Volume 14150

Part One of Four Parts

Proceedings of SPIE 0277-786X, V. 14150

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Adaptive Optics Systems X*, edited by Kathryn J. Jackson, Dirk Schmidt, Elise Vernet, Proc. of SPIE 14150, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xxiii *Conference Committee*

Part One

ASTRONOMICAL OBSERVATIONS WITH AO I

- 14150 02 **Review of high-contrast detection of accreting proto-planets with visible ExAO at H- α : the MagAO-X MaXProtoPlanetS survey results of evidence of strong protoplanet H- α variability and circumplanetary dust around PDS 70 and other systems (Invited Paper)** [14150-1]
- 14150 03 **Globular clusters as diagnostic to verify adaptive optics performance** [14150-2]
- 14150 04 **Using AO telemetry to characterize scintillation for high-precision transit photometry** [14150-3]
- 14150 05 **High contrast at short separations with VLTI/GRAVITY+ Dark Hole** [14150-4]

ON-SKY DEMONSTRATIONS OF WAVEFRONT SENSING TECHNIQUES

- 14150 06 **First on-sky demonstration of a three-sided reflective pyramid wavefront sensor with ShaneAO** [14150-5]
- 14150 07 **On-sky demonstration of segment piston estimation using an infrared tip-tilt sensor** [14150-6]
- 14150 08 **On-sky demonstration of super resolution at the VLT and prospects for Subaru** [14150-7]
- 14150 0A **Digging dark holes on-sky with the self-coherent camera: preliminary results** [14150-9]

NEW AO SYSTEMS ON-SKY

- 14150 0B **GRAVITY+ adaptive optics (Invited Paper)** [14150-10]
- 14150 0C **On-sky capabilities and performance of the Keck All Sky Precision Adaptive optics system** [14150-11]

ADAPTIVE SECONDARY MIRRORS

- 14150 OE **Adaptive secondary mirrors operation at the Large Binocular Telescope** [14150-13]
- 14150 OF **Gemini 2.0: a ground layer adaptive secondary system (GLASS) for Gemini North** [14150-14]
- 14150 OG **Facility integration of the NASA IRTF adaptive secondary mirror** [14150-15]
- 14150 OH **GMT ASM status and phasing test results** [14150-16]

AO UPGRADE PROJECTS

- 14150 OI **The W. M. Keck Observatory adaptive optics program** [14150-17]
- 14150 OJ **Construction status of the DKIST multi-conjugate adaptive optics upgrade** [14150-18]

NEWS FROM OPERATIONAL AO SYSTEMS

- 14150 OK **From infancy to facility: AO systems deployment at ESO observatories** [14150-19]
- 14150 OL **On sky results of the GTC Adaptive Optics System with the Infrared Camera GRANCAIN**
[14150-20]
- 14150 OM **The path to agile extreme adaptive optics at the Large Binocular Telescope Observatory**
[14150-21]
- 14150 ON **AO3k + SCExAO: on-sky wavefront quality and demonstration of novel WFS techniques with the double XAO system** [14150-22]

UPCOMING AND PROPOSED AO SYSTEMS I

- 14150 OO **STRATA: system for turbulence reduction using adaptive optics for transformational astronomy** [14150-24]
- 14150 OP **Final design of ULTIMATE-Subaru ground layer adaptive optics system** [14150-25]

UPCOMING AND PROPOSED AO SYSTEMS II

- 14150 OR **Adaptive optics for EST first light: system architecture and calibration concept** [14150-27]

SPECIAL SESSION: ADAPTIVE OPTICS BEYOND ASTRONOMY I

- 14150 OT **Fast and scintillation-resistant wavefront sensing for laser applications (Invited Paper)**
[14150-29]

SPECIAL SESSION: ADAPTIVE OPTICS BEYOND ASTRONOMY II

- 14150 OW **AO for laser fusion: the challenges of controlling hundreds of high-power laser beams (Invited Paper)** [14150-32]

SPECIAL SESSION: ADAPTIVE OPTICS BEYOND ASTRONOMY III

- 14150 OY **Adaptive optics for astronomy, defense, and free-space optics: complementarities, synergies, and specificities (Invited Paper)** [14150-34]

HIGH-POWER SODIUM LASER GUIDE STARS

- 14150 OZ **Photometric comparison experiment of the 75 watt Wolpertinger laser beacon (Invited Paper)** [14150-35]
- 14150 IO **A new versatile guide star laser platform** [14150-36]
- 14150 II **High-power RFA-based 589-nm guide star laser with enhanced non-resonant frequency doubling** [14150-37]

AO CONTROL I

- 14150 I2 **SAXO+, the second-stage adaptive optics for SPHERE: a review of six selected control algorithms and the results achieved to date** [14150-38]
- 14150 I3 **Deploying AI for active optics control of the Vera C. Rubin Observatory** [14150-39]
- 14150 I4 **Closed-loop atmospheric dispersion correction for high-contrast imaging with MagAO-X**
[14150-40]

