PROCEEDINGS OF SPIE

International Conference on Geotechnology, Mining, and Rational Use of Natural Resources (GeoTech-VII 2026)

Faisal Mukhtar
Igor Kovalev
Akbar Abrorov
Editors

28–30 April 2026
Navoi, Uzbekistan

Organized by
Navoi State University of Mining and Technologies (Uzbekistan)

Sponsored by
"Navoi Mining and Metallurgical Company" Joint-Stock Company (Uzbekistan)

Published by
SPIE

Volume 14297

Proceedings of SPIE 0277-786X, V. 14297

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Conference on Geotechnology, Mining, and Rational Use of Natural Resources (GeoTech-VII 2026)*, edited by Faisal Mukhtar, Igor Kovalev, Akbar Abrorov, Proc. of SPIE 14297, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

ix Conference Committee

OPTICAL, PHOTONIC, REMOTE SENSING AND APPLIED PHYSICS IN GEOSCIENCES

14297 02 **A probabilistic model for estimating guidance errors of optical spacecraft surveillance equipment** [14297-5]

14297 03 **Interplay of strain relaxation and defect generation in metamorphic $InAs_{1-x}Sb_x$ heteroepitaxy** [14297-28]

14297 04 **Optical sensor-based assessment of dust and thermal emission dynamics in mining and metallurgical production environments** [14297-30]

14297 05 **Application of photonic LiDAR technologies for automated monitoring of open-pit mine geomechanical stability** [14297-67]

14297 06 **Smart dust technology in distributed sensor networks: architecture, energy strategies, and emerging challenges** [14297-55]

14297 07 **Influence of magnetostriction on the structure and energy of 180° domain walls in uniaxial ferromagnets** [14297-82]

14297 08 **Eigenvalues of the Weyl function matching to an operator matrix in quantum mechanics** [14297-16]

14297 09 **An analytical study of a modified inertial subgradient-extragradient method for equilibrium problems in Hilbert spaces arising in quantum systems** [14297-41]

14297 0A **Remote sensing and data-driven assessment of environmental risk patterns in mining and metallurgical areas** [14297-21]

14297 0B **Application of remote sensing and digital technologies in monitoring mining infrastructure** [14297-22]

14297 0C **GIS and remote sensing-based spatiotemporal monitoring of land degradation dynamics in mining regions** [14297-83]

14297 0D **Analysis of measurement signal processing in the spectral domain** [14297-59]

14297 0E **Spectral properties of channel operators for the third-order operator matrix under noncompact perturbations in applied physics** [14297-35]

14297 0F **Analysis of eigenvalue counts of second-order operator matrices arising in condensed matter physics** [14297-36]

GEOLOGY, GEOPHYSICS, GEOTECHNOLOGY AND MINING INFRASTRUCTURE MECHANICS

14297 0G **Application of the Kelvin-Voigt model to study contact phenomena in roll modules** [14297-3]

14297 0H **Development and application of computer vision systems for automating the control of geometric characteristics of railway tracks** [14297-6]

14297 0I **Integrated GIS-based optimization of railway fuel tanker routing using Clarke-Wright initialization and local search** [14297-7]

14297 0J **Modeling of methane transport processes in a longwall face considering time-dependent gas emission from broken coal** [14297-40]

14297 0K **Studying seismic phenomena in tectonically disturbed and seismically dangerous mountain masses of deep horizons** [14297-69]

14297 0L **Study of the material composition of the kaolin sample from the Oltintov deposit** [14297-8]

14297 0M **Study of the material composition of copper-sandstone ores of the Bobotog deposit** [14297-11]

14297 0N **Developing a technical solution to avert lateral displacement of the belt on a belt conveyor** [14297-71]

14297 0O **Analysis of the stress-strain state of the gas pipeline under low-temperature impacts** [14297-53]

14297 0P **Stress-strain analysis of the column apparatus with a piping system** [14297-24]

14297 0Q **Enhancing machine reliability via structural redundancy of components** [14297-25]

14297 0R **A new method for improving the reliability of tests on natural resource objects based on measurement uncertainty when prior data is lacking** [14297-42]

14297 0S **Ratios of deformation rates of contacting bodies** [14297-47]

14297 0T **Determination of load distribution based on the theory of forces acting on belt conveyor rollers** [14297-79]

MINERAL PROCESSING, BENEFICIATION, GEOCHEMISTRY AND CHEMICAL RECOVERY

14297 0U **Investigation of the production of defluorinated liquid fertilizer from Aznek deposit phosphorites based on SEM analysis** [14297-27]

14297 0V **Predictive geochemical modeling for enhancing the efficiency of mineral raw material processing in mining systems** [14297-29]

14297 0W **A review of electrochemical and electrokinetic methods for uranium recovery** [14297-39]

14297 0X **Optimization of operating parameters in pneumatic flotation of refractory gold-sulfide ores** [14297-9]

14297 0Y **Process modeling of biotechnological metal recovery from low-grade mineral raw materials for sustainable mineral processing** [14297-13]

14297 0Z **Comprehensive analysis of physico-mechanical properties of coarse feeds for optimization of processing equipment** [14297-62]

14297 10 **The process of obtaining coagulant using acid digestion of Jizzakh mine ores** [14297-70]

14297 11 **Saponite as a sorbent for the treatment of industrial waters from heavy metals and rare earth elements: a review** [14297-43]

14297 12 **Mixed complexes of nickel(II) with amino acids and dicarboxylic acids** [14297-84]

14297 13 **Mineralogical characteristics of Kokpatas and Daugystau refractory sulfide ores processing** [14297-73]

