

PROCEEDINGS OF SPIE

International Conference on Smart Energy and New Power Systems (SENPS 2026)

Shengqing Li
Editor

8–10 May 2026
Changsha, China

Organized by
Hunan University of Information Technology (China)

Published by
SPIE

Volume 14310

Proceedings of SPIE 0277-786X, V. 14310

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Conference on Smart Energy and New Power Systems (SENPS 2026)*, edited by Shengqiang Li, Proc. of SPIE 14310, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

SMART ENERGY

- 14310 02 **Research on temperature regulation of regenerative heating furnace based on GPC and improved double cross-limit control** [14310-35]
- 14310 03 **Coordinated control strategy for grid-connected PV systems with hybrid energy storage to enhance transient support capability** [14310-11]
- 14310 04 **State-of-health forecasting for lithium-ion batteries using WOA-BiLSTM algorithm** [14310-41]

SMART GRID

- 14310 05 **An AI-integrated adaptive pilot protection strategy using hierarchical Euclidean distance for transmission lines** [14310-37]
- 14310 06 **Joint cross-governance method for multisource power data in online state grid shared applications** [14310-22]
- 14310 07 **Multi-objective optimization algorithm and digital realization of commutation switch integrating topological connection and load characteristics** [14310-3]
- 14310 08 **Research on key technologies for collaborative construction of cable engineering based on intelligence** [14310-10]
- 14310 09 **A short-term load forecasting method based on multiscale decomposition using LAnet-Crosslinear** [14310-9]
- 14310 0A **Research on air discharge diagnosis technology based on multispectral analysis** [14310-40]
- 14310 0B **Voltage control and optimal scheduling strategy of new distribution system based on improved genetic algorithm** [14310-13]
- 14310 0C **Federated learning-based privacy-preserving multisource data fusion for smart grids** [14310-18]
- 14310 0D **Dynamic optimization method for complex operating conditions of power supply services based on spatiotemporal graph neural networks** [14310-25]

POWER ELECTRONICS TECHNOLOGIES

- 14310 0E **Wireless power transmission efficiency optimization and safety protection technology for new energy vehicle charging facilities** [14310-28]
- 14310 0F **CFD simulation and optimization of liquid cooling channel designs for electric vehicle battery thermal management systems** [14310-4]
- 14310 0G **Construction of an arc protection helmet arcing test system** [14310-30]
- 14310 0H **Design of ultrasonic reversing radar** [14310-31]
- 14310 0I **Design of a 16-frequency divider circuit based on 0.18 μm process library** [14310-34]
- 14310 0J **Chip dynamic power prediction method based on improved graph neural network** [14310-12]
- 14310 0K **Research on temperature drift compensation circuit design for MEMS accelerometers** [14310-5]
- 14310 0L **Design of monitoring system for new energy vehicle charging piles** [14310-36]
- 14310 0M **Comparative study of six-phase permanent magnet assisted synchronous reluctance motors with different winding** [14310-15]
- 14310 0N **Reconfigurable data flow generation circuit design for sparse attention computation** [14310-33]
- 14310 0O **Research on the construction of retrieval question and answer dataset and optimization of a two-stage retrieval model for the field of technical supervision for power systems** [14310-24]

NEW POWER SYSTEM

- 14310 0P **Residual stress distribution detection in GIS basin-type insulators based on the acoustoelastic effect** [14310-8]
- 14310 0Q **Load forecasting model for power consumption analysis applications in industrial chains** [14310-21]
- 14310 0R **Analysis of electricity consumption growth characteristics considering multifactor effects across regions and industries** [14310-29]
- 14310 0S **Research on the new characteristics of source-grid-load-storage in the new power system driven by data and its security risk early warning** [14310-32]
- 14310 0T **Method for partial discharge detection in transformer bushings based on RF sensor array** [14310-20]

- 14310 0U **A knowledge graph-augmented algorithm for day-ahead electricity price forecasting in electricity markets based on large language model and graph neural network fusion** [14310-14]
- 14310 0V **Electric power customer service data asset identification method for data-sharing knowledge service applications** [14310-23]
- 14310 0W **Research on credit risk identification methods for electricity market participants based on BiLSTM-FLAML** [14310-26]
- 14310 0X **Research on market power identification method based on IWOA-BCSVM** [14310-27]