WAVEFRONT SENSING TECHNIQUES AND TECHNOLOGY I

- 14150 I5 **Laboratory validation of the CiaoCiao wavefront sensor for phase discontinuity detection in fragmented-pupil optical telescopes (Invited Paper)** [14150-41]
- 14150 I7 **A quatre-quarts readout mode for C-RED one to optimize modulated near-IR pyramid wavefront sensing** [14150-43]

ASTRONOMICAL OBSERVATIONS WITH AO II

- 14150 19 **The MICADO first light imager for the ELT: toward direct imaging of exoplanets and disks with the ELT** [14150-45]

PSF RECONSTRUCTION

- 14150 1A **Enhancing SHARK-NIR detection capabilities through differentiable PSF rendering** [14150-46]
- 14150 1B **Point spread function subtraction using telemetry data: one more step on the path to reaching the photon-noise limit in high-contrast imaging** [14150-47]
- 14150 1C **Hybrid analytical-neural AO PSF prediction using reduced telemetry** [14150-48]
- 14150 1D **High-fidelity tomographic speckle imaging of scenes with spatially-varying point spread functions** [14150-49]
- 14150 1E **Non-coronagraphic PSF engineering for space domain awareness** [14150-50]

STATUS OF OPERATIONAL AO SYSTEMS AND FUTURE PLANS

- 14150 1F **REVOLT: an on-sky adaptive optics technology research platform** [14150-51]

POST PROCESSING FOR AO CORRECTED INSTRUMENT DATA

- 14150 1J **Forward modelling coronagraphic images with a fully physical, differentiable digital twin of MagAO-X: first laboratory results** [14150-55]
- 14150 1K **Post-facto photon-fixing** [14150-56]
- 14150 1L **On-sky coherent differential imaging with a self coherent camera: classical and machine learning pipelines** [14150-57]

TIP-TILT SENSING WITH LASER GUIDE STARS

- 14150 1M **Return flux measurements of a high-power polychromatic laser guide star** [14150-58]
- 14150 1N **Error budget for tip/tilt retrieval from laser guide stars using the propagation-delay method** [14150-59]
- 14150 1O **First high-resolution IFU observations of the sodium layer: implications for LGS tip-tilt sensing** [14150-60]

LASER GUIDE STARS

- 14150 1P **On-sky demonstration of a semiconductor VECSEL-based sodium guide-star system** [14150-61]
- 14150 1Q **Development of a Rayleigh laser guide star system using a SPAD-based wavefront sensor with built-in range-gating** [14150-62]

CHARACTERIZATION OF WAVEFRONT DISTURBANCES I

- 14150 1R **Towards an extended VLTi: turbulence characterization for kilometer-scale optical links at Paranal (Invited Paper)** [14150-63]
- 14150 1S **RINGSS turbulence profiler at ESO's La Silla observatory: one year+ of operations** [14150-64]
- 14150 1T **Nēnē: a solar-SLODAR turbulence profiler on the DKIST Telescope** [14150-65]

AO CONTROL II

- 14150 1U **SynIM: a high-performance GPU-accelerated Python library for synthetic interaction and tomographic reconstruction matrices in next-generation adaptive optics** [14150-66]

UPDATES ON ELT SYSTEMS AND SUBSYSTEMS I

- 14150 1W **The MICADO first light imager for the ELT: the SCAO module AIT in France, from the β flat configuration towards the flat and final configurations** [14150-69]
- 14150 1X **Adaptive optics advancement at the Giant Magellan Telescope** [14150-70]
- 14150 1Y **MOSAIC at ELT: delivering a GLAO-corrected and distortion-aware 8 arcminute field** [14150-71]

UPDATES ON ELT SYSTEMS AND SUBSYSTEMS II

- 14150 1Z **Putting METIS SCAO to the test** [14150-73]
- 14150 20 **HARMONI at ELT: status of the MCAO mode** [14150-74]
- 14150 21 **The GMT adaptive optics and phasing sensors testbed (GAPS): status report of coarse and fine phasing experiments with the natural guide star wavefront sensor prototype of the Giant Magellan Telescope** [14150-75]

MODELING, ANALYSIS, SIMULATION OF AO SYSTEMS

- 14150 23 **HARMONI at ELT: from simulations to on-sky prototyping of the HARMONI single conjugate AO system** [14150-77]
- 14150 24 **Comparing real-time optical gain measurement and methods on MagAO-X** [14150-78]
- 14150 25 **Status of the European Solar Telescope adaptive optics: simulation and bench results** [14150-79]
- 14150 26 **The performance of the Smartt-WFS with machine learning in simulation and lab bench testing** [14150-80]

WAVEFRONT SENSING TECHNIQUES AND TECHNOLOGY II

- 14150 27 **No need to modulate: on-sky results of a neural network enhanced pyramid wavefront sensor and prospects for the ELTs** [14150-109]