14297 14 **Computer simulation of the flotation process based on a hydrodynamic structure** [14297-50]

14297 15 **Selection of controlled and adjusted technological parameters in the development of a system for optimal control of the gold desorption process** [14297-85]

14297 16 **Robust estimation of saturated vapor pressure-temperature relationship parameters under combined measurement errors** [14297-80]

14297 17 **Studies on the recovery of nickel and nickel sulfate from waste solutions of copper production** [14297-81]

METALLURGY, ADVANCED MATERIALS AND PHYSICOCHEMICAL PROCESSING

14297 18 **Strengthening of polyamide by aluminum oxide nanofibers** [14297-1]

14297 19 **Calculation of titanium concentration corresponding to nitride formation in steel alloys** [14297-10]

14297 1A **Tribological behavior of zirconia-based ceramic and cermet composites under dry sliding conditions** [14297-12]

14297 1B **Experimental study on extending the service life of induction furnace linings using nano-modified and composite linings** [14297-17]

14297 1C **The effect of microalloying with ferrovanadium on the microstructure and hardness of high-manganese austenitic steel** [14297-18]

14297 1D **Sustainable kraft paper production from cocooning waste and recycled fibers for resource-efficient material utilization** [14297-20]

14297 1E **Microstructural and elemental analysis of refractory compounds for the rational use of basalt melt products** [14297-26]

14297 1F **Analysis of kinetics of reversible phase transformations in $Er_2Fe_{14}B$ alloy** [14297-45]

14297 1G **Study by IR spectroscopy, XRD, and derivatography of CuCl-based activated carbon catalysts for acetylene hydrochlorination** [14297-46]

14297 1H **Mechanical properties of spent NIAP-12-05 catalyst and thermal regeneration effects on structural strength** [14297-63]

14297 1I **MATLAB-based heat and mass transfer model for infrared treatment of silkworm cocoons** [14297-49]

14297 1J **Modeling and optimization of the acetylene production process in Matlab/Simulink** [14297-64]

14297 1K **Numerical model for determining residual stresses in welded structures using the SEQV criterion** [14297-58]

GEOECOLOGY, ENVIRONMENTAL SAFETY, RATIONAL RESOURCE USE AND ENERGY EFFICIENCY

14297 1L **Quantum-mechanical description of the ionization characteristics of radionuclides in the uranium decay chain in environmental media** [14297-2]

14297 1M **Physicochemical properties of thermally activated Opoka-biochar composites for adsorption of heavy metals** [14297-60]

14297 1N **Improving the efficiency of mine reciprocating compressors based on the enhancement of the cooling system** [14297-61]

14297 1O **Determination of time lag and decrement factor in multilayer walls using the Crank-Nicolson method** [14297-31]

14297 1P **Use of heat pumps for heat supply in the utilization of biogas from municipal solid waste landfills** [14297-14]

14297 1Q **Radiological characteristics of groundwater in the uranium-bearing Kyzylkum region** [14297-15]

14297 1R **Peculiarities of standardization of residual pollution of industrial wastewater by oil products** [14297-57]

14297 1S **Physics-informed modeling and optimization of heat and mass transfer in porous mineral raw materials during energy-efficient industrial drying** [14297-19]

14297 1T **Systemic analysis of the results of heat supply system modernization** [14297-72]

14297 1U **Development of an integrated mobile device for environmental monitoring in the Kyrgyz Republic** [14297-38]

14297 1V **Effects of operating parameters on dust capture and flow patterns in a hollow vortex apparatus** [14297-74]

14297 1W **Data-driven approach analysis of energy efficiency and energy saving technologies in mining enterprises** [14297-32]

14297 1X **Fiber optic and acoustic sensor fusion for preemptive rockburst risk mitigation in deep underground mining** [14297-65]

AUTOMATION, DIGITAL TRANSFORMATION AND INTELLIGENT CONTROL OF MINING SYSTEMS

14297 1Y **Methodology for determining the parameters of an inductor coil for smoothing filters operating in the initial nonlinear region of the magnetization curve** [14297-4]

14297 1Z **Automated robotic sorting of mineral resources using advanced computer vision techniques** [14297-68]

14297 20 **Integration of a digital assistant with SCADA systems to optimize grinding process parameters in real time** [14297-56]

14297 21 **Comparative analysis of control systems used in roasting furnaces** [14297-75]

14297 22 **Mixed problem for a fractional differential equation with Barenblatt-Zheltov-Kochina type operator: existence and uniqueness** [14297-48]

14297 23 **Digital twin-based intelligent monitoring and optimization of energy consumption in mineral processing systems** [14297-51]

14297 24 **A pole placement-based multimode modal and fuzzy-intelligent control approach for the ore grinding process** [14297-76]

14297 25 **Development of an intelligent digital monitoring system for energy-efficient control of ore drying and processing in mining enterprises** [14297-52]

14297 26 **Computer vision-based intelligent detection of ore fragmentation and conveyor belt anomalies in mining and mineral processing systems** [14297-37]

14297 27 **Reliability-based modeling of electromechanical and energy infrastructure in mining enterprises under variable load conditions** [14297-33]

14297 28 **Autonomous transformation of deep-horizon mining systems: an integrated framework of cyber-physical systems and edge-AI** [14297-66]

14297 29 **Improving lubrication reliability of mine reciprocating compressors with a magnetic porous oil filter** [14297-77]

14297 2A **Integrated methodology for developing forecasting models for MPC/NMPC in the architecture of cyber-physical manufacturing systems** [14297-78]
