# TABLE OF CONTENTS

|                                                                                                                                                         |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| AI for All: An Open Agentic Framework for Predictive, Preventive, and Ethical Learning Analytics in Higher Education .....                              | 1   |
| <i>Muhammad Amin Nadim, Rosula Reyes, Raffaele Di Fuccio, Faisal Rehman, Abid Ali</i>                                                                   |     |
| A Memory-Efficient Long-Term Human Behavior Representation for Behavior History Retrieval .....                                                         | 11  |
| <i>Daiju Kanaoka, Yasutomo Kawanishi</i>                                                                                                                |     |
| Promoting Behavior Change with Feedback Using LLM Based on User Activity Data .....                                                                     | 19  |
| <i>Shogo Mochizuki, Hideyuki Takada</i>                                                                                                                 |     |
| Real-Time Human Interaction Intent Detection for Resource-Constrained Social Robots Using RGB-Only Behavioral and Emotional Cues .....                  | 29  |
| <i>Farida Mohsen, Ali Safa</i>                                                                                                                          |     |
| Classification of Hesitation Behavior During Purchasing Using Multi-Level Behavioral Features .....                                                     | 36  |
| <i>Seinosuke Nagase, Kaori Fujinami</i>                                                                                                                 |     |
| Calibration-Free Induced Magnetic Field Indoor and Outdoor Positioning Via Data-Driven Modeling .....                                                   | 46  |
| <i>Qiushi Guo, Matthias Tschöpe, Mengxi Liu, Sizhen Bian, Paul Lukowicz</i>                                                                             |     |
| LockInMamba: Spatio-Temporal Architecture for Caregiver Localization Using BLE Beacons .....                                                            | 56  |
| <i>Yuil Tripathee, Pawarisa Thongchua, Taweechai Nuntawisuttiwong</i>                                                                                   |     |
| Deep Attention-Based Sequential Ensemble Learning for BLE-Based Indoor Localization in Care Facilities .....                                            | 64  |
| <i>Minh Triet Pham, Quynh Chi Dang, Le Nhat Tan</i>                                                                                                     |     |
| A Two-Stage Probabilistic Framework for Movement Intent Detection Based on Multimodal Signal Refinement .....                                           | 73  |
| <i>Motoki Sakai, Masaki Shuzo</i>                                                                                                                       |     |
| Continuity in Localization: An Auto-Regressive Learning Framework for Nurse Tracking Using BLE .....                                                    | 81  |
| <i>Hoang An Phan, Hoang Khang Phan, Huu Xuan Mai</i>                                                                                                    |     |
| A Robust and Imbalance-Aware Stacking Ensemble Framework for BLE-Based Indoor Localization in Healthcare Environments .....                             | 89  |
| <i>Fairuz Al Adli Putra Pujianto, Mumtazia Wildan Al Muttaqi, Daniel El Hakim, Fajar Wahyudi Batubara, Hafiz Abdillah Nugraha, Muhammad Fikry</i>       |     |
| Trigger-Aligned Lightweight Late Fusion for Robust Multimodal Upper-Limb Intent Detection .....                                                         | 98  |
| <i>Sahbah Gonzalez, Ian Wong Paz, Md Baharul Islam</i>                                                                                                  |     |
| Gap-Aware Temporal Segmentation and Random Forest-Hidden Markov Modeling for Bluetooth Low Energy-Based Indoor Localization .....                       | 107 |
| <i>Van Anh Dao, Tuan Anh Ngo, Vien Bang Le, Bao Ngoc Vo Nguyen, Nhat Tan Le</i>                                                                         |     |
| Interpreting Upper Limb Motor Intentions: A Multimodal Biosignal Approach .....                                                                         | 118 |
| <i>Tran Hai Dang Nguyen, Huynh Thanh Lam Do, Vo Son Tung Nguyen, Thien Thanh Tu Bui, Phuoc Bao Phu Nguyen, Thi Nha My Le, Nhat Tan Le, Huu Xuan Mai</i> |     |
| Lightweight Echo State Networks for Upper-Limb Movement Classification Using Multimodal Signals .....                                                   | 126 |
| <i>Arie Rachmad Syulistyo, Yuichiro Tanaka, Ninnart Fuengfusin, Dinda Pramanta, Hakaru Tamukoh</i>                                                      |     |