Part Two

- 14150 28 **The photonic-lantern wavefront sensor and coherent-differential-imager: the next step in full-wave photonic-lantern sensing** [14150-111]
- 14150 29 **Petal piston mode measurement for the ELT** [14150-83]

CHARACTERIZATION OF WAVEFRONT DISTURBANCES II

- 14150 2A **Diagnosing spatial-coherence outer scale, seeing, and dome-induced turbulence from simultaneous multi-wavelength imaging of point-like sources** [14150-84]
- 14150 2C **Comparing turbulence outer scale measurements on-sky between LGS-WFS data and MUSE image-cubes at the VLT** [14150-86]
- 14150 2D **Sensor fusion on MagAO-X: real time vibration control using accelerometers** [14150-87]

AO TESTBEDS

- 14150 2E **RAMA: a new agile AO bench for the telescope FEELINGS** [14150-88]
- 14150 2F **On-sky results from REDWOODS, a platform at Lick/ShaneAO for testing second stage AO technologies** [14150-89]
- 14150 2G **REVOLT 3.0: redesign towards visible and LGS AO** [14150-90]

WAVEFRONT SENSING TECHNIQUES AND TECHNOLOGY III

- 14150 2H **Polychromatic Pyramid WFS (PoPy) project overview (Invited Paper)** [14150-91]
- 14150 2I **Full frame denoising for pyramid wavefront sensors** [14150-92]
- 14150 2J **Wavefront sensing with photonic lanterns and integrated circuits** [14150-93]

WAVEFRONT SENSING TECHNIQUES AND TECHNOLOGY IV

- 14150 2K **A coupled-waveguide architecture for photonic wavefront sensing and its application** [14150-94]
- 14150 2M **Neural NOPE: a physics-informed neural network approach to mitigate nonlinearity in pyramid wavefront sensing for adaptive optics** [14150-110]

CALIBRATION

- 14150 2N **Self-calibration of an adaptive optics system and its application to THEMIS solar telescope** [14150-97]
- 14150 2O **Optical calibration of the ELT-M4: automated testing procedure and results on the prototype** [14150-98]
- 14150 2P **DM/WFS mis-registration tracking: implementation and on-sky validation of SPRINT at LBT** [14150-99]

PERFORMANCE OF ON-SKY SYSTEMS

- 14150 2Q **The MMT adaptive optics exoplanet characterization system (MAPS) update** [14150-100]
- 14150 2S **A twelve-AO architecture for the CHARA Array: dual-layer LabAO + TelAO design, calibration, uniform control software, and on-sky performance** [14150-102]
- 14150 2T **Time-resolved pyramid wavefront sensor experimental results on REVOLT** [14150-103]

EXTREME AO

- 14150 2V **SAXO+, the second-stage adaptive optics for SPHERE: NCPA compensation and dark hole loop with a pyramid wavefront sensor** [14150-105]

- 14150 2W **Addressing the low-wind effect with the Lyot-based low-order wavefront sensor on SCEXAO** [14150-106]
- 14150 2X **WindsoCC: reconstructing the wind-driven halo in MagAO-X images using wavefront sensor telemetry** [14150-107]
- 14150 2Y **The final design of GMagAO-X: the wavefront sensing and control (WFS&C) architecture of GMagAO-X** [14150-108]

WAVEFRONT SENSING TECHNIQUES AND TECHNOLOGY V

- 14150 2Z **MAVIS: adaptive optics module final design** [14150-23]
- 14150 30 **EKARUS at the Asiago Observatory: towards the first light of a new XAO R&D platform** [14150-359]

POSTER SESSION: WAVEFRONT CORRECTORS

- 14150 32 **Architectural design of the Keck adaptive secondary mirror** [14150-113]
- 14150 33 **Advancements in monitoring and control of the adaptive secondary mirrors at the Large Binocular Telescope** [14150-115]
- 14150 34 **MORFEO post-focal deformable mirrors: manufacturing and assembly phase following FDR success** [14150-116]
- 14150 35 **High order advanced Keck adaptive optics (HAKA): results from lab integration and testing of the high order deformable mirror** [14150-117]
- 14150 36 **ULTIMATE-Subaru: adaptive secondary mirror development status update** [14150-118]

POSTER SESSION: NEW SYSTEMS AND PROJECTS

- 14150 38 **Development of an adaptive optics testbed at MPIA for the ELT/planetary camera and spectrograph (PCS)** [14150-120]
- 14150 39 **He'e-Lab: a modular testbed for astrophotonics and wavefront sensing development** [14150-121]
- 14150 3A **SAXO+, the second-stage adaptive optics for SPHERE: high contrast performance analysis** [14150-122]
- 14150 3B **AOB-WaN: the new adaptive optics bench at Gemini North has completed critical design review** [14150-123]
- 14150 3C **Adaptive optics design for China's 14.5m optical-infrared telescope system** [14150-126]

