SPIE

Volume 14271

Proceedings of SPIE 0277-786X, V. 14271

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Sixth Optics Frontier Conference (OFS 2026)*, edited by Xiaolong Su, Proc. of SPIE 14271, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v Conference Committee

SIXTH OPTICS FRONTIER CONFERENCE (OFS 2026)

- 14271 02 **Deterministic excitation of soliton crystal combs enabled by self-injection locking in a DFB LD-composite microcavity coupled system** [14271-3]
- 14271 03 **Spiral spectrum distribution and control of reflecting surface in tilted incidence** [14271-4]
- 14271 04 **Evolution of super-resolution microscopy: from mechanical scanning to mechanical-scan-free multicolor diffractive spot array illumination** [14271-5]
- 14271 05 **Super-resolution diffraction-free transversely circularly polarized optical needle with independently controllable orientation and length** [14271-6]
- 14271 06 **Throughput advantages of NANFs for inter-city data center interconnection** [14271-8]
- 14271 07 **Broadband high-Q terahertz Smith-Purcell radiation enabled by bound states in the continuum** [14271-9]
- 14271 08 **Robustness of genuine entanglement in four-qubit GHZ-W mixed states** [14271-10]
- 14271 09 **A compact, high-efficiency, broadband thin-film lithium niobate edge coupler for large mode field** [14271-13]
- 14271 0A **Contra-directional coupler-based wavelength-division multiplexing system on thin-film lithium niobate** [14271-14]
- 14271 0B **Large-field multi-layer super-resolution structured illumination microscopy** [14271-15]
- 14271 0C **High-Q three-channel terahertz encoder based on spoof surface plasmons** [14271-16]
- 14271 0D **Simulation optimization study on geometric dimensions and asymmetric tilt angle of THz s-SNOM probes** [14271-19]
- 14271 0E **Relationship between PI parameters and image quality in terahertz near-field imaging at 0.4 Hz scanning frequency** [14271-20]
- 14271 0F **Millimeter-wave imaging-based liquid level detection system** [14271-21]
- 14271 0G **Simulation study on the terahertz dielectric constant of dehydrated human sperm cell nucleus based on the double-Debye model** [14271-22]

- 14271 OH **Single-photon OAM Bell-state recognition via diffractive optical neural networks** [14271-24]
- 14271 OI **Simulation of mode-matching efficiency in slab lasers with horizontal and vertical laser diode stacks pumping** [14271-25]
- 14271 OJ **Study on nanoimprint fabrication and optical properties of triangular pyramid microprism retroreflective films** [14271-26]
- 14271 OK **High accuracy spectrally encoded Mueller spectropolarimetry** [14271-27]
- 14271 OL **High-stability and high-accuracy double Stokes-Mueller polarimetry under oblique incidence** [14271-28]
- 14271 OM **Generation of high-order vortex beams from an Hermite-Gaussian Nd:YVO₄ laser** [14271-29]
- 14271 ON **Label-free classification of cell scattering images via an optical diffractive deep network** [14271-30]
- 14271 OO **High-Q flexible terahertz sensor based on quasi-bound states in the continuum** [14271-32]
- 14271 OP **AI-assisted design of mScarlet3-derived red fluorescent proteins for live-cell imaging** [14271-33]
- 14271 OQ **Efficient light-emitting diode pulsed light source for photoacoustic imaging** [14271-34]
- 14271 OR **A fully hardware-accelerated real-time reconstruction architecture for high-throughput FIRE imaging flow cytometry** [14271-36]