|                                                                                                                                                         |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Real-Time Detection of Scratching Behavior in Patients Using Camera and Pose Estimation .....                                                           | 134 |
| <i>Hina Asano, Hiro Kitano, Momka Shiraishi, Sozo Inoue, Yuhki Kitazono</i>                                                                             |     |
| Cross Subject Motor Intent Classification via Signal Standardization and Dimensional Alignment in Neural Decoding .....                                 | 144 |
| <i>An Nguyen Hong Thien, Dang Khoa Nguyen, Nghia Huy Che, Xuan Dai Le</i>                                                                               |     |
| Disentangling Confusable Actions in Multimodal HAR: A Stability-driven Feature Selection Framework for EEG and EMG-IMU .....                            | 152 |
| <i>Le Hoang Nhat Do, Ngoc Tuong Vy Le, Quoc Thai Le, Quoc Bao Trinh, Phi Hoai Nguyen</i><br><i>Nhat Ngoc Nguyen, Nhat Tan Le</i>                        |     |
| A Method for Estimating Gastric Activity Using Wearable Sensors .....                                                                                   | 161 |
| <i>Ibuki Nakayama, Tsutomu Terada, Masahiko Tsukamoto</i>                                                                                               |     |
| A Unified XAI-LLM Approach for Endotracheal Suctioning Activity Recognition .....                                                                       | 171 |
| <i>Hoang Khang Phan, Quang V. Dang, Noriyo Colley, Christina A. Garcia, Nhat Tan Le</i>                                                                 |     |
| Floor Plan-Agnostic Detection of Gait Speed Drifts Using Ambient Sensors .....                                                                          | 182 |
| <i>Marina Vicini, Martin Rudorfer, Zhuangzhuang Dai, Ahmad Beltagui, Luis J. Manso</i>                                                                  |     |
| Towards On-Device Physiological Data Monitoring Using the Time-Series Range-Counting Summary .....                                                      | 191 |
| <i>Jun Kutsuzawa, Yoshitaka Yamamoto</i>                                                                                                                |     |
| Pass Receiver Prediction in Football: Graph Neural Networks with Explainability Analysis .....                                                          | 201 |
| <i>Mohammad Parsa Afshar, Mohammad Saiedur Rahaman</i>                                                                                                  |     |
| Real-Time Analysis of Therapeutic Board Game and Sound Therapy Effects on Adolescent Mental Health Using Facial Emotion and Stress Detection .....      | 209 |
| <i>Safira Khalisha, Kelvin Alfarezy, Tri Mayluddin Villanda, Ahmad Fadhil Herlambang</i><br><i>Mohammad Saiedur Rahaman, Muhammad Fikry</i>             |     |
| World Models for Health Management Decision-Making: a Modality-Independent Pre-Trainable Foundation Model-Based Multimodal Reinforcement Learning ..... | 220 |
| <i>Tsuyoshi Okita</i>                                                                                                                                   |     |
| How Much Context Matters? A Comparison for Skeleton-Based Activity Recognition .....                                                                    | 230 |
| <i>Matthias Tschöpe, Björn Friedrich, Sizhen Bian, Paul Lukowicz</i>                                                                                    |     |
| A Model to Reduce Musculoskeletal Disorders Using Wearable Sensors for Detecting Office Worker Postures .....                                           | 240 |
| <i>Muhammad Fathurrahman, Anisa Paradisa, Syaldina Syahfitri Br Sembiring, Putri Alifi Nurfadhilla</i><br><i>Alpaslan Durmuş, Muhammad Fikry</i>        |     |
| Chain-of-Thought Reasoning with Large Language Models for Clinical Alzheimer's Disease Assessment and Diagnosis .....                                   | 250 |
| <i>Tongze Zhang, Jun-En Ding, Melik Ozolcer, Fang-Ming Hung, Albert Chih-Chieh Yang, Feng Liu</i><br><i>Yi-Rou Ji, Sang Won Bae</i>                     |     |
| Using Small Language Models to Measure Nursing Key Performance Indicators From Patient Stories .....                                                    | 259 |
| <i>Federico Cruciani, Birgit Schönfelder, Michael Milliken, Ian Cleland, Chris Nugent, Hanna Mayer</i><br><i>Tanya McCance</i>                          |     |
| From Sensor Data to Sequence of Scenes: Diffusion Model-Based Visualization of Human Activity .....                                                     | 269 |
| <i>Koki Matsuishi, Kosuke Ukita, Tsuyoshi Okita</i>                                                                                                     |     |