- 14150 3E **Progress on astronomical adaptive optics in NLAO, China** [14150-128]
- 14150 3F **Closing the technology gap for the Extremely Large Telescope's planetary camera and spectrograph (ELT-PCS): development of the coronagraph and focal plane wavefront control strategies** [14150-129]

POSTER SESSION: NEW IDEAS AND NEW AO APPLICATIONS IN ASTRONOMY

- 14150 3G **Optimal design of application-specific photonic lanterns using Bayesian optimisation** [14150-130]
- 14150 3I **A focal-plane wavefront sensor based on a short multimode fiber and machine learning** [14150-132]
- 14150 3J **Cassiopee: defining the next-generation deformable mirror and high-speed SWIR camera for adaptive optics applications** [14150-134]
- 14150 3K **Laboratory characterization of a multi-photonic lantern optical waveguide using off-axis holography** [14150-135]
- 14150 3L **Numerical simulations on the feasibility of polychromatic laser guide stars** [14150-136]
- 14150 3M **LCOS-SLMs applications for adaptive optics and astronomy** [14150-137]
- 14150 3N **Optimal single-mode injection of distorted PSFs: matched electric field optimisation using a photonic lantern** [14150-138]
- 14150 3O **From glass to print: 3D printed pyramids as wavefront sensors** [14150-139]
- 14150 3Q **Images of the Moon's surface with adaptive optics on the 1.6-meter Goode Solar Telescope** [14150-377]

POSTER SESSION: ASTRONOMY WITH AO

- 14150 3S **ANDES, the high-resolution spectrograph of the ELT: simulated performance of the CORO module and overview of the high-contrast capabilities for exoplanet observations** [14150-142]
- 14150 3T **MORFEO @ ELT: large-field, high-sensitivity astronomy for the ELT era** [14150-143]
- 14150 3U **Enhanced seeing mode: at the LBT Observatory: earlier results verified via simulations** [14150-144]
- 14150 3V **On-sky science verification of Keck Observatory's HAKA adaptive optics upgrade** [14150-145]

- 14150 3X **The atmosphere as a spectrometer: on-sky speckle spectral recovery** [14150-147]
- 14150 3Z **Optical and opto-mechanical design of the TAO AIUC high resolution Y-band spectrograph front-end** [14150-149]

POSTER SESSION: OTHER AO TOPICS

- 14150 41 **From METIS towards PCS: sequential closed-loop operation of a hybrid pyramid-Zernike sensor for extreme AO at the ELT** [14150-133]
- 14150 42 **Performance evaluation of adaptive optics by horizontal-link experiments for ETS-9 optical communications** [14150-151]
- 14150 43 **Automatic exploitation of adaptive optics telemetry for optical turbulence characterization and FSO performance estimation** [14150-152]
- 14150 44 **Deep-learning-enhanced pyramid wavefront sensor in free-space optical communication scenarios** [14150-153]
- 14150 45 **Adaptive optics for small telescope systems in space debris observation and free-space optical communication** [14150-154]
- 14150 46 **The observing with adaptive optics school: training the next generation of AO scientists and engineers** [14150-155]
- 14150 47 **Sky coverage statistics for DAG400 Telescope: natural guide star availability** [14150-156]
- 14150 48 **Monitoring atmospheric turbulence from stellar observations at optical ground stations** [14150-157]
- 14150 49 **Implementation of an adaptive optics system for free-space optical communication-based quantum key distribution** [14150-158]
- 14150 4C **Numerical validation of predictive control for PAA precompensation of GEO feeder optical links** [14150-161]
- 14150 4E **Hybrid AI optimization for sensorless adaptive optics** [14150-163]

POSTER SESSION: WAVEFRONT SENSING TECHNIQUES AND TECHNOLOGY

- 14150 4G **Freezing the speckles: focal plane wavefront sensing with the spatially clipped self-coherent camera** [14150-166]
- 14150 4H **Experimentally-determined performance limits for joint imaging and wavefront sensing with a photonic lantern** [14150-167]

- 14150 4I **First laboratory demonstration of iEFC for high-contrast imaging at small angular separation on ELT scales** [14150-168]
- 14150 4J **Optical design and assembly of CAL2: the NRC Canada facility-class focal plane wavefront sensor for the Gemini Planet Imager 2 upgrade** [14150-169]
- 14150 4L **Fast and furious on OSIRIS: improving AO performance with focal plane wavefront sensing at W. M. Keck Observatory** [14150-171]
- 14150 4N **A comparative study of wavefront sensor performance marred by DM Woes** [14150-174]
- 14150 4O **The Zernike and the integrated Mach-Zehnder wavefront sensors: comparative study of two second-stage sensors for ELT/PCS** [14150-176]
- 14150 4P **Fundamental limits to wavefront sensing with resolved guide stars** [14150-177]
- 14150 4Q **Enhanced nonlinear wavefront sensing for adaptive optics with a double iQuad sensor design** [14150-178]
- 14150 4R **The FastrSHWFS development and test results** [14150-179]

