PROCEEDINGS OF SPIE

International Conference on Advanced Manufacturing, Automation, and Deep Learning (AMADL 2026)

Ying Jiang
Yufei Gao
Editors

15–17 May 2026
Guangzhou, China

Organized by
Guangdong Industrial Software Federation (China)
Guangdong University of Technology (China)

Sponsored by
Sun Yat-sen University (China)
Nankai University (China)
Shandong University (China)

Volume 14311

Proceedings of SPIE 0277-786X, V. 14311

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Conference on Advanced Manufacturing, Automation, and Deep Learning (AMADL 2026)*, edited by Ying Jiang, Yufei Gao, Proc. of SPIE 14311, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

INTERNATIONAL CONFERENCE ON ADVANCED MANUFACTURING, AUTOMATION, AND DEEP LEARNING (AMADL 2026)

14311 02 **Knowledge graph-based modeling of East Asian regional relationship structures and intelligent reasoning algorithms** [14311-1]

14311 03 **FNO-MP: a mixed-precision training acceleration framework for FNO** [14311-3]

14311 04 **Multimodal graph reinforcement learning for innovation capability path optimization** [14311-5]

14311 05 **An anomaly detection model for shared service data ingestion integrating rule constraints and attention mechanisms** [14311-6]

14311 06 **Multiscale convolutional feature fusion model for signal classification in complex electromagnetic environment** [14311-7]

14311 07 **Intelligent identification and evolutionary analysis of water-conducting fractures for coal mine water prevention and control based on 3D laser scanning and computer vision** [14311-8]

14311 08 **Hardware acceleration optimization for deep learning-based children's emotion recognition system** [14311-10]

14311 09 **IPD-driven automatic checking method for DCS hardware release BOM conformance** [14311-11]

14311 0A **Design of computer image processing virtual simulation system for installation art** [14311-12]

14311 0B **Intelligent prediction and displacement control algorithm of return sand concentration in continuous tube horizontal well sand washing process** [14311-13]

14311 0C **Proximal policy optimization-based speed regulation for low-power marine electric motors: modeling, control design, and experimental validation** [14311-14]

14311 0D **Research on network anomaly traffic detection and intrusion prevention system driven by deep learning** [14311-15]

14311 0E **Bridge quality inspection: multiscale feature extraction and intelligent decision model** [14311-16]

14311 0F **Research on industrial defect image enhancement detection model driven by generative adversarial networks** [14311-17]

14311 0G **Multimodal data-driven knowledge graph reasoning model for historical and cultural resources** [14311-18]

14311 0H **Automatic evaluation method of software engineering training results driven by multi-LLM agent cooperation** [14311-19]

14311 0I **Optimization of graph neural network model in particle track reconstruction** [14311-20]

14311 0J **Temporal graph-based trust modeling and prediction using multisource interaction data** [14311-21]

14311 0K **Study on three-dimensional kinematic measurement of dynamic valgus knee joint in variable direction motion** [14311-22]

14311 0L **Analysis of speed chain transfer characteristics of special action captured by high frequency camera** [14311-23]
