhui Bai, Jun Hou, Jianping Xing, Kun Wang</i>                                                     |     |
| Design and Implementation of a Smart IoT-Based Biomedical Waste Segregation, Sanitization, and Monitoring System Using ESP32 .....   | 101 |
| <i>G. Shivaji Rao, S. Kavin Vignesh, S. Manavalan, M. Dharanish</i>                                                                  |     |
| AFAD-Net: Attention-Guided Lightweight Single-Stage Network for Defect Detection in Flexible Packaging Substrates .....              | 107 |
| <i>Si Zhong, Yuxuan Liu, Hongbo Qin, Jinpeng Li, Shuxian He</i>                                                                      |     |
| Intrusion Detection in Communication Networks Using Sparse Autoencoder Driven Graph Attention Networks .....                         | 114 |
| <i>Dilip Bharadwaj, Nagarjuna Nellutla, Srivenkata Gantikota, N. Keerthi Shivani, Pallikonda Priyanka</i>                            |     |
| Hardware-Aware Illumination-Adaptive Retinex Enhancement with Perceptual Optimization for Real-Time FPGA Systems .....               | 121 |
| <i>Rowthu Sai Chalapathi, C. Kumar, Rangu Reddy Keerthi, Gerigi Revathi, Saniboyana Sreehari</i>                                     |     |
| Realtime Leaf Disease Classification and Prediction Using a Hybrid Optimization Assisted Deep Learning Model .....                   | 129 |
| <i>Mahaveerakannan. R</i>                                                                                                            |     |
| DL-NLP Powered Anomaly Detection Framework for Noisy and Unstructured Log .....                                                      | 137 |
| <i>A. Ramya, Md. Manntasha Aara, P. Konda Babu, M. Yugi Chandana, P. Raju, P. J. S. Vidya Sagar</i>                                  |     |
| Decision Algorithm for Regional Power Coordinated Regulation Based on Digital Twin and Graph Neural Network .....                    | 143 |
| <i>Liang Cao, Guojian Yang, Yinjing Xiao, Tao Wang, Zeqing Tian, Qi Xie</i>                                                          |     |
| SmartEyeX: OCT and Fundus-Based Deep Learning System for Multi-Level Eye Disease Diagnosis and Analysis .....                        | 149 |
| <i>R. Rajalakshmi, K. Bala Manikanta, M. Divya Venkata Nivas, Aarav Kannan. J</i>                                                    |     |
| A Hybrid Deep Learning Framework for Robust Short-Term Urban Traffic-Flow Prediction .....                                           | 155 |
| <i>S. Maheswari, Yadala Sucharitha, Pundru Chandra Shaker Reddy</i>                                                                  |     |
| An Edge-Aware Spatio-Temporal Vision Transformer Framework for Intelligent Video Analytics in Smart Surveillance Systems .....       | 162 |
| <i>Siddi Sai Rajesh, Priyadarshini. S, Sunil Kumar. V, B. Shiva Pallavi, Ponmurugan Panneer Selvam</i>                               |     |
| Charging-Delivery Coordinated Scheduling Algorithm and Energy Consumption Optimization Model for New Energy Logistics Vehicles ..... | 169 |
| <i>Yuting Li</i>                                                                                                                     |     |
| Low-Carbon Economic Dispatch of Integrated Energy Systems Using an Improved Whale Optimization Algorithm .....                       | 176 |
| <i>Zheng Wang, Yixuan Li, Lufei Liu, Tiantian Wang</i>                                                                               |     |

|                                                                                                                                                      |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Graph Neural Network with Deep Reinforcement Learning Based Joint V2V Resource Allocation for String Stability in Dynamic Platoons .....             | 183 |
| <i>Afreen Bari, Pusphanjali. S, Suma Srinath, B. Akhil, Dhanamalar. M</i>                                                                            |     |
| Optimization and Demonstration of Personalized Recommendation Algorithm for Library and Information Resources Based on Deep Learning .....           | 191 |
| <i>Ting Deng</i>                                                                                                                                     |     |
| Prediction of the Popularity of Contemporary Chinese Online Literature Works Using Cognitive Cohesion Guided Dynamic Hybrid Embedding Network .....  | 197 |
| <i>Ru Li</i>                                                                                                                                         |     |
| Attention-Guided Multi-Modal Sensor Fusion with Transformer Learning for Human Activity Recognition .....                                            | 204 |
| <i>Vinayagan. S, Bharath Kumara. J, Priyanka. M S, V. Sumith Ram, A. Kalaivani</i>                                                                   |     |
| Design and Implementation of a Lightweight Spatiotemporal Big Data Prediction Model for Pollutant Degradation Monitoring .....                       | 210 |
| <i>Menghu Wang</i>                                                                                                                                   |     |
| Adaptive Pedagogical Optimization Framework Based on Browser/Server Architecture for Intelligent Smart Teaching Systems .....                        | 217 |
| <i>Yingxiu Gao, Xiaojun Yan</i>                                                                                                                      |     |
| An Adaptive Attention-Based Transformer-TCN Framework for Intelligent Fault Detection in Industrial IoT Communication Networks .....                 | 224 |
| <i>Bvsp Pavan Kumar, G. Manjula, Divyaraj. G N, B. Akshitha, S. Maragatham</i>                                                                       |     |
| Key Technologies and Applications of Edge Computing and Cloud Computing Collaborative Scheduling for Digital Power .....                             | 230 |
| <i>Jiangtao Guo, Xiaolei Wang, Tao Wang, Shu Cao, Kai Wang</i>                                                                                       |     |
| Energy-Aware Graph Transformer Network for Topology and Energy Efficient Optimization in Wireless Sensor Networks .....                              | 236 |
| <i>Vijay Kumar Lakshetty, Saravana. M K, Madhura. G K, V. Chandrashekar, Vasukidevi. G</i>                                                           |     |
| Deep Learning Empowered DICOM Imaging Organ Volume Calculation and Pathological Change Quantitative Analysis Algorithm .....                         | 244 |
| <i>Wurentuya Bao, Jianying Jiang, Hairong Wu</i>                                                                                                     |     |
| A Hybrid Context-Aware CNN–BiLSTM Framework for Innovation in Ideological and Political Teaching Methods .....                                       | 249 |
| <i>Yuetong Zhou</i>                                                                                                                                  |     |
| CBSN-YOLOv8: A Vision Based Framework for Automated Quality Inspection in Smart Manufacturing .....                                                  | 256 |