Part Three

- 14150 4S **Development of real-time piston sensing using a single-shot coded aperture instrument and deep phase retrieval** [14150-180]
- 14150 4T **Design and experimental implementation of deep holographic Fourier-plane wavefront sensors** [14150-182]
- 14150 4X **Tolerating the PIAA-ZFWS: a practical and robust wavefront sensor that approaches the fundamental sensitivity limit** [14150-186]
- 14150 4Y **Evaluating the application of an Integrated photonics wavefront sensor (IP-WFS) using SAOS** [14150-187]
- 14150 4Z **Simulating Zernike-based CWFSing with HCIPy** [14150-188]
- 14150 50 **Holographic diffuser for future applications in astronomical instrumentation** [14150-189]
- 14150 51 **On-sky detection of discontinued phase with laser guide star** [14150-190]

POSTER SESSION: MACHINE LEARNING IN AO

- 14150 52 **Non-invasive optical gain estimation in pyramid wavefront sensors from telemetry using machine learning** [14150-191]

- 14150 53 **FPGA accelerated machine learning for adaptive optics: a hardware-in-the-loop prototype**
[14150-192]
- 14150 55 **Overcoming the low signal-to-noise problem for hybrid mode-selective photonic lantern-based wavefront correction using machine learning** [14150-194]
- 14150 56 **Exploring reinforcement learning to enhance focal plane wavefront correction for vortex coronagraphs** [14150-195]
- 14150 57 **Modal CNN reconstruction for an unmodulated pyramid wavefront sensor in SAXO+**
[14150-196]
- 14150 58 **Pseudo closed-loop bootstrapping for reinforcement learning-based AO control**
[14150-197]
- 14150 59 **Deep learning wavefront reconstruction on-sky: results from the SPIDERS Lyot-based low order wavefront sensor** [14150-198]
- 14150 5A **Deep-learning-based reconstruction coupled with reinforcement learning for adaptive optics in LEO optical links** [14150-199]
- 14150 5B **Leveraging machine learning for PWFS reconstruction: bench validation with REVOLT**
[14150-200]
- 14150 5C **Off-axis atmospheric turbulence reconstruction with WOMBAT** [14150-201]
- 14150 5D **What the speck is that? Improving exoplanet imaging sensitivity by combining machine learning and physical models** [14150-202]
- 14150 5E **A machine-learning approach to image-space wavefront sensing in adaptive optics**
[14150-203]
- 14150 5F **Advancements in estimating differential pistons for the Extremely Large Telescope using deep learning II: exploiting defocused images** [14150-205]
- 14150 5I **Performance of attention-based deep-learning models in Shack-Hartmann wavefront sensor measurements** [14150-208]
- 14150 5J **Towards a real-time adaptive optics controller for deep learning wavefront sensors**
[14150-209]

POSTER SESSION: POSTPROCESSING FOR AO CORRECTED INSTRUMENT DATA

- 14150 5K **From simulations to the telescope: performance assessment of the Ingot WFS** [14150-165]
- 14150 5L **Exoplanet detection with ASAP-DC** [14150-210]
- 14150 5M **Recent thermal infrared observations of a protoplanetary disk enabled by the NALES reduction pipeline** [14150-211]

- 14150 5N **Characterizing the wind-driven halo in high-contrast images** [14150-212]
- 14150 5O **Assessing the astrometric and photometric performance of Starfinder2 in ELT-METIS simulated images** [14150-213]
- 14150 5Q **NirvanaVIS at LBT: AO-assisted speckle holography for wide-field visible imaging** [14150-215]
- 14150 5R **Towards autodifferentiable point spread function modelling for the VLT/ERIS vortex coronagraph** [14150-216]
- 14150 5S **Convolutional neural network for the PSF subtraction in high contrast imaging** [14150-217]
- 14150 5U **The new Starfinder: an open-source Python™ software for empirical PSF modeling and crowded-field analysis in high-resolution imaging** [14150-219]
- 14150 5W **Visible light spectroscopy with extreme adaptive optics: a pipeline for the low-resolution mode of VIS-X (Poster Communication Award)** [14150-375]

POSTER SESSION: CONTROL SYSTEMS SOFT- AND HARDWARE

- 14150 5X **Assessing reinforcement learning in XAO control for PCS** [14150-221]
- 14150 5Y **The MICADO first light imager for the ELT: real-time monitoring and control for AIT activities** [14150-223]
- 14150 5Z **SAXO+, the second-stage adaptive optics for SPHERE: RTC final design and performance results** [14150-224]
- 14150 60 **Control and electronics architecture for large adaptive secondary mirrors** [14150-225]
- 14150 61 **MADOCS: a high-speed adaptive optics control system for optical communications** [14150-226]
- 14150 62 **Developing and operating AO RTC software for LGS R&D** [14150-227]
- 14150 63 **Creating an ELT scale command matrix in less than a second for METIS on a consumer grade GPU using Python** [14150-228]
- 14150 64 **The CPU-GPU based heterogeneous real-time controller for solar AO systems at 1-meter and 2.5-meter solar telescopes** [14150-229]
- 14150 65 **Design and implementation of a new PLC-based driving electronics for the NACO deformable mirror** [14150-230]
- 14150 66 **CACAO++: scheduling user experience as the core of adaptive optics real-time computers** [14150-231]

- 14150 67 **Realtime control for extremely large AO declustered: the KAOS Evo 2 DKIST MCAO real-time control system** [14150-232]

POSTER SESSION: PSFR

- 14150 68 **The MICADO first light imager for the ELT: the PSF reconstruction software** [14150-234]
- 14150 69 **Characterization of the MUSE NFM PSF as a function of atmospheric conditions: TipTop calibration** [14150-235]
- 14150 6A **Towards first light for MICADO: validation of the PSF-R service with real data** [14150-236]

POSTER SESSION: CHARACTERIZATION AND FORECASTING OF WAVEFRONT DISTURBANCES

- 14150 6B **Tomographic reconstructors for MCAO: a solar case study** [14150-237]
- 14150 6C **Wavefront predictor performance comparison between artificial neural network and linear model-based predictors** [14150-238]
- 14150 6D **ABL-Drone: a novel, drone-based, high vertical resolution atmospheric turbulence monitoring system for astronomical observatories** [14150-239]
- 14150 6E **Neural networks applied to forecasting the astroclimatic parameters in an operational context** [14150-240]
- 14150 6F **Characterisation and modelling of dome turbulence through temporal covariances: CANARY and VLT analysis** [14150-241]
- 14150 6G **Polaris non-tracking differential image motion monitors for autonomous atmospheric turbulence monitoring** [14150-242]
- 14150 6H **Increasing the sensitivity of a solar Shack-Hartmann turbulence profiler to high-altitude turbulence** [14150-243]
- 14150 6I **A probabilistic seeing-forecast system for the 10.4m Gran Telescopio Canarias: methodology, validation, and operational integration** [14150-244]
- 14150 6J **Predictive control of atmospheric turbulence for optical ground stations** [14150-245]
- 14150 6K **Using a network of smart telescopes to measure atmospheric turbulence** [14150-246]
- 14150 6L **CNN-based reanalysis of optical turbulence at the Canary Islands Observatories** [14150-247]

- 14150 6P **Focal-plane diagnostics of atmospheric and dome-induced turbulence: exploring techniques and applications** [14150-252]
- 14150 6Q **Quantifying the errors in modeling optical propagation in a turbulent atmosphere using different phase screen synthesization methods** [14150-253]
- 14150 6R **R&D activity in INAF on light instrumentation for continuous optical turbulence monitoring** [14150-254]
- 14150 6S **Simulation-based inference of atmospheric parameters from adaptive optics telemetry data** [14150-255]
- 14150 6T **Establishing baseline model performances for optical turbulence forecasting** [14150-256]
- 14150 6U **Development of an event-based Shack-Hartmann image monitor** [14150-257]
- 14150 6V **Ae'o: a SCIDAR instrument for Maunakea** [14150-258]
- 14150 6W **Predictive atmospheric models for servo-lag mitigation in frozen-flow-dominated regimes: application to FSOC and HCI** [14150-259]

POSTER SESSION: AO CONTROL INCLUDING VIBRATION CONTROL

- 14150 6Y **DD4AO control law for RISTRETTO: robustness, real-time performance, and on-sky validation with PAPYRUS** [14150-262]
- 14150 6Z **Ground control to major time-lag: on-sky results of data-driven predictive wavefront control at Keck Observatory** [14150-263]
- 14150 70 **LGS-based vibration control: evaluating closed-loop performance with end-to-end simulations** [14150-264]
- 14150 71 **SAXO+, the second-stage adaptive optics for SPHERE: continuous learning of the temporal dynamics of the wavefront** [14150-265]
- 14150 72 **Model predictive control for adaptive optics using identified stochastic disturbance models** [14150-267]
- 14150 73 **MORFEO at ELT: control strategies for tip-tilt compensation on extremely large telescopes** [14150-268]
- 14150 75 **EtherCAT-based motion control migration for the SPHERE instrument at the Very Large Telescope** [14150-270]
- 14150 76 **Numerical comparisons of VAR LQG-based predictive AO control and reinforcement-learning-based control methods for LEO-to-ground telecommunication links** [14150-271]
- 14150 77 **SAXO+, the second-stage adaptive optics for SPHERE: single vs cascade control loop performance assessment** [14150-272]

- 14150 78 **Quantum-optimal instruments for high-contrast imaging with multiplane light converters**
[14150-374]
- 14150 79 **Predictive control for the compensation of NCPAs measured with SPHERE/ZELDA** [14150-376]

POSTER SESSION: COMMISSIONING OF AO SYSTEMS

- 14150 7A **Optimal weighting functions and altitude sampling for accurate estimation of C^2_n profile**
[14150-273]
- 14150 7B **First light results from Castor AO** [14150-274]

POSTER SESSION: STATUS OF OPERATIONAL AO SYSTEMS AND FUTURE PLANS

- 14150 7C **Global wavefront reconstruction strategy for dual-WFS multiconjugate adaptive optics system** [14150-276]
- 14150 7D **A monolithic upgrade of the NVST adaptive optics system for multimode and prominence observations** [14150-277]
- 14150 7E **Robo-AO-2: entering the era of automated science operations, hybrid wavefront sensing, and adaptive secondary integration** [14150-278]

Part Four

POSTER SESSION: COMMUNITY DEVELOPMENT, FUTURE NEEDS, AND STRATEGIES

- 14150 7F **Analysis of laser-satellite deconfliction for astronomical observatories** [14150-280]
- 14150 7G **Building a catalog of visually-close binary stars through Gaia PSF simulations for ELT era AO systems** [14150-281]

POSTER SESSION: ARTIFICIAL BEACONS FOR WAVEFRONT SENSING

- 14150 7H **Subaru laser guide star facility upgrade for the LTAO mode: 4 LGS with a diffractive optical element** [14150-284]
- 14150 7J **A comparative study of strategies to replicate sodium LGS in a laboratory environment**
[14150-286]
- 14150 7K **Wavefront modal spatio-temporal coherence in turbulent atmospheres** [14150-288]

- 14150 7L **Characterization of Rayleigh backscattering in CaNaPy: a sodium-LGS pulsed monostatic system** [14150-291]
- 14150 7M **MORFEO @ ELT: laser guide stars wave front sensors module** [14150-292]
- 14150 7N **Analytical, FEMs, and experimental study of natural frequencies of subsystems of the laser guide star for GTC** [14150-293]

POSTER SESSION: MODELING, ANALYSIS, SIMULATION OF AO SYSTEMS

- 14150 7O **Blur: a fast adaptive optics simulation software for performance modeling, prediction & optimization, and for control systems development, testing & user training** [14150-294]
- 14150 7P **SPECULA: adoption, developments, and use cases of a scalable adaptive optics simulation framework** [14150-295]
- 14150 7Q **GPI 2.0: simulated performance of the AO upgrade** [14150-297]
- 14150 7R **Contactless magnetorheological PDMS (polydimethylsiloxane) membrane for high-stroke deformable mirror** [14150-298]
- 14150 7S **METIS high-contrast imaging simulations: from instrument modelling to science readiness** [14150-299]
- 14150 7T **Study of an atmospheric turbulence prediction method using a wavefront sensor for uplink laser satellite communication at KgOGS-1 in NICT** [14150-300]
- 14150 7U **Predictive fast tip-tilt control for the Magdalena Ridge Observatory interferometer** [14150-302]
- 14150 7V **TipTop: a fast and versatile analytical tool for AO PSF prediction** [14150-303]
- 14150 7X **EKARUS at the Asiago Observatory: simulations and performance analysis of a modular R&D ExAO system** [14150-305]
- 14150 7Z **Pseudo-synthetic interaction matrix for the GRAVITY+ Adaptive Optics system: modeling and calibration of the ALPAO deformable mirror influence functions and coupling** [14150-307]
- 14150 80 **Ground layer adaptive optics for 8-12m telescopes** [14150-308]
- 14150 81 **Optimal exposure time for satellite imaging? A trade-off between residual tip-tilt and registration accuracy** [14150-310]
- 14150 82 **Performance comparison of multistage ExAO systems for high contrast imaging** [14150-311]
- 14150 84 **Simulations on petal mode sensing for the ELT using the OTF-based phasing scheme** [14150-313]

- 14150 85 **Performance assessment of the AOC system on a 1-m telescope: stellar mode characterisation and planetary mode development** [14150-314]
- 14150 87 **Modelling atmospheric dispersion effects on fine phasing of large segmented mirrors** [14150-316]
- 14150 88 **Construction of a laboratory model of an adaptive optics module for an amateur telescope** [14150-317]
- 14150 89 **ANDES, the high-resolution spectrograph for the ELT: updates from the prototyping work package of the SCAO module** [14150-318]
- 14150 8A **The GMagAO-X facility ExAO coronagraphic instrument for the Giant Magellan Telescope: the first FDR level optomechanical design for an ELT ExAO system** [14150-319]

POSTER SESSION: CALIBRATION OF AO SYSTEMS

- 14150 8C **Updating the SCExAO/CHARIS polarimetric calibration following the Nasmyth beam-switcher upgrade** [14150-321]
- 14150 8E **Enhanced image sharpening for Keck AO using two-stage phase retrieval** [14150-323]
- 14150 8F **Optical calibration of ELT-M4: segment phasing procedure tested on the prototype** [14150-324]
- 14150 8G **ULTIMATE-Subaru: concept and the strategy of the calibration process of the adaptive secondary mirror and the wavefront sensor** [14150-325]
- 14150 8H **Design of a Hindle-Simpson metrology system for the Keck 1 Telescope adaptive secondary mirror** [14150-326]
- 14150 8I **Optical calibration of the ELT-M4: validation of the local calibration of capacitive position sensors on the demonstration prototype** [14150-327]

POSTER SESSION: AO SYSTEMS AND SUBSYSTEMS TESTING

- 14150 8K **Development of a monitor for estimating dome seeing at the National Astronomical Observatory of Tonantzintla** [14150-260]
- 14150 8L **The INAF-OAR laser guide stars adaptive optics laboratory: a national facility for assembly, integration, and verification of advanced laser guide star systems** [14150-330]
- 14150 8M **MAVIS: diagnostic and NCPA unit and its laboratory verification** [14150-332]
- 14150 8N **MiniMATTO: towards the practical implementation of the MATTO test bench** [14150-333]

- 14150 8O **Status of the laser tomography adaptive optics design for the Giant Magellan Telescope** [14150-334]
- 14150 8P **First on-sky results of the HAKA deformable mirror upgrade** [14150-335]
- 14150 8Q **Keck near-infrared wavefront sensor adaptive optics ('IWA'): preliminary design** [14150-337]
- 14150 8R **The MICADO first light imager for the ELT: first on-bench performance tests of the SCAO hybrid LQG+Integrator controller** [14150-338]
- 14150 8S **MAVIS: AIV procedures for the post focal relay** [14150-339]
- 14150 8T **Developing a SPECULA-based digital twin for the MATTO test bench** [14150-340]
- 14150 8U **GRAVITY+ LGS (laser guide star): assembly, integration, and verification at the Very Large Telescope (VLT)** [14150-341]
- 14150 8V **Precision in motion: aligning MAVIS AOM modules from multiple sites** [14150-343]
- 14150 8W **MORFEO @ ELT: test and verification steps towards the calibration unit final design** [14150-344]
- 14150 8X **Compact AO system for Cassegrain Telescopes: design and implementation for a 0.5cm aperture** [14150-345]
- 14150 8Y **Adaptive optics for the European Solar Telescope: test results of the adaptive secondary prototype** [14150-346]
- 14150 8Z **SAXO+, the second-stage adaptive optics for SPHERE+: alignment procedure in the laboratory** [14150-347]
- 14150 90 **SPIDERS' imaging Fourier transform spectrometer: optimal LQG control and high-fidelity spectral extraction** [14150-349]
- 14150 91 **Optical performance verification of the ULTIMATE-Subaru wavefront sensor subsystem** [14150-350]
- 14150 95 **ALTAIR, 20 years on sky and still delivering exciting science** [14150-355]
- 14150 96 **EKARUS at Asiago Observatory: optomechanical design and AIT procedures of the visible stage** [14150-356]
- 14150 97 **ULTIMATE-Subaru ground layer adaptive optics enters production phase at the Australian National University** [14150-358]

POSTER SESSION: PROTOTYPING, PATHFINDERS, AND CONSTRUCTION PROJECTS

- 14150 98 **Phasing of small deployable optical telescope using phase retrieval: laboratory demonstration** [14150-173]
- 14150 99 **The GMT Adaptive Optics and Phasing Sensors (GAPS) testbed: characterization and validation of the wavefront control hardware** [14150-360]
- 14150 9A **NEXT: The Netherlands EXoplanet Testbed I, goals and opto-mechanical design** [14150-361]
- 14150 9B **Subaru ultimate-GLAO wave front sensor de-rotator mechanical prototype** [14150-362]
- 14150 9C **Final design of the MATTO test bench** [14150-363]
- 14150 9D **Integration and alignment of the Petalometer testbench at INAF-Arcetri** [14150-364]

POSTER SESSION: ELT ADAPTIVE OPTICS SUB-SYSTEMS STATUS

- 14150 9E **The MICADO first light imager for the ELT: tuning STARLOC, the star tracking algorithm for the MICADO Lyot coronagraphs** [14150-366]
- 14150 9F **Validating and characterising the Ingot WFS in a new ELT-like test bench** [14150-367]
- 14150 9G **Optical design of the MORFEO low order WFS atmospheric dispersion corrector** [14150-368]
- 14150 9H **MORFEO at ELT: LOR WFS module final design overview** [14150-369]
- 14150 9I **Impact of microlenses shape on the performance of laser guide star wavefront sensors for ELT-class telescopes** [14150-370]
- 14150 9J **HARMONI at ELT: reoptimization of the NGSS natural guide star sensors system for MCAO compatibility** [14150-371]
- 14150 9K **Maximising the mid-infrared high-contrast performance on ELT/METIS despite water vapour seeing** [14150-372]
- 14150 9L **MOSAIC at the ELT: the optical design of the ground layer adaptive optics (GLAO) natural guide star systems** [14150-373]
